1	Introduction	1
1.1	Present Study on Non-Fourier Heat Conduction	1
1.2	Present Theoretical Models	3
1.2.1	C-V Model	3
1.2.2	Hyperbolic Two-Step Model	4
1.2.3	Parabolic Two-Step Model	5
1.2.4	Phonon Kinetic Model	5
1.2.5	Dual-Phase Lag Model	6
1.3	Present Experimental Study of Heat Conduction in Metallic Nanofilms	7
1.3.1	Experimental Study in Unsteady States	7
1.3.2	Experimental Study in Steady States	11
1.4	Conclusions	14
	References	15
2	Thermomass Theory for Non-Fourier Heat Conduction	21
2.1	Definition of Thermomass and the State Equation of Thermon Gas	21
2.1.1	Definition of Thermomass and Themon Gas	21
2.1.2	State Equation of Thermon Gas in Ideal Gas	24
2.1.3	State Equation of Thermon Gas in Dielectrics	25
2.1.4	State Equation of Thermon Gas in Metals	26
2.1.5	Unified State Equation of Thermon Gas	29
2.2	Non-Fourier Heat Conduction Equation in Unsteady States	30
2.2.1	Governing Equation of Motion of Thermon Gas	30
2.2.2	General Heat Conduction Equation	31
2.2.3	Two-Step Thermomass Model for Metals	33
2.2.4	Numerical Simulation Examples	34
2.3	Non-Fourier Heat Conduction Equation in Steady States	42
2.4	Heat Flow Choking Phenomenon	44
2.5	Conclusions	52
	References	53

3	Experimental Investigation of Thermal Wave and Temperature Wave	55
3.1	Principles of Femtosecond Laser Thermoreflectance System. . .	55
3.1.1	Experimental Principle.	55
3.1.2	Experimental Setup.	58
3.2	Thermal Wave and Temperature Wave in Metallic Nanofilms . .	62
3.3	Measurement of Temperature Wave in Metallic Nanofilms	66
3.4	Electron–Phonon Coupling Factor and Interfacial Thermal Resistance	69
3.5	Conclusions	79
	References	80
4	Experimental Proof of Steady-State Non-Fourier Heat Conduction	83
4.1	Electrical and Thermal Conductivities of Metallic Nanofilms . .	83
4.1.1	Direct Current Heating Experiment of Metallic Nanofilms	83
4.1.2	Electrical Conductivity	89
4.1.3	Thermal Conductivity	93
4.1.4	Break Down of Wiedemann–Franz Law at Low Temperatures.	97
4.2	Experimental Proof of Steady Non-Fourier Heat Conduction . .	101
4.2.1	Experimental Principle.	101
4.2.2	Experimental Result and Analysis.	101
4.3	Conclusions	108
	References	109
5	Conclusions	111
