<b>1 Hydrogen Bonds and Specific Intermolecular Interactions of Nitrogenated and Bio-organic Compounds and the Methodology of their Investigation</b> . . . . .	1
1.1 Some of the Problems of Hydrogen Bonds . . . . .	1
1.2 Inconsistency of the $sp^3$ -Hybridization Model with Respect to Carbon Atom . . . . .	7
1.3 Methodology of Investigation of Specific Interactions of Nitrogenous and Bio-organic Compounds . . . . .	13
References . . . . .	16
<b>2 Specific Intermolecular Interactions of Cyclic Alkylamines and Nitriles</b> . . . . .	21
2.1 The Energies of Hydrogen Bonds and Specific Interactions of Alkylamines . . . . .	21
2.1.1 Liquid Alkylamines . . . . .	21
2.1.2 Saturated and Unsaturated Diamines . . . . .	32
2.2 The Energies of Specific Interactions of Liquid Hydrozines . . . .	41
2.3 The Energies of Specific Interactions of Liquid Diazene, Hydrazone, and Azidoalkyles . . . . .	47
2.4 The Energies of Hydrogen Bonds and Specific Interactions of Nitrides . . . . .	57
2.4.1 Liquid Nitrides . . . . .	57
2.4.2 Dinitriles and Their Derivatives . . . . .	70
2.4.3 (Dimethylamino)Alkyl Nitriles and (Diethylamino) Alkyl nitriles . . . . .	75
2.4.4 Crystalline Cyan Derivative Compounds . . . . .	80
References . . . . .	86
<b>3 Specific Intermolecular Interactions of Cyclic Aromatic Compounds with Nitrogen Atom in Their Functional Groups</b> . . . . .	89
3.1 Energies of Specific Interactions of Cyclic Compounds with Saturated and Unsaturated Hydrocarbon . . . . .	89

3.2	Energies of Specific Intermolecular Interactions of Saturated and Unsaturated Cyclic Amines . . . . .	96
3.3	Energies of Specific Interactions of Compounds with Cyanide Functional Group at Saturated and Unsaturated Hydrocarbon Cycles . . . . .	101
3.4	Energies of Specific Interactions of Azobenzenes and Azabicycloalkanes . . . . .	109
3.5	Energies of Specific Interactions of Aromatic Compounds with Nitrogen Atom in the Functional Group . . . . .	114
3.5.1	Aniline and Its Derivatives . . . . .	114
3.5.2	Crystalline Diaminebenzenes and Naphthylamine . . . . .	124
3.5.3	Phenyl-2-Propylamine and Phenyl-2-Butaneamines . . . . .	126
3.5.4	Amines: The Toluene Derivatives . . . . .	130
3.5.5	Toluidines . . . . .	134
3.5.6	Biphenylamines . . . . .	137
3.5.7	Hydrogen Bonds of Benzaldehyde Imines . . . . .	140
3.6	Energies of Specific Interactions of Liquid Aromatic Cyanobenzenes . . . . .	144
	References . . . . .	153
<b>4</b>	<b>Specific Intermolecular Interactions of Nitrogen Containing Five-Membered Heterocycles . . . . .</b>	<b>155</b>
4.1	Energies of Specific Interactions of Liquid Nitrogenated Hetero Compounds with Hydrocarbon Cycle . . . . .	155
4.2	Energies of Specific Interactions of Liquid Pyrroles . . . . .	161
4.3	Energies of Specific Interactions of Liquid Pentamorous Heterocyclic Compounds with Two Nitrogen Atoms . . . . .	165
4.4	Energies of Specific Interactions and Hydrogen Bonds of Crystalline Pentamorous Heterocyclic Compounds of Nitrogen . . . . .	170
4.5	Energies of Specific Interactions of Crystalline Tetrazoles . . . . .	175
4.6	Energies of Specific Interactions of Liquid 1-Phenyl-pyrazole and 1-Phenyl-imidazole . . . . .	179
4.7	Energies of Specific Interactions of Crystalline Carbazoles . . . . .	181
	References . . . . .	188
<b>5</b>	<b>Specific Intermolecular Interactions of Nitrogen Containing Six-Membered Heterocycles . . . . .</b>	<b>189</b>
5.1	Energies of Specific Interactions of Hexamorous Heterocyclic Compounds with Saturated Hydrocarbon . . . . .	189
5.1.1	Piperidine and Its Derivatives . . . . .	189
5.1.2	Piperazines . . . . .	195
5.1.3	Piperidinonitriles . . . . .	201
5.2	Energies of Specific Interactions of Hexamorous Heterocyclic Compounds . . . . .	201
5.2.1	Hexamorous Heterocyclic Compounds with Unsaturated Hydrocarbon . . . . .	201

