Insect-Derived Enzymes: A Treasure for Industrial Biotechnology and Food Biotechnology	1
Nicole Mika, Holger Zorn and Martin Rühl	
Insect-Derived Chitinases.	19
Hans Merzendorfer	
Cellulases from Insects	51
Rainer Fischer, Raluca Ostafe and Richard M. Twyman	
Optimization of Insect Cell-Based Protein Production Processes: Online Monitoring, Expression Systems, Scale Up	65
Damir Druzinec, Denise Salzig, Alexander Brix, Matthias Kraume, Andreas Vilcinskas, Christian Kollwe and Peter Czermak	
Insect Antenna-Based Biosensors for In Situ Detection of Volatiles . . .	101
Matthias Schott, Christoph Wehrenfennig, Tina Gasch and Andreas Vilcinskas	
Y-Linked Markers for Improved Population Control of the Tephritid Fruit Fly Pest, <i>Anastrepha suspensa</i>	123
Marc F. Schetelig and Alfred M. Handler	
Transgenic Approaches to Western Corn Rootworm Control	135
Kenneth E. Narva, Blair D. Siegfried and Nicholas P. Storer	

***Tribolium castaneum* as a Model for High-Throughput
RNAi Screening** 163
Eileen Knorr, Linda Bingsohn, Michael R. Kanost
and Andreas Vilcinskas

**Aphid-Proof Plants: Biotechnology-Based Approaches
for Aphid Control** 179
Torsten Will and Andreas Vilcinskas
