

# Contents

- 1 Introduction ..... 1**
  - 1.1 Topic and its Relevance ..... 1
  - 1.2 Formulating the Research Questions ..... 2
  - 1.3 State of the Literature ..... 2
  - 1.4 Methodological Approach ..... 3
  - 1.5 Structure of the Thesis ..... 3
  - 1.6 Definitions and Assumptions ..... 3
- 2 Analysing the Practical Problem..... 5**
  - 2.1 Expectations and Uses for the Model..... 6
  - 2.2 Approaches in Literature and Banking Practise ..... 7
  - 2.3 Implications for the Model ..... 15
  - 2.4 Applied Model ..... 16
- 3 Modelling Main Risk Factors ..... 18**
  - 3.1 Market Rates..... 18
    - 3.1.1 Term Structure Model ..... 21
    - 3.1.2 Data ..... 23
    - 3.1.3 Calibration ..... 25
  - 3.2 Client Rates..... 26
    - 3.2.1 Pass-Through Model..... 28
    - 3.2.2 Data ..... 31
    - 3.2.3 Calibration ..... 31
  - 3.3 Total Volumes of Non-Maturing Accounts ..... 34
    - 3.3.1 Volume Model ..... 36
    - 3.3.2 Data ..... 38
    - 3.3.3 Calibration ..... 38
- 4 Setting up a Multistage Stochastic Program ..... 42**
  - 4.1 Replicating Portfolio Methodology ..... 42
    - 4.1.1 Optimization and Investment Policy ..... 46
    - 4.1.2 Yields and Data ..... 48
  - 4.2 Optimization Problem ..... 48
    - 4.2.1 Notation..... 50
    - 4.2.2 Defining Constraints..... 51
    - 4.2.3 Defining the Objective Criterion..... 54
    - 4.2.4 Scenario Generation ..... 54
  - 4.3 Implementation of the Program ..... 59
- 5 Model Output and Performance Analysis ..... 61**
  - 5.1 Data Characteristics and Methodology..... 61
  - 5.2 Comparing Static and Dynamic Model ..... 63
    - 5.2.1 Static Model ..... 63

5.2.2	Results .....	64
5.2.3	Model Defects .....	67
5.3	Comparing Different Objective Criteria .....	69
5.4	Comparing Different Numbers of Stages.....	71
5.5	Comparing Different Numbers of Scenarios.....	73
5.6	Comparing Different Margin Levels .....	75
5.7	Other Means of Validation .....	78
5.8	Computational Performance.....	79
6	Conclusion and Outlook .....	81
7	Bibliography .....	85
8	Appendix .....	91
