Preface XVII

### Part I Primordial Metal–Sulfur-Mediated Reactions 1

- 1 From Chemical Invariance to Genetic Variability 3  
*Günter Wächtershäuser*
- 1.1 Heuristic of Biochemical Retrodiction 3
- 1.2 Retrodicting the Elements of Life 5
- 1.3 Retrodicting Pioneer Catalysis 6
- 1.4 Retrodicting Metabolic Reproduction and Evolution 10
- 1.5 Retrodicting Pioneer-Metabolic Reactions 11
- 1.6 Early Evolution in a Spatiotemporal Flow Context 13
- Acknowledgments 16
- References 16
  
- 2 Fe–S Clusters: Biogenesis and Redox, Catalytic, and Regulatory Properties 21  
*Yvain Nicolet and Juan C. Fontecilla-Camps*
- 2.1 Introduction 21
- 2.2 Fe–S Cluster Biogenesis and Trafficking 22
- 2.3 Redox Properties of Fe–S Clusters 27
- 2.4 Fe–S Clusters and Catalysis 28
- 2.4.1 Redox Catalysis 28
- 2.4.2 Nonredox Fe–S Cluster-Based Catalysis 30
- 2.5 Fe–S Clusters and Oxidative Stress 32
- 2.6 Regulation of Protein Expression by Fe–S Clusters 33
- 2.6.1 Eukaryotic Iron Regulatory Protein 1 (IRP1) 34
- 2.6.1.1 IRP1 and Fe–S Cluster Biogenesis 35
- 2.6.1.2 Reactive Oxygen Species and IRP1 Fe–S Cluster Stability 35
- 2.6.1.3 X-Ray Structural Studies of IRP1–IRE Complexes 36
- 2.6.2 Bacterial Fumarate Nitrate Reduction Regulator (FNR) 37

2.6.3	The ISC Assembly Machinery Regulator IscR	38
2.7	Conclusion	38
	References	39

## Part II Model Complexes of the Active Site of Hydrogenases – Proton and Dihydrogen Activation 49

3	<b>[NiFe] Hydrogenases</b>	51
	<i>Joe Dawson, Carlo Perotto, Jonathan McMaster, and Martin Schröder</i>	
3.1	Introduction	51
3.2	Introduction to [NiFe] Hydrogenases	52
3.3	Nickel Thiolate Complexes as Analogs of [NiFe] Hydrogenase	52
3.4	[NiFe] Hydrogenase Model Complexes	59
3.4.1	Amine $[N_2Ni(\mu-S_2)Fe]$ Complexes	59
3.4.2	Phosphine $[P_2Ni(\mu-S_2)Fe]$ Complexes	60
3.4.3	Thiolate $[S_xNi(\mu-S_y)Fe]$ Complexes	63
3.4.4	Polymetallic $[Ni(\mu-S)_zFe_y]$ Complexes	65
3.5	Analogs of [NiFe] Hydrogenase Incorporating Proton Relays	67
3.5.1	Nickel Complexes Incorporating Protonation Sites	68
3.5.2	[NiFe] Complexes Incorporating Protonation Sites	72
3.6	Perspectives and Future Challenges	74
	Acknowledgments	74
	References	74
4	<b>[FeFe] Hydrogenase Models: an Overview</b>	79
	<i>Ulf-Peter Apfel, François Y. Pétillon, Philippe Schollhammer, Jean Talarmin, and Wolfgang Weigand</i>	
4.1	Introduction	79
4.2	Synthetic Strategies toward [FeFe] Hydrogenase Model Complexes	81
4.3	Properties of Model Complexes	83
4.3.1	Biomimetic Models of the “Rotated State”	83
4.3.2	Electron Transfer in [FeFe] Hydrogenase Models	84
4.3.3	Protonation Chemistry of [FeFe] Hydrogenase Models	86
4.3.3.1	Hydride Formation	86
4.3.3.2	Ligand Protonation and Proton Relays	88
4.3.4	Water-Soluble Hydrogenase Mimics	94
4.4	Conclusion	96
