**9 Simulation of Interfacial Behaviors by Lattice Boltzmann Method.** . . . . . 301

9.1 Fundamentals of Lattice Boltzmann Method . . . . . 303

9.1.1 From Lattice Gas Method to Lattice Boltzmann Method. . . . . 303

9.1.2 Basic Equations of Lattice Boltzmann Method . . . . . 304

9.1.3 Lattice Boltzmann Method for Heat Transfer Process. . . . . 311

9.1.4 Lattice Boltzmann Method for Mass Transfer Process. . . . . 312

9.2 Simulation of Solute Diffusion from Interface to the Bulk Liquid . . . . . 313

9.3 Fixed Point Interfacial Disturbance Model . . . . . 315

9.3.1 Single Local Point of Disturbance at Interface. . . . . 316

9.3.2 Influence of Physical Properties on the Solute Diffusion from Interface . . . . . 317

9.3.3 Uniformly Distributed Multipoints of Disturbance at Interface . . . . . 321

9.3.4 Non-Uniformly Distributed Multipoints of Disturbance at Interface . . . . . 323

9.4 Random Disturbance Interfacial Model. . . . . 324

9.5 Self-Renewable Interface Model . . . . . 330

9.6 Summary . . . . . 335
