1	Definition, Classification, and Clinical Presentation of Chronic Radiation Syndrome (CRS) Associated with Total Exposure to External Radiation	1
1.1	Definition of Chronic Radiation Syndrome	1
1.2	Classification of CRS	6
1.3	CRS Clinical Presentation Associated with Total Exposure to External Gamma-Radiation	9
1.4	Late Effects of CRS	14
1.5	Peculiarities of CRS Manifestations in Cases of Internal Exposure	15
1.6	Summary	18
	References	19
2	Epidemiology of Chronic Radiation Syndrome	23
2.1	Releases of Radioactive Waste and Radioecological Situation in the Techa River Basin	23
2.2	A Brief Socioeconomic Characteristics of the Region and the Population of the Techa Riverside Area	26
2.3	Exposure Doses Received by Patients with Chronic Radiation Syndrome	30
2.4	Characterization of Countermeasures	35
2.5	Medical Follow-Up of the Residents of the Techa Riverside Villages	39
2.6	Medical-Dosimetric Database (DB) Maintained at the URCRM	41
2.7	Epidemiology of the Chronic Radiation Syndrome	44
2.8	Summary	51
	References	52
3	Mechanisms Involved in Chronic Radiation Exposure Effects: Pathogenesis of Chronic Radiation Syndrome	55
3.1	The Most Essential Characteristics of Molecular and Cellular Mechanisms Involved in Radiation Effects Development	56
3.1.1	Physicochemical Process of the Interaction Between IR and Biological Tissue	57
3.1.2	Primary Lesions of DNA	61
3.1.3	Cellular Response to Low Dose Rate Radiation	64

3.2	Radioadaptation Under Chronic Exposure to Low-LET IR	69
3.2.1	Molecular Mechanisms of Adaptation	72
3.2.2	Mechanisms of Cell and Tissue Radioadaptation	75
3.2.3	Radioadaptation Mechanisms at the Organismic Level	79
3.3	Tissue Reactions to Chronic Radiation Exposure and Their Role in CRS Pathogenesis	80
3.3.1	General Regularities of Response to Radiation Exposure Manifested by Cells and Tissues	80
3.3.2	Mechanisms of Alteration Development in Organs of Persons with CRS	85
3.3.3	Peculiarities of CRS Pathogenesis in Children	113
3.4	Summary	116
	References	120
4	Pathoanatomy of Chronic Radiation Syndrome During the Period of Its Development and at Recovery Stage	131
4.1	Circulatory System	131
4.2	Central Nervous System	135
4.3	Musculoskeletal System	136
4.4	Endocrine System	136
4.5	Digestive System	137
4.6	Cardiovascular System	139
4.7	Urinary System	141
4.8	Reproductive System	141
4.9	Summary	142
	References	143
5	Clinical Manifestations of Chronic Radiation Syndrome	145
5.1	Period of CRS Development	149
5.1.1	Chronic Radiation Syndrome of Low Severity	149
5.1.2	Chronic Radiation Syndrome of Medium Severity	163
5.2	Clinical Manifestation During the Recovery Period	176
5.2.1	Hematopoietic System	190
5.2.2	Immune System	191
5.2.3	Nervous System	191
5.2.4	Cardiovascular System	193
5.2.5	Skeletal System	195
5.2.6	Digestive System	195
5.2.7	Skin	195
5.2.8	Eye	196
5.3	Health Status in Persons with CRS During the Period of Late Effects Development	197
5.3.1	Demographic Characteristics of Patients Who Have Had CRS	198
5.3.2	Status of Organs and Organ Systems During the Period of Late Effects Development	207

5.4	Characteristic Clinical Features of the CRS in Persons Exposed to Radiation in Early Childhood	233
5.5	Summary.....	240
	References	243
6	Dynamics of Hematopoietic Changes in Persons with CRS.....	247
6.1	Hematopoietic Status in Patients During the Period of CRS Development	247
6.1.1	Peripheral Blood Cell Composition	249
6.1.2	Status of BM Hematopoiesis	254
6.2	Dynamics of Hematopoiesis Recovery in Persons with CRS.....	265
6.2.1	Peripheral Blood Cell Composition	265
6.2.2	Red Bone Marrow Status	271
6.3	Hematopoiesis Status in Patients at the Late Stage of CRS Clinical Course	282
6.3.1	Peripheral Blood Cell Composition	283
6.3.2	Frequency of Chromosome Aberrations and Somatic Mutations in Peripheral Blood Cells	285
6.3.3	Proliferative Activity and Blood Lymphocyte Cell Cycle ..	289
6.3.4	Apoptotic Activity of Peripheral Blood Lymphocytes.....	294
6.4	Summary.....	299
	References	301
7	Diagnosis of Chronic Radiation Syndrome	303
7.1	Basic Principles Applied in Diagnosing CRS.....	304
7.1.1	Clinical Presentation	304
7.1.2	Dose Threshold.....	308
7.1.3	Dynamics of Exposure Dose Rates Registered in Critical Organs	309
7.1.4	Latency Period	309
7.1.5	Individual Radiosensitivity.....	310
7.1.6	Analysis of Non-radiation Factors	311
7.2	Differential Diagnosis of CRS	312
7.2.1	Leukopenia and Neutropenia	313
7.2.2	Anemia	325
7.2.3	Thrombocytopenia	341
7.2.4	Malignant Neoplasms.....	345
7.2.5	Neurological Disorders of Non-radiation Nature.....	349
7.3	Summary.....	357
	References	359
8	Treatment of Persons with CRS	363
8.1	Basic Principles of CRS Treatment	363
8.2	Prospects for Pathogenetic Treatment of CRS	370
8.2.1	Potential Methods of Pathogenetic Therapy of Hematopoiesis Inhibition in CRS	371
8.2.2	Prospects for Treatment of Radiation-Induced Immunosuppression	373

8.2.3	Prospects for Pathogenetic Treatment of Radiation-Induced Neurologic Disorders	375
8.2.4	Approaches to Pathogenetic Treatment of Cardiovascular Disorders	376
8.2.5	Approaches to the Substantiation of Pathogenetic Therapy of Radiation-Induced Changes in the Digestive System . . .	376
8.2.6	Treatment of Endocrine Disorders in CRS	377
8.2.7	Therapy of Radiation-Induced Changes in the Musculoskeletal System	377
8.3	Summary	377