5.2.2	Crystalline Pyridines and Bipyridines . . . . .	212
5.2.3	Aminopyridines and Methylaminopyridine . . . . .	215
5.3	Energies of Specific Interactions of Hexamers of Heterocyclic Compounds with Two Nitrogen Atoms . . . . .	222
5.4	Energies of Specific Interactions of Hexamers of Heterocyclic Compounds with Three Nitrogen Atoms . . . . .	226
5.5	Energies of Specific Interactions of Phenyl-pyridines . . . . .	230
5.6	Energies of Specific Interactions of Quinolines and Their Derivative . . . . .	233
5.6.1	Quinoline and Benzoquinolines . . . . .	233
5.6.2	Aminoquinolines . . . . .	237
5.6.3	Dimethylquinolines, Hydroxyquinolines, and Cyanoquinolines . . . . .	240
5.7	Energies of Specific Interactions of Quinoxaline and Their Derivative . . . . .	245
5.7.1	Quinoxaline, Quinazoline, and Phthalazine . . . . .	245
5.7.2	Hydroxyquinoxalines . . . . .	248
5.8	Energies of Specific Interactions of Complicated Heterocyclic Compounds with Nitrogen Atoms . . . . .	249
5.8.1	2-Phenylquinoline, Acridine, and Phenazine . . . . .	249
5.8.2	Dibenzylideneazaine, <i>p</i> -Azoxyanizole, and <i>N</i> -Phenylbenzophenoneimine . . . . .	253
5.9	Energies of Specific Interactions of Acridone, Phenazine- <i>N</i> -oxide, and Quinoxaline-1,4-dioxides . . . . .	254
	References . . . . .	260
<b>6</b>	<b>Specific Intermolecular Interactions of Methoxyamines, Methoxynitriles, and Amides . . . . .</b>	<b>261</b>
6.1	Energies of Specific Interactions of Oximes Methoxy and Ethoxy Compounds . . . . .	261
6.1.1	Methoxy and Ethoxy Amines . . . . .	261
6.1.2	Methoxynitriles . . . . .	268
6.2	Energies of Specific Interactions of Liquid Amides and Its Derivatives . . . . .	271
6.2.1	Formamides . . . . .	271
6.2.2	Acetamides . . . . .	273
6.2.3	Propionamides and Butyroamides . . . . .	281
6.3	Energies of Specific Interactions of Crystalline Amides and Its Derivatives . . . . .	286
6.3.1	Homological series of Acetamides, Propionamides, Amides, and Methyl Amides . . . . .	286
6.3.2	Amides with Unsaturated Ligand . . . . .	294
6.3.3	Benzamides . . . . .	296
6.3.4	Phenylacetamides . . . . .	300
6.3.5	Pyridinecarboxamides . . . . .	306

6.4	Energies of Specific Interactions of Alkylcyanates and Isocyanates . . . . .	309
6.4.1	Alkylcyanates, 2-Cyanoacetamide . . . . .	309
6.4.2	Isocyanates . . . . .	314
6.5	Energies of Specific Interactions of Amides and Imides with Two Carbonyl Groups . . . . .	319
6.6	Energies of Specific Interactions of Crystalline Cyclic Imides . . .	321
6.7	Energies of Specific Interactions of Crystalline $\alpha$ -oxo benzene acetonitrile and Cyanophenones . . . . .	326
	References . . . . .	333
<b>7</b>	<b>Specific Intermolecular Interactions of Nitrogen and Oxygen Containing Cyclic Hydrocarbons . . . . .</b>	<b>335</b>
7.1	Energies of Specific Interactions of Compounds with Pentamorous Heterocycle . . . . .	335
7.1.1	Oxazole, Isoxazoles, and Thiazoles . . . . .	335
7.1.2	Oxazolines, Azetidine, and Aminoisoxazoles . . . . .	338
7.1.3	Energies of Specific Interactions of Crystalline Amides with Peptide Fragments . . . . .	342
7.1.4	Energies of Specific Interactions of Crystalline Amides with Peptide Fragment and Carbonyl Group . . . . .	348
7.2	Energies of Specific Interactions of Compounds with Hexamorous Heterocycles . . . . .	354
7.2.1	Alkylpiperidines and Methoxypyridines . . . . .	354
7.2.2	Energies of Specific Interactions of Liquid Hydroxypyridines . . . . .	355
7.2.3	Energies of Specific Interactions of Uracil and Cytosines . . .	362
7.2.4	Energies of Specific Interactions of Compounds with Peptide's Group of 2-Piperidone and Its Derivatives . . . .	371
7.2.5	Energies of Specific Interactions of Crystalline Pyridine <i>N</i> -Oxides and Pyrazine-1,4-Dioxide . . . . .	380
7.2.6	Energies of Specific Interactions of Crystalline Cyanopyridine <i>N</i> -Oxides and Pyridinecarboxamide <i>N</i> -Oxides . . . . .	383
7.2.7	Energies of Specific Interactions of Crystalline Benzofurazan <i>N</i> -Oxides and Their Derivatives . . . . .	387
	References . . . . .	393
<b>8</b>	<b>Specific Intermolecular Interactions of Amino Alcohols and Their Derivatives . . . . .</b>	<b>395</b>
8.1	The Energies of Hydrogen Bonds and Specific Interactions of Liquid Hydroxylamines . . . . .	395
8.2	The Energies of Hydrogen Bonds and Specific Interactions of Amino Alcohols . . . . .	400
8.2.1	Liquid Aminoethanols and Aminopropanol . . . . .	400
8.2.2	Liquid Cyan Alcohols . . . . .	406

