

Table of Contents

Ubiquitous Services and Applications

RESTful Integration of Heterogeneous Devices in Pervasive Environments	1
<i>Daniel Romero, Gabriel Hermosillo, Amirhosein Taherkordi, Russel Nzekwa, Romain Rouvoy, and Frank Eliassen</i>	

Hosting and Using Services with QoS Guarantee in Self-adaptive Service Systems	15
<i>Shanshan Jiang, Svein Hallsteinsen, Paolo Barone, Alessandro Mamelli, Stephan Mehlhase, and Ulrich Scholz</i>	

Grid Computing

Validating Evolutionary Algorithms on Volunteer Computing Grids	29
<i>Travis Desell, Malik Magdon-Ismail, Boleslaw Szymanski, Carlos A. Varela, Heidi Newberg, and David P. Anderson</i>	
A Reconfiguration Language for Virtualized Grid Infrastructures	42
<i>Rémy Pottier, Marc Léger, and Jean-Marc Menaud</i>	

Sensor Networks

Distributed Object-Oriented Programming with RFID Technology	56
<i>Andoni Lombide Carreton, Kevin Pinte, and Wolfgang De Meuter</i>	
WiSeMid: Middleware for Integrating Wireless Sensor Networks and the Internet	70
<i>Jeisa P.O. Domingues, Antonio V.L. Damaso, and Nelson S. Rosa</i>	

Context Awareness

Structured Context Prediction: A Generic Approach	84
<i>Matthias Meiners, Sonja Zaplata, and Winfried Lamersdorf</i>	

Service Orientation

Experiments in Model Driven Composition of User Interfaces	98
<i>Audrey Occello, Cedric Joffroy, and Anne-Marie Dery-Pinna</i>	

Service Discovery in Ubiquitous Feedback Control Loops	112
<i>Daniel Romero, Romain Rouvoy, Lionel Seinturier, and Pierre Carton</i>	
Distributed Fault Tolerant Controllers	
QoS Self-configuring Failure Detectors for Distributed Systems	126
<i>Alirio Santos de Sá and Raimundo José de Araújo Macêdo</i>	
Distributed Fault Tolerant Controllers	141
<i>Leonardo Mostarda, Rudi Ball, and Naranker Dulay</i>	
Cloud and Cluster Computing	
Automatic Software Deployment in the Azure Cloud	155
<i>Jacek Cala and Paul Watson</i>	
G2CL: A Generic Group Communication Layer for Clustered Applications	169
<i>Leandro Sales, Henrique Teófilo, and Nabor C. Mendonça</i>	
Adaptive and (Re)configurable Systems	
Dynamic Composition of Cross-Organizational Features in Distributed Software Systems	183
<i>Stefan Walraven, Bert Lagaisse, Eddy Truyen, and Wouter Joosen</i>	
Co-ordinated Utility-Based Adaptation of Multiple Applications on Resource-Constrained Mobile Devices	198
<i>Ulrich Scholz and Stephan Mehlhase</i>	
Collaborative Systems	
<i>gradienTv</i> : Market-Based P2P Live Media Streaming on the Gradient Overlay	212
<i>Amir H. Payberah, Jim Dowling, Fatemeh Rahimian, and Seif Haridi</i>	
Collaborative Ranking and Profiling: Exploiting the Wisdom of Crowds in Tailored Web Search	226
<i>Pascal Felber, Peter Kropf, Lorenzo Leonini, Toan Luu, Martin Rajman, and Etienne Rivière</i>	
Author Index	243
