Part I Models

1	Introduction	3
1.1	Discrete Models	3
1.1.1	Genetic Background	3
1.1.2	The Wright–Fisher Model	5
1.1.3	The Moran Model	7
1.2	Diffusion Approximation	8
1.3	An Important Relation	11
1.4	Notes	13
2	The Poisson–Dirichlet Distribution	15
2.1	Definition and Poisson Process Representation	15
2.2	Perman’s Formula	17
2.3	Marginal Distribution	22
2.4	Size-biased Sampling and the GEM Representation	24
2.5	The Ewens Sampling Formula	26
2.6	Scale-invariant Poisson Process	33
2.7	Urn-based Models	36
2.7.1	Hoppe’s Urn	36
2.7.2	Linear Birth Process with Immigration	38
2.7.3	A Model of Joyce and Tavaré	44
2.8	The Dirichlet Process	46
2.9	Notes	51
3	The Two-Parameter Poisson–Dirichlet Distribution	53
3.1	Definition	53
3.2	Marginal Distributions	54
3.3	The Pitman Sampling Formula	58
3.4	Urn-type Construction	62
3.5	Notes	66

4	The Coalescent	67
4.1	Kingman's n -Coalescent	67
4.2	The Coalescent	72
4.3	The Pure-death Markov Chain	73
4.4	Notes	80
5	Stochastic Dynamics	81
5.1	Infinitely-many-neutral-alleles Model	81
5.2	A Fleming–Viot Process	85
5.3	The Structure of Transition Functions	93
5.4	A Measure-valued Branching Diffusion with Immigration	107
5.5	Two-parameter Generalizations	109
5.6	Notes	111
6	Particle Representation	113
6.1	Exchangeability and Random Probability Measures	113
6.2	The Moran Process and the Fleming–Viot Process	116
6.3	The Donnelly–Kurtz Look-down Process	120
6.4	Embedded Coalescent	123
6.5	Notes	124
 Part II Asymptotic Behaviors		
7	Fluctuation Theorems	127
7.1	The Poisson–Dirichlet Distribution	127
7.2	The Dirichlet Process	134
7.3	Gaussian Limits	142
7.4	Notes	150
8	Large Deviations for the Poisson–Dirichlet Distribution	151
8.1	Large Mutation Rate	151
8.1.1	The Poisson–Dirichlet Distribution	151
8.1.2	The Two-parameter Poisson–Dirichlet Distribution	158
8.2	Small Mutation Rate	160
8.2.1	The Poisson–Dirichlet Distribution	160
8.2.2	Two-parameter Generalization	168
8.3	Applications	171
8.4	Notes	178
9	Large Deviations for the Dirichlet Processes	179
9.1	One-parameter Case	179
9.2	Two-parameter Case	187
9.3	Comparison of Rate Functions	193
9.4	Notes	197

Contents	xiii
A Poisson Process and Poisson Random Measure	199
A.1 Definitions	199
A.2 Properties	200
B Basics of Large Deviations	203
References	209
Index	217
