

Table of Contents

Complexity 1

Conjugacy in Baumslag's Group, Generic Case Complexity, and Division in Power Circuits	1
<i>Volker Diekert, Alexei G. Myasnikov, and Armin Weiß</i>	
Hierarchical Complexity of 2-Clique-Colouring Weakly Chordal Graphs and Perfect Graphs Having Cliques of Size at Least 3	13
<i>Helio B. Macêdo Filho, Raphael C.S. Machado, and Celina M.H. Figueiredo</i>	
The Computational Complexity of the Game of Set and Its Theoretical Applications	24
<i>Michael Lampis and Valia Mitsou</i>	

Complexity 2

Independent and Hitting Sets of Rectangles Intersecting a Diagonal Line	35
<i>José R. Correa, Laurent Feuilloley, and José A. Soto</i>	
Approximating Vector Scheduling: Almost Matching Upper and Lower Bounds	47
<i>Nikhil Bansal, Tjark Vredeveld, and Ruben van der Zwaan</i>	
False-Name Manipulation in Weighted Voting Games Is Hard for Probabilistic Polynomial Time	60
<i>Anja Rey and Jörg Rothe</i>	
A Natural Generalization of Bounded Tree-Width and Bounded Clique-Width	72
<i>Martin Fürer</i>	

Computational Geometry 1

Optimal Algorithms for Constrained 1-Center Problems	84
<i>Luis Barba, Prosenjit Bose, and Stefan Langerman</i>	
A Randomized Incremental Approach for the Hausdorff Voronoi Diagram of Non-crossing Clusters	96
<i>Panagiotis Cheilaris, Elena Khramtcova, Stefan Langerman, and Evanthia Papadopoulou</i>	

Upper Bounds on the Spanning Ratio of Constrained Theta-Graphs	108
<i>Prosenjit Bose and André van Renssen</i>	

Computing the L_1 Geodesic Diameter and Center of a Simple Polygon in Linear Time	120
<i>Sang Won Bae, Matias Korman, Yoshio Okamoto, and Haitao Wang</i>	

Graph Drawing

The Planar Slope Number of Subcubic Graphs	132
<i>Emilio Di Giacomo, Giuseppe Liotta, and Fabrizio Montecchiani</i>	

Smooth Orthogonal Drawings of Planar Graphs	144
<i>Muhammad Jawaherul Alam, Michael A. Bekos, Michael Kaufmann, Philipp Kindermann, Stephen G. Kobourov, and Alexander Wolff</i>	

Drawing HV -Restricted Planar Graphs	156
<i>Stéphane Durocher, Stefan Felsner, Saeed Mehrabi, and Debajyoti Mondal</i>	

Periodic Planar Straight-Frame Drawings with Polynomial Resolution	168
<i>Luca Castelli Aleardi, Éric Fusy, and Anatolii Kostrygin</i>	

Automata

A Characterization of Those Automata That Structurally Generate Finite Groups	180
<i>Ines Klimann and Matthieu Picantin</i>	

Linear Grammars with One-Sided Contexts and Their Automaton Representation	190
<i>Mikhail Barash and Alexander Okhotin</i>	

Computability

On the Computability of Relations on λ -Terms and Rice's Theorem - The Case of the Expansion Problem for Explicit Substitutions	202
<i>Edward Hermann Haeusler and Mauricio Ayala-Rincón</i>	

Computing in the Presence of Concurrent Solo Executions	214
<i>Maurice Herlihy, Sergio Rajsbbaum, Michel Raynal, and Julien Stainer</i>	

Algorithms on Graphs

Combining All Pairs Shortest Paths and All Pairs Bottleneck Paths Problems	226
<i>Tong-Wook Shinn and Tadao Takaoka</i>	
(Total) Vector Domination for Graphs with Bounded Branchwidth	238
<i>Toshimasa Ishii, Hirotaka Ono, and Yushi Uno</i>	
Computing the Degeneracy of Large Graphs	250
<i>Martin Farach-Colton and Meng-Tsung Tsai</i>	

Computational Geometry 2

Approximation Algorithms for the Geometric Firefighter and Budget Fence Problems	261
<i>Rolf Klein, Christos Levcopoulos, and Andrzej Lingas</i>	
An Improved Data Stream Algorithm for Clustering	273
<i>Sang-Sub Kim and Hee-Kap Ahn</i>	
Approximation Algorithms for the Gromov Hyperbolicity of Discrete Metric Spaces	285
<i>Ran Duan</i>	
A $(7/2)$ -Approximation Algorithm for Guarding Orthogonal Art Galleries with Sliding Cameras	294
<i>Stephane Durocher, Omrit Filtser, Robert Fraser, Ali D. Mehrabi, and Saeed Mehrabi</i>	

Algorithms

Helly-Type Theorems in Property Testing	306
<i>Sourav Chakraborty, Rameshwar Pratap, Sasanka Roy, and Shubhangi Saraf</i>	
New Bounds for Online Packing LPs	318
<i>Matthias Englert, Nicolaos Matsakis, and Marcin Mucha</i>	
Improved Minmax Regret 1-Center Algorithms for Cactus Networks with c Cycles	330
<i>Binay Bhattacharya, Tsunehiko Kameda, and Zhao Song</i>	
Collision-Free Network Exploration	342
<i>Jurek Czyzowicz, Dariusz Dereniowski, Leszek Gąsieniec, Rafł Klasing, Adrian Kosowski, and Dominik Pająk</i>	

Random Structures

Powers of Hamilton Cycles in Pseudorandom Graphs 355
Peter Allen, Julia Böttcher, Hiệp Hàn, Yoshiharu Kohayakawa, and Yury Person

Local Update Algorithms for Random Graphs 367
Philippe Duchon and Romaric Duvignau

