

Contents

1	Multiagent Scheduling Fundamentals	1
1.1	Main Concepts and Notions	1
1.1.1	Basic Definitions of Multiagent Scheduling	2
1.1.2	Multiagent Scheduling Applications	3
1.2	Multiagent Scheduling Problem Description	6
1.2.1	Job Characteristics	6
1.2.2	Machine Environment	7
1.2.3	Optimality Criteria	8
1.3	Solution Approaches to Multiagent Scheduling Problems	10
1.3.1	Feasibility Problem	10
1.3.2	Linear Combination of Criteria	10
1.3.3	Epsilon-Constraint Approach	11
1.3.4	Lexicographic Order	11
1.3.5	Pareto Set Enumeration	12
1.3.6	Counting	13
1.4	Classification of Multiagent Scheduling Problems	13
1.4.1	Competing Agents	13
1.4.2	Interfering Sets	13
1.4.3	Multicriteria Optimization	13
1.4.4	Nondisjoint Sets	14
1.5	Notation of Multiagent Scheduling Problems	14
1.6	Examples of Single- and Multiagent Scheduling Problems	16
1.7	Bibliographic Remarks	22
2	Problems, Algorithms and Complexity	23
2.1	Basic Notions of Complexity Theory	23
2.2	NP-Completeness and NP-Hardness	25
2.2.1	NP-Completeness	25
2.2.2	NP-Hardness	26

2.3	Enumeration and Exact Algorithms	28
2.3.1	Dynamic Programming	28
2.3.2	Branch-and-Bound Algorithms.....	30
2.3.3	Mathematical Programming Algorithms.....	32
2.4	Approximation Algorithms	36
2.4.1	Problems with One Objective Function	36
2.4.2	Problems with Multiple Objective Functions	38
2.5	Approximation Schemes	39
2.5.1	Simplifying	40
2.5.2	Solving	41
2.5.3	Translating Back	42
2.6	Relaxation of Problems.....	43
2.6.1	Linear Programming Relaxation	43
2.6.2	Lagrangian Relaxation	44
2.7	Complexity of Basic Scheduling Problems.....	48
2.7.1	Single Machine Scheduling Problems	48
2.7.2	Multimachine Scheduling Problems	52
2.7.3	Reductions Between Scheduling Problems	53
2.8	Bibliographic Remarks	55
3	Single Machine Problems	57
3.1	Functions $f_{\max}, f_{\max}$	57
3.1.1	Epsilon-Constraint Approach.....	58
3.1.2	Computing the Pareto Set.....	65
3.1.3	Linear Combination.....	67
3.2	Functions $C_{\max}, \sum C_j$	71
3.2.1	Epsilon-Constraint Approach.....	72
3.2.2	Computation of the Pareto Set.....	73
3.2.3	Linear Combination.....	74
3.3	Functions $f_{\max}, \sum C_j$	74
3.3.1	Epsilon-Constraint Approach.....	74
3.3.2	Computing the Pareto Set.....	77
3.3.3	Linear Combination.....	80
3.4	Functions $\sum w_j C_j, C_{\max}$	80
3.4.1	Epsilon-Constraint Approach.....	81
3.4.2	Computing the Pareto Set.....	87
3.4.3	Linear Combination.....	87
3.4.4	Approximation	91
3.5	Functions $\sum w_j C_j, L_{\max}$	92
3.5.1	Epsilon-Constraint Approach.....	92
3.5.2	Computing the Pareto Set.....	101
3.5.3	Linear Combination	102
3.6	Functions $\sum w_j C_j, f_{\max}$	102
3.7	Functions $\sum U_j, f_{\max}$	102
3.7.1	Epsilon-Constraint Approach.....	103
3.7.2	Computing the Pareto Set and Linear Combination.....	107

