

Table of Contents

Vibrational Error Extraction Method Based on Wavelet Technique	1
<i>Loay Alkafafi, Carsten Hamm, and Tomas Sauer</i>	
A Mathematical Model for Extremely Low Dose Adaptive Computed Tomography Acquisition	13
<i>Oren Barkan, Amir Averbuch, Shai Dekel, and Yaniv Tenzer</i>	
Approximation of Implicit Blends by Canal Surfaces of Low Parameterization Degree	34
<i>Michal Bizzarri and Miroslav Lávička</i>	
Exploiting the Implicit Support Function for a Topologically Accurate Approximation of Algebraic Curves	49
<i>Eva Blažková and Zbyněk Šír</i>	
Non-regular Surface Approximation	68
<i>Mira Bozzini, Licia Lenarduzzi, and Milvia Rossini</i>	
Piecewise Rational Parametrizations of Canal Surfaces	88
<i>Heidi E.I. Dahl</i>	
Macro-element Hierarchical Riesz Bases	112
<i>Oleg Davydov and Wee Ping Yeo</i>	
Generalized Metric Energies for Continuous Shape Deformation	135
<i>Janick Martinez Esturo, Christian Rössl, and Holger Theisel</i>	
Least Squares Fitting of Harmonic Functions Based on Radon Projections	158
<i>Irina Georgieva, Clemens Hofreither, and Rumen Uluchev</i>	
Generating Functions for Uniform B-Splines	172
<i>Ron Goldman</i>	
Planar Parametrization in Isogeometric Analysis	189
<i>Jens Gravesen, Anton Evgrafov, Dang-Manh Nguyen, and Peter Nørtoft</i>	
Realistic Plant Modeling from Images Based on Analysis-by-Synthesis	213
<i>Jérôme Guénard, Géraldine Morin, Frédéric Boudon, and Vincent Charvillat</i>	

Hermite Interpolation with Rational Splines with Free Weights	230
<i>Carsten Hanm, Tomas Sauer, and Florian Zimmermann</i>	
Direct Pixel-Accurate Rendering of Smooth Surfaces	238
<i>Jon Hjelmervik</i>	
Non-uniform Interpolatory Subdivision Based on Local Interpolants of Minimal Degree	248
<i>Kęstutis Karčiauskas and Jörg Peters</i>	
Representation of Motion Spaces Using Spline Functions and Fourier Series	265
<i>Thomas Kronfeld, Jens Fankhänel, and Guido Brunnett</i>	
Bilinear Clifford-Bézier Patches on Isotropic Cyclides	283
<i>Rimvydas Krasauskas, Severinas Zubė, and Salvatore Cacciola</i>	
Algorithms and Data Structures for Truncated Hierarchical B-Splines	304
<i>Gábor Kiss, Carlotta Giannelli, and Bert Jüttler</i>	
The LIR Space Partitioning System Applied to Cartesian Grids	324
<i>Sven Linden, Hans Hagen, and Andreas Wiegmann</i>	
Local Hierarchical h -Refinements in IgA Based on Generalized B-Splines	341
<i>Carla Manni, Francesca Pelosi, and Hendrik Speleers</i>	
Exploring Matrix Generation Strategies in Isogeometric Analysis	364
<i>Angelos Mantzaflaris and Bert Jüttler</i>	
Commutator Estimate for Nonlinear Subdivision	383
<i>Peter Oswald and Tatiana Shingel</i>	
Joining Primal/Dual Subdivision Surfaces	403
<i>Sergey Podkorytov, Christian Gentil, Dmitry Sokolov, and Sandrine Lanquetin</i>	
Reparametrization and Volume Mesh Generation for Computational Fluid Dynamics Using Modified Catmull-Clark Methods	425
<i>Michael Rom and Karl-Heinz Brakhage</i>	
A Theoretical Analysis of an Improved Rational Scheme for Spherical Camera Motions	442
<i>Maria Lucia Sampoli, Alessandra Sestini, Gašper Jaklič, and Emil Žagar</i>	
Construction and Analysis of Zone-Dependent Interpolatory/ Non-interpolatory Stochastic Subdivision Schemes for Non-regular Data	456
<i>Xiaoyun Si, Jean Baccou, and Jacques Liandrato</i>	

Deriving Novel Formulas and Identities for the Bernstein Basis Functions and Their Generating Functions	471
<i>Yilmaz Simsek</i>	
Efficient Pixel-Accurate Rendering of Animated Curved Surfaces	491
<i>Young In Yeo, Sagar Bhandare, and Jörg Peters</i>	
Author Index	511