8.2.3	Crystalline Amino Alcohols . . . . .	409
8.2.4	Crystalline Amino Phenols . . . . .	412
8.3	The Energies of Specific Interactions of Liquid Oximes . . . . .	415
8.3.1	Homological Series of Acetaldehyde Oximes . . . . .	415
8.3.2	Homological Series of 2-Propenal Oxime and Octanone's Oximes . . . . .	422
8.3.3	Cyclohexanone Oxime . . . . .	425
8.4	The Energies of Specific Interactions of Liquid Amino-2-Propanone, Amino-1-Phenylethanone, and Amino-1-Phenyl-1-Propanone . . . . .	426
	References . . . . .	433
<b>9</b>	<b>Specific Intermolecular Interactions and Energies of Amino Acids and Esters . . . . .</b>	<b>435</b>
9.1	Energies of Hydrogen Bonds and Specific Interactions of Amino Acids . . . . .	435
9.1.1	Series of Glycine . . . . .	435
9.1.2	Amino Acids with Fragment of Molecule Glycine . . . . .	442
9.1.3	Energies of Specific Interactions and Sublimation Enthalpies of Significant Amino Acids of Protein . . . . .	447
9.1.4	Phenylglycines . . . . .	450
9.2	Energies of Hydrogen Bonds and Specific Interactions of Cyanic Acids . . . . .	455
9.3	Energies of Hydrogen Bonds and Specific Interactions of Aminobenzoic Acids and Heterocyclic Acids . . . . .	458
9.3.1	Benzoic Acids and Aminobenzoic Acids . . . . .	458
9.3.2	Pyridinecarboxylic Acids, Pyridine-3-Carboxylic acid <i>N</i> -Oxide, and Pyrazinecarboxylic Acid . . . . .	473
9.3.3	Pyrolicarboxylic Acids . . . . .	479
9.4	Energies of Hydrogen Bonds and Specific Interactions of Amino Esters . . . . .	480
9.4.1	Liquid Methyl Carbamates and Ammonium Carbamate . . . . .	480
9.4.2	Energies of Specific Interactions of Liquid Amino Ethanoates and Amino Propanoates . . . . .	485
9.4.3	Energies of Specific Interactions of Liquid 1-(Dialkylamino)-2-Propanones . . . . .	492
	References . . . . .	494
<b>10</b>	<b>Specific Intermolecular Interactions and Energies of Compounds with Peptidic Structure . . . . .</b>	<b>497</b>
10.1	Energies of Hydrogen Bonds and Specific Interactions of Simple Peptides . . . . .	497
10.1.1	Compounds with Peptide Fragment of <i>N</i> -Methyl Carbamic Acid Ethyl Ester and Aminogroup of <i>N</i> -Acetyl- <i>N</i> -butylacetamide and $\delta$ -Valerolactam . . . . .	497

10.1.2	Energies of Specific Interactions of Crystalline <i>N</i> -Acetyl-glycineamide, <i>N</i> -Acetyl-L-alanineamide, and <i>N</i> -Acetyl-L-valinamide . . . . .	501
10.1.3	Energies of Hydrogen Bonds and Specific Interactions of (2-Pyridyl)acetamide . . . . .	509
10.2	Correlation of Temperature's Fusion with Energetically Parameters of Small Peptides . . . . .	510
10.3	Hydrogen Bonds and Specific Interactions of Dipeptides . . . . .	516
10.4	Energies of Hydrogen Bonds, Specific Interactions, and the Configurations of Dipeptide Chains . . . . .	521
10.5	Energies of Hydrogen Bonds, Specific Interactions, and the Configurations of Dipeptide Chains of Same Proteins . . . . .	525
10.6	Extrastabilization Effect of Isostructural Methyl Group at Biochemical Compounds and Proteins . . . . .	529
10.7	Specific Interactions at the Secondary Structure of Protein . . . .	535
	References . . . . .	537