Odd Graphs Are Prism-Hamiltonian and Have a Long Cycle 379
Felipe De Campos Mesquita, Leticia Rodrigues Bueno, and Rodrigo De Alencar Hausen

Relatively Bridge-Addable Classes of Graphs 391
Colin McDiarmid and Kerstin Weller

Complexity on Graphs 1

$O(n)$ Time Algorithms for Dominating Induced Matching Problems 399
Min Chih Lin, Michel J. Mizrahi, and Jayme L. Szwarcfiter

Coloring Graph Powers: Graph Product Bounds and Hardness
of Approximation 409
Parinya Chalermsook, Bundit Laekhanukit, and Danupon Nanongkai

Convexity in Partial Cubes: The Hull Number 421
Marie Albenque and Kolja Knauer

Connected Greedy Colourings 433
Fabrizio Benevides, Victor Campos, Mitre Dourado, Simon Griffiths, Robert Morris, Leonardo Sampaio, and Ana Silva

Analytic Combinatorics

On the Number of Prefix and Border Tables 442
Julien Clément and Laura Giambruno

Probabilities of 2-Xor Functions 454
Élie de Panafieu, Danièle Gardy, Bernhard Gittenberger, and Markus Kuba

Equivalence Classes of Random Boolean Trees and Application
to the Catalan Satisfiability Problem 466
Antoine Genitrini and Cécile Mailler

Analytic and Enumerative Combinatorics

The Flip Diameter of Rectangulations and Convex Subdivisions	478
<i>Eyal Ackerman, Michelle M. Allen, Gill Barequet, Maarten Löffler, Joshua Mermelstein, Diane L. Souvaine, and Csaba D. Tóth</i>	
Weighted Staircase Tableaux, Asymmetric Exclusion Process, and Eulerian Type Recurrences	490
<i>Paweł Hitczenko and Svante Janson</i>	
Counting and Generating Permutations Using Timed Languages	502
<i>Nicolas Basset</i>	

Complexity on Graphs 2

Semantic Word Cloud Representations: Hardness and Approximation Algorithms	514
<i>Lukas Barth, Sara Irina Fabrikant, Stephen G. Kobourov, Anna Lubiw, Martin Nöllenburg, Yoshio Okamoto, Sergey Pupyrev, Claudio Squarcella, Torsten Ueckerdt, and Alexander Wolff</i>	
The Complexity of Homomorphisms of Signed Graphs and Signed Constraint Satisfaction	526
<i>Florent Foucaud and Reza Naserasr</i>	
Complexity of Coloring Graphs without Paths and Cycles	538
<i>Pavol Hell and Shenwei Huang</i>	

Approximation Algorithms

Approximating Real-Time Scheduling on Identical Machines	550
<i>Nikhil Bansal, Cyriel Ruten, Suzanne van der Ster, Tjark Vredeveld, and Ruben van der Zwaan</i>	
Integrated Supply Chain Management via Randomized Rounding	562
<i>Lehilton L.C. Pedrosa and Maxim Sviridenko</i>	
The Online Connected Facility Location Problem	574
<i>Mário César San Felice, David P. Williamson, and Orlando Lee</i>	
Multiply Balanced k -Partitioning	586
<i>Amihoud Amir, Jessica Fidler, Robert Krauthgarner, Liam Roditty, and Oren Sar Shalom</i>	
On Some Recent Approximation Algorithms for MAX SAT	598
<i>Matthias Poloczek, David P. Williamson, and Anke van Zuylen</i>	

Analysis of Algorithms

Packet Forwarding Algorithms in a Line Network	610
<i>Antonios Antoniadis, Neal Barcelo, Daniel Cole, Kyle Fox, Benjamin Moseley, Michael Nugent, and Kirk Pruhs</i>	
Survivability of Swarms of Bouncing Robots	622
<i>Jurek Czyzowicz, Stefan Dobrev, Evangelos Kranakis, and Eduardo Pacheco</i>	
Emergence of Wave Patterns on Kadanoff Sandpiles	634
<i>Kévin Perrot and Éric Rémila</i>	

Computational Algebra

A Divide and Conquer Method to Compute Binomial Ideals	648
<i>Deepanjan Kesh and Shashank K. Mehta</i>	
How Fast Can We Multiply Large Integers on an Actual Computer?	660
<i>Martin Fürer</i>	

Applications to Bioinformatics

Sorting Permutations by Prefix and Suffix Versions of Reversals and Transpositions	671
<i>Carla Negri Lintzmayer and Zanoni Dias</i>	
Algorithmic and Hardness Results for the Colorful Components Problems	683
<i>Anna Adamaszek and Alexandru Popa</i>	

Budget Problems

On the Stability of Generalized Second Price Auctions with Budgets	695
<i>Josep Díaz, Ioannis Giotis, Lefteris Kirousis, Evangelos Markakis, and Maria Serna</i>	
Approximation Algorithms for the Max-Buying Problem with Limited Supply	707
<i>Cristina G. Fernandes and Rafael C.S. Schouery</i>	
Budget Feasible Mechanisms for Experimental Design	719
<i>Thibaut Horel, Stratis Ioannidis, and S. Muthukrishnan</i>	

Algorithms and Data Structures

LZ77-Based Self-indexing with Faster Pattern Matching.....	731
<i>Travis Gagie, Paweł Gawrychowski, Juha Kärkkäinen, Yakov Nekrich, and Simon J. Puglisi</i>	
Quad- K -d Trees	743
<i>Nikolett Bereczky, Amalia Duch, Krisztián Németh, and Salvador Roura</i>	
Biased Predecessor Search.....	755
<i>Prosenjit Bose, Rolf Fagerberg, John Howat, and Pat Morin</i>	
Author Index	765
