1	Linear System Identification in the Short-Time Fourier Transform Domain	1
	Yekutiel Avargel and Israel Cohen	
1.1	Introduction	2
1.2	Problem Formulation	4
1.3	System Identification Using Crossband Filters	6
1.3.1	Crossband Filters Representation	6
1.3.2	Batch Estimation of Crossband Filters	8
1.3.3	Selecting the Optimal Number of Crossband Filters	11
1.4	System Identification Using the MTF Approximation	14
1.4.1	The MTF Approximation	14
1.4.2	Optimal Window Length	15
1.5	The Cross-MTF Approximation	18
1.5.1	Adaptive Estimation of Cross-Terms	19
1.5.2	Adaptive Control Algorithm	20
1.6	Experimental Results	22
1.6.1	Crossband Filters Estimation	23
1.6.2	Comparison of the Crossband Filters and MTF Approaches	23
1.6.3	CMTF Adaptation for Acoustic Echo Cancellation	25
1.7	Conclusions	28
	Appendix	28
	References	29
2	Identification of the Relative Transfer Function between Sensors in the Short-Time Fourier Transform Domain	33
	Ronen Talmon, Israel Cohen, and Sharon Gannot	
2.1	Introduction	33
2.2	Identification of the RTF Using Multiplicative Transfer Function Approximation	34

2.2.1	Problem Formulation and the Multiplicative Transfer Function Approximation	35
2.2.2	RTF Identification Using Non-Stationarity	36
2.2.3	RTF Identification Using Speech Signals	37
2.3	Identification of the RTF Using Convolutional Transfer Function Approximation	38
2.3.1	The Convolutional Transfer Function Approximation ..	39
2.3.2	RTF Identification Using the Convolutional Transfer Function Approximation	40
2.4	Relative Transfer Function Identification in Speech Enhancement Applications	41
2.4.1	Blocking Matrix	42
2.4.2	The Transfer Function Generalized Sidelobe Canceler ..	44
2.5	Conclusions	45
	References	46
3	Representation and Identification of Nonlinear Systems in the Short-Time Fourier Transform Domain	49
	Yekutieli Avargel and Israel Cohen	
3.1	Introduction	49
3.2	Volterra System Identification	51
3.3	Representation of Volterra Filters in the STFT Domain	55
3.3.1	Second-Order Volterra Filters	55
3.3.2	High-Order Volterra Filters	59
3.4	A New STFT Model For Nonlinear Systems	61
3.4.1	Quadratically Nonlinear Model	61
3.4.2	High-Order Nonlinear Models	65
3.5	Quadratically Nonlinear System Identification	65
3.5.1	Batch Estimation Scheme	67
3.5.2	Adaptive Estimation Scheme	72
3.6	Experimental Results	76
3.6.1	Performance Evaluation for White Gaussian Inputs ..	77
3.6.2	Nonlinear Undermodeling in Adaptive System Identification	79
3.6.3	Nonlinear Acoustic Echo Cancellation Application ..	81
3.7	Conclusions	83
	Appendix	83
	References	84
4	Variable Step-Size Adaptive Filters for Echo Cancellation ..	89
	Constantin Paleologu, Jacob Benesty, and Silviu Ciochină	
4.1	Introduction	90
4.2	Non-Parametric VSS-NLMS Algorithm	92
4.3	VSS-NLMS Algorithms for Echo Cancellation	96
4.4	VSS-APA for Echo Cancellation	103
4.5	VFF-RLS for System Identification	106

4.6	Simulations	112
4.6.1	VSS-NLMS Algorithms for AEC	112
4.6.2	VSS-APA for AEC	117
4.6.3	VFF-RLS for System Identification	121
4.7	Conclusions	123
	References	124
5	Simultaneous Detection and Estimation Approach for Speech Enhancement and Interference Suppression	127
	Ari Abramson and Israel Cohen	
5.1	Introduction	127
5.2	Classical Speech Enhancement in Nonstationary Noise Environments	129
5.3	Simultaneous Detection and Estimation for Speech Enhancement	131
5.3.1	Quadratic Distortion Measure	134
5.3.2	Quadratic Spectral Amplitude Distortion Measure	137
5.4	Spectral Estimation Under a Transient Noise Indication ...	140
5.5	A Priori SNR Estimation	142
5.6	Experimental Results	144
5.6.1	Simultaneous Detection and Estimation	146
5.6.2	Spectral Estimation Under a Transient Noise Indication	147
5.7	Conclusions	148
	References	149
6	Speech Dereverberation and Denoising Based on Time Varying Speech Model and Autoregressive Reverberation Model	151
	Takuya Yoshioka, Tomohiro Nakatani, Keisuke Kinoshita, and Masato Miyoshi	
6.1	Introduction	151
6.1.1	Goal	152
6.1.2	Technological Background	153
6.1.3	Minimum Mean-Squared Error Signal Estimation and Model-Based Approach	154
6.2	Dereverberation Method	156
6.2.1	Heuristic Derivation of Weighted Prediction Error Method	156
6.2.2	Reverberation Model	160
6.2.3	Clean Speech Model	165
6.2.4	Clean Speech Signal Estimator and Parameter Optimization	165
6.3	Combined Dereverberation and Denoising Method	167
6.3.1	Room Acoustics Model	168
6.3.2	Clean Speech Model	171

6.3.3	Clean Speech Signal Estimator	172
6.3.4	Parameter Optimization	173
6.4	Experiments	179
6.5	Conclusions	180
