

Contents

Introduction to Sodium Channels	1
Colin H. Peters and Peter C. Ruben	
The Voltage Sensor Module in Sodium Channels	7
James R. Groome	
Slow Inactivation of Na⁺ Channels	33
Jonathan Silva	
The Role of Non-pore-Forming β Subunits in Physiology and Pathophysiology of Voltage-Gated Sodium Channels	51
Jeffrey D. Calhoun and Lori L. Isom	
Altered Sodium Channel Gating as Molecular Basis for Pain: Contribution of Activation, Inactivation, and Resurgent Currents	91
Angelika Lampert, Mirjam Eberhardt, and Stephen G. Waxman	
Regulation/Modulation of Sensory Neuron Sodium Channels	111
Mohamed Chahine and Michael E. O'Leary	
The Role of Late I_{Na} in Development of Cardiac Arrhythmias	137
Charles Antzelevitch, Vladislav Nesterenko, John C. Shryock, Sridharan Rajamani, Yejia Song, and Luiz Belardinelli	
Proton Modulation of Cardiac I_{Na}: A Potential Arrhythmogenic Trigger	169
David K. Jones and Peter C. Ruben	
Probing Gating Mechanisms of Sodium Channels Using Pore Blockers	183
Marcel P. Goldschen-Ohm and Baron Chanda	
Animal Toxins Influence Voltage-Gated Sodium Channel Function	203
John Gilchrist, Baldomero M. Olivera, and Frank Bosmans	
Ubiquitylation of Voltage-Gated Sodium Channels	231
Cédric J. Laedermann, Isabelle Decosterd, and Hugues Abriel	

Pharmacological Insights and Quirks of Bacterial Sodium Channels . . .	251
Ben Corry, Sora Lee, and Christopher A. Ahern	
Bacterial Sodium Channels: Models for Eukaryotic Sodium and Calcium Channels	269
Todd Scheuer	
Index	293
