

Inhaltsverzeichnis

1	Keynote 1 Next Generation Access/Backhaul Based on ITU G.989, NG-PON2 9	
	K. Grobe, ADVA Optical Networking SE, Martinsried	
2	Keynote 2 Optical Communication Links for Aeronautical- and Space-Applications 15	
	C. Fuchs, F. Moll, C. Schmidt, Deutsches Zentrum für Luft- und Raumfahrt e.V., Wessling	
3	FMC traffic model for aggregation networks 23	
	C. Behrens, R. Hülsermann, D. Breuer, Telekom Innovation Laboratories, Berlin	
4	Investigation of Switching Times in Dynamic Optical Networks with Regard to Physical Constraints 31	
	D. Schenk, P. Krummrich, Technische Universität Dortmund, Lehrstuhl für Hochfrequenztechnik	

Session: Netzarchitekturen und -optimierung

Hans-Joachim Grallert

5	Multi-layer Resilience in Deutsche Telekom's IP Core and Aggregation Network 36	
	M. Gunkel, M. Horneffer, Deutsche Telekom Technik GmbH, Darmstadt	
6	Demonstrating Energy-Efficiency Improvements in Load-Adaptive Dynamic Multilayer Optical Networks 42	
	M. Schlosser, Fraunhofer Heinrich-Hertz-Institut, Berlin; A. Werner, Konrad-Zuse-Zentrum für Informationstechnik Berlin (ZIB), Berlin; R. Schlenk, Alcatel-Lucent Deutschland AG, Nürnberg; T. Jungel, Berlin Institute for Software Defined Networks (BISDN) GmbH, Berlin; C. Lange, Deutsche Telekom AG, Berlin	
7	Redefining Optical Networks with Software Defined Networking Intelligence 47	
	A. Iselt, Coriant GmbH, München	
8	Opening up the optical Network Architecture 51	
	G. Grammel, Juniper Networks, München; S. Liu, Juniper Networks, Sunnyvale CA, USA	

Session: Access

Kristof Obermann

9	Long Reach Passive Optical Network Architectures 53	
	R. Bonk, H. Schmuck, W. Pöhlmann, T. Pfeiffer, Alcatel-Lucent Deutschland AG, Bell Labs, Stuttgart	
10	Novel WDM-PON System with Shared Wavelength Locking and Full C-Band Tunability ... 58	
	S. Pachnicke, M. Lawin, M. Eiselt, ADVA Optical Networking SE, Meiningen; J. Zhu, A. Wonfor, R. Penty, I. H. White, University of Cambridge, UK; R. Cush, R. Turner, P. Firth, M. Wale, Oclaro Technology Ltd., Caswell, Towcester, Northamptonshire, UK; J.-P. Elbers, ADVA Optical Networking SE, München	

11	Digital signal processing for coherent UDWDM passive optical networks	63
	J. K. Fischer, R. Elschner, F. Frey, J. Hilt, C. Kottke, C. Schubert, Fraunhofer Heinrich-Hertz-Institut, Berlin; Z. Wu, D. Schmidt, B. Lankl, Universität der Bundeswehr, Neubiberg	
12	Real-time OFDM for Flexible Optical Access at 64 Gbit/s	70
	L. Fernandez del Rosal, K. Habel, Fraunhofer Heinrich-Hertz-Institut, Berlin	

Session: Modulation

Helmut Grießer

13	Generation of almost-ideally, sinc-shaped Nyquist pulse sequences with arbitrary bandwidth and repetition rate	75
	T. Schneider, N. Wenzel, S. Preußler, Hochschule für Telekommunikation Leipzig	
14	Estimates of Constrained Coded Modulation Capacity for Optical Networks	81
	T. Fehenberger, F. Kristl, N. Hanik, Technische Universität München; C. Behrens, A. Gladisch, Telekom Innovation Laboratories, Berlin; A. Ehrhardt, Deutsche Telekom Technik GmbH, FMED 24, Berlin	
15	Channel memory length reduction in MDM transmission links by differential mode delay management	87
	S. Warm, G. Rademacher, K. Petermann, Technische Universität Berlin	
16	Power Efficient Multidimensional Constellations	89
	J. Leibrich, W. Rosenkranz, Christian-Albrechts-Universität zu Kiel	
17	Discrete Multitone Transmission in the Presence of Optical Noise, Chromatic Dispersion and Narrow-band Optical Filtering	95
	A. Dochhan, M. Eiselt, ADVA Optical Networking SE, Meiningen; H. Griesser, J.-P. Elbers, ADVA Optical Networking SE, Martinsried/München; L. Nadal, M. S. Moreolo, CTTC, Castelldefels, Spain	
18	A comparison of one- and higher-dimensional modulation schemes for optical Gigabit transmission	100
	M. Schüppert, C. Bunge, Hochschule für Telekommunikation Leipzig; R. Kruglov, Polymer Optical Fiber Application Center (POF-AC), TH Nürnberg	

Session: Codierung, MIMO

Jörg-Peter Elbers

19	Combined Precoding and Volterra Equalization for the Mitigation of Fiber-Optic Nonlinear Channel Impairments	108
	R. Rath, J. von Hoyningen-Huene, W. Rosenkranz, Christian-Albrechts-Universität zu Kiel	
20	Polar Codes for Low-Complexity Forward Error Correction in Optical Access Networks	113
	Z. Wu, B. Lankl, Universität der Bundeswehr München, Neubiberg	
21	PU-CMA-QAM based MIMO Equalization for Digital PMD Compensation in PDM-16-QAM Receivers	121
	M. Panhwar, D. Sandel, S. Hussin, R. Noé, Universität Paderborn; C. Wördehoff, Bielefeld University, Bielefeld	

22	Experimental Description of Multimode MIMO Channels utilizing Optical Couplers	125
	A. Sandmann, A. Ahrens, S. Lochmann, Hochschule Wismar	

Session: Systeme
 Andreas Leven

23	On the Design Trade-Offs of ROADM Architectures	131
	B. Clouet, R. Schimpe, A. Schex, Coriant GmbH, München	
24	Architectures of Coherent Receivers for Optical Quantum Communications	135
	S. Kleis, C. G. Schäffer, Helmut-Schmidt-Universität Hamburg	
25	Vielseitige endlose optische Polarisationsregelung	140
	B. Koch, R. Noé, V. Mirvoda, D. Sandel, Universität Paderborn	

Session: Komponenten
 Peter Krummrich

26	Coarse WDM: A way to increase the transmission capacity of 1 mm diameter step-index polymer optical fiber	148
	M. Jončić, M. Haupt, U. H. P. Fischer, Harz University of Applied Sciences, Wernigerode	
27	Design of High-Speed Mixed-Signal Circuits in 65 nm and 28 nm CMOS Technology for Optical Transmitters with Data Rates beyond 100 Gbit/s per Wavelength	152
	M. Grözing, T. Veigel, H. Huang, J. Briem, J. Zhang, M. Berroth, Universität Stuttgart	
28	Erzeugung hochqualitativer Trägerwellen für zukünftige, hochbitratige THz-Funkstrecken	156
	S. Preußler, T. Schneider, Hochschule für Telekommunikation Leipzig; R.-P. Braun, Deutsche Telekom AG, Berlin; M. Grigat, Deutsche Telekom AG, Darmstadt
