

Contents

Foreword — vii

List of abbreviations — ix

1 Introduction — 1

2 Materials — 6

2.1 Modification of polymers by radiation — 6

2.1.1 Overview — 6

2.1.2 X-Ray — 7

2.1.3 Ion beam implantation — 8

2.1.4 Photolocking — 14

2.1.5 DUV radiation — 15

2.2 Smart materials — 23

2.2.1 Shape memory materials — 24

2.2.2 Smart fluids — 25

2.2.3 Magnetostrictive materials — 27

2.2.4 Electrostrictive materials — 27

2.2.5 Chromogenic materials — 28

2.2.6 Smart polymers — 30

2.2.7 Quantum dots (QD) — 33

2.2.8 ZnO nanowires — 34

2.3 Conclusion — 34

3 Photonics — 35

3.1 Wave guiding basics — 35

3.2 Characterization of optical waveguide-based devices — 42

3.3 Types of waveguides — 47

3.4 Types of optical fibers — 50

3.5 Fabrication methods for optical waveguides — 52

3.5.1 Lithography — 53

3.5.2 Replication — 54

3.5.3 Dry and wet etching — 62

3.6 Planar waveguide-based devices — 63

3.6.1 All polymer waveguides — 63

3.6.2 Silicon-polymer hybrid waveguides — 70

3.7 Active photonic devices — 77

3.7.1 Light-emitting diodes — 77

3.7.2 Detectors — 79

3.7.3	Image sensors —	87
3.7.4	Semiconductor lasers —	90
3.7.5	Organic LEDs, organic PDs and organic lasers —	92
3.8	Conclusion —	104
4	Fluidics and fluid control systems —	106
4.1	Valve basics —	106
4.2	Introduction into fluidic mechanics —	108
4.3	Theory of fluid control elements in systems —	112
4.4	Introduction into control theory —	114
4.4.1	Open-loop and closed-loop control —	114
4.4.2	The control loop —	118
4.4.3	Adapting the controller to the controlled system —	136
4.4.4	Rating and selection of control valves —	145
4.5	Microvalves —	155
4.6	Fabrication of fluidic channels: Bonding —	163
4.7	Conclusion —	165
5	Biology —	166
5.1	Cell types —	167
5.1.1	Helix aspersa cultures —	167
5.1.2	Primary rat central nervous system cultures —	168
5.2	Patterning of living cells —	170
5.2.1	Fibroblast patterning by DUV lithography —	171
5.2.2	Neural cell patterning by DUV lithography —	172
5.2.3	Microcontact printing (μ CP) —	178
5.2.4	Microelectromechanical systems (MEMS) printing —	181
5.3	Conclusion —	183
6	Sensors for Optofluidic systems —	184
6.1	Process analytical sensors —	184
6.1.1	Temperature sensors —	185
6.1.2	Pressure sensors —	189
6.1.3	Flow sensors —	190
6.1.4	Level sensors —	194
6.1.5	Conductivity sensors —	197
6.1.6	pH Sensors —	199
6.1.7	Oxydo-reduction potential (ORP) sensors —	199
6.1.8	Oxygen sensors —	199
6.2	Spectroscopy —	202
6.2.1	Introduction —	202
6.2.2	Diffraction gratings —	203

6.2.3	Miniature spectrometers —	203
6.2.4	MEMS-based spectrometers —	208
6.2.5	UV-VIS spectroscopy —	214
6.2.6	Infrared spectroscopy —	223
6.2.7	Raman spectroscopy —	224
6.3	Chemometrics —	225
6.4	Conclusion —	232
7	Optofluidic system technology —	233
7.1	Bus technologies for Optofluidic systems —	234
7.2	Optofluidic systems —	240
7.3	Conclusion —	261
8	Outlook —	263
9	Glossary of Optofluidics terms and definitions —	264
10	Chemical resistance properties of materials —	284
	International standards and regulations —	313
	Bibliography —	326
	Index —	339