3.8	Functions $\sum T_j, f_{\max}$	108
3.8.1	Epsilon-Constraint Approach.....	108
3.9	Functions $\sum C_j, \sum C_j$	109
3.9.1	Epsilon-Constraint Approach.....	110
3.9.2	Computing the Pareto Set.....	114
3.9.3	Linear Combination.....	115
3.10	Functions $\sum w_j C_j, \sum w_j C_j$	116
3.10.1	Epsilon-Constraint Approach.....	116
3.10.2	Approximation	121
3.10.3	Computing the Pareto Set.....	126
3.10.4	Linear Combination.....	126
3.11	Functions $\sum U_j, \sum C_j$	126
3.11.1	Epsilon-Constraint Approach.....	126
3.11.2	Computing the Pareto Set.....	127
3.11.3	Linear Combination.....	127
3.12	Functions $\sum T_j, \sum C_j$	130
3.13	Functions $\sum w_j C_j, \sum U_j$	130
3.13.1	Epsilon-Constraint Approach.....	131
3.13.2	Linear Combination.....	131
3.14	Functions $\sum U_j, \sum U_j$	131
3.14.1	Epsilon-Constraint Approach.....	132
3.14.2	Computing the Pareto Set and Linear Combination	135
3.15	Functions $\sum w_j U_j, \sum w_j U_j$	136
3.15.1	Epsilon-Constraint Approach.....	136
3.15.2	Computing the Pareto Set.....	138
3.16	Tables.....	138
3.17	Bibliographic Remarks	141
4	Batching Scheduling Problems	147
4.1	Introduction	147
4.2	Two-Agent s-Batching Problems	150
4.2.1	Functions $f_{\max}, f_{\max}$	151
4.2.2	Functions $C_{\max}, C_{\max}$	153
4.2.3	Functions $C_{\max}, L_{\max}$	155
4.2.4	Functions $f_{\max}, \sum C_j$	160
4.2.5	Functions $f_{\max}, \sum w_j U_j$	163
4.2.6	Functions $C_{\max}, \sum C_j$	167
4.2.7	Functions $\sum C_j, \sum C_j$	170
4.2.8	Functions $\sum w_j U_j, \sum w_j U_j$	172
4.3	Two-Agent P-Batching Problems	175
4.3.1	Preliminary Results	175
4.3.2	Functions $f_{\max}, f_{\max}$	176
4.3.3	Functions $C_{\max}, C_{\max}$	178
4.3.4	Functions $C_{\max}, L_{\max}$	179

4.3.5	Functions $f_{\max}, \sum f_j$	182
4.3.6	Functions $\sum f_j, \sum f_j$	183
4.4	Tables	185
4.5	Bibliographic Remarks	186
4.5.1	Serial Batching Problems	187
4.5.2	Parallel Batching Problems	187
5	Parallel Machine Scheduling Problems	189
5.1	Preemptive Jobs	189
5.1.1	Functions $f_{\max}, f_{\max}$	190
5.1.2	Functions $f_{\max}, \sum C_j$	194
5.1.3	Functions $\sum f_j, \sum f_j$	196
5.2	Non-preemptive Jobs with Arbitrary Processing Times	197
5.2.1	Preliminary Results	197
5.2.2	Functions $C_{\max}, C_{\max}$	198
5.2.3	Functions $C_{\max}, \sum C_j$	200
5.2.4	Functions $\sum C_j, \sum C_j$	205
5.3	Non-preemptive Jobs with Identical Processing Times	206
5.3.1	Functions $f_{\max}, f_{\max}$	206
5.3.2	Functions $f_{\max}, C_{\max}$	208
5.3.3	Functions $C_{\max}, C_{\max}$	209
5.3.4	Functions $L_{\max}, C_{\max}$	209
5.3.5	Functions $\sum f_j, C_{\max}$	210
5.3.6	Functions $\sum U_j, C_{\max}$	210
5.4	Tables	212
5.5	Bibliographic Remarks	212
5.5.1	Preemptive Jobs	212
5.5.2	Non-preemptive Jobs with Arbitrary Processing Times	214
5.5.3	Non-preemptive Jobs with Identical Processing Times	214
6	Scheduling Problems with Variable Job Processing Times	217
6.1	Introduction	217
6.1.1	Main Forms of Variable Job Processing Times	218
6.1.2	Notation for Variable Job Scheduling Problems	224
6.1.3	Basic Results on Variable Job Scheduling	227
6.1.4	Examples of Variable Job Scheduling Problems	233
6.2	Two-Agent Time-Dependent Job Scheduling Problems	239
6.2.1	Proportional Deteriorating Job Processing Times	239
6.2.2	Proportional-Linear Deteriorating Job Processing Times	244
6.2.3	Linear Deteriorating Job Processing Times	245
6.2.4	Proportional-Linear Shortening Job Processing Times	247
6.3	Two-Agent Position-Dependent Job Scheduling Problems	248
6.3.1	Log-Linear Position-Dependent Job Processing Times with Learning Effect	248

6.3.2	Log-Linear Position-Dependent Job Processing Times with Learning and Ageing Effects	250
6.3.3	Linear Position-Dependent Job Processing Times with Learning and Ageing Effects	251
6.3.4	Past-Sequence-Dependent Job Processing Times with Ageing Effect	251
6.4	Two-Agent Controllable Job Scheduling Problems	253
6.4.1	Linear Controllable Job Processing Times with the Total Compression Cost Criterion	253
6.4.2	Linear Controllable Job Processing Times with Other Criteria Than the Total Compression Cost	255
6.5	Tables	256
6.6	Bibliographic Remarks	258
6.6.1	Time-Dependent Job Scheduling Problems	258
6.6.2	Position-Dependent Job Scheduling Problems	259
6.6.3	Controllable Job Scheduling Problems	260
