

Table of Contents

The Rodin Platform Has Turned Ten	1
<i>Laurent Voisin and Jean-Raymond Abrial</i>	
Development of a Verified Flash File System	9
<i>Gerhard Schellhorn, Gidon Ernst, Jörg Pfähler, Dominik Haneberg, and Wolfgang Reif</i>	
Why Amazon Chose TLA ⁺	25
<i>Chris Newcombe</i>	
Translating B to TLA ⁺ for Validation with TLC	40
<i>Dominik Hansen and Michael Leuschel</i>	
α Rby—An Embedding of Alloy in Ruby	56
<i>Aleksandar Milicevic, Ido Efrati, and Daniel Jackson</i>	
MAZE: An Extension of Object-Z for Multi-Agent Systems	72
<i>Graeme Smith and Qin Li</i>	
Quasi-Lexicographic Convergence	86
<i>Stefan Hallerstede</i>	
Towards B as a High-Level Constraint Modelling Language: Solving the Jobs Puzzle Challenge	101
<i>Michael Leuschel and David Schneider</i>	
Analysis of Self- \star and P2P Systems Using Refinement	117
<i>Manamiary Bruno Andriamiarina, Dominique Méry, and Neeraj Kumar Singh</i>	
B Formal Validation of ERTMS/ETCS Railway Operating Rules	124
<i>Rahma Ben Ayed, Simon Collart-Dutilleul, Philippe Bon, Akram Idani, and Yves Ledru</i>	
Modelling Energy Consumption in Embedded Systems with VDM-RT	130
<i>José Antonio Esparza Isasa, Peter Würtz Vinther Jørgensen, Claus Ballegård Nielsen, and Stefan Hallerstede</i>	
Sealed Containers in Z	136
<i>Erke Boiten and Jeremy Jacob</i>	

Specifying Transaction Control to Serialize Concurrent Program Executions	142
<i>Egon Börger and Klaus-Dieter Schewe</i>	
Distributed Situation Analysis: A Formal Semantic Framework	158
<i>Narek Nalbandyan, Uwe Glässer, Hamed Yaghoubi Shahr, and Hans Wehn</i>	
Introducing Aspect-Oriented Specification for Abstract State Machines	174
<i>Marcel Dausend and Alexander Raschke</i>	
Modular Refinement for Submachines of ASMs	188
<i>Gidon Ernst, Jörg Pfähler, Gerhard Schellhorn, and Wolfgang Reif</i>	
Towards ASM-Based Formal Specification of Self-Adaptive Systems	204
<i>Elvinia Riccobene and Patrizia Scandurra</i>	
Distributed ASM - Pitfalls and Solutions	210
<i>Andreas Prinz and Edel Sherratt</i>	
WebASM: An Abstract State Machine Execution Environment for the Web	216
<i>Simone Zenaro, Vincenzo Gervasi, and Jacopo Soldani</i>	
Formal System Modelling Using Abstract Data Types in Event-B	222
<i>Andreas Fürst, Thai Son Hoang, David Basin, Naoto Sato, and Kunihiko Miyazaki</i>	
Formal Derivation of Distributed MapReduce	238
<i>Inna Pereverzeva, Michael Butler, Asieh Salehi Fathabadi, Linas Laibinis, and Elena Troubitsyna</i>	
Validating the RBAC ANSI 2012 Standard Using B	255
<i>Nghi Huynh, Marc Frappier, Amel Mammari, Régine Laleau, and Jules Desharnais</i>	
Invariant Guided System Decomposition	271
<i>Richard Banach</i>	
Understanding and Planning Event-B Refinement through Primitive Rationales	277
<i>Tsutomu Kobayashi, Fuyuki Ishikawa, and Shinichi Honiden</i>	
Templates for Event-B Code Generation	284
<i>Andrew Edmunds</i>	
The BWare Project: Building a Proof Platform for the Automated Verification of B Proof Obligations	290
<i>David Delahaye, Catherine Dubois, Claude Marché, and David Mentré</i>	

Tuning the Alt-Ergo SMT Solver for B Proof Obligations	294
<i>Sylvain Conchon and Mohamed Iguernelala</i>	
Fixed-Point Arithmetic Modeled in B Software Using Reals	298
<i>Jérôme Guéry, Olivier Rolland, and Joris Rehm</i>	
Bounded Model Checking of Temporal Formulas with Alloy	303
<i>Alcino Cunha</i>	
Formal Verification of OS Security Model with Alloy and Event-B	309
<i>Petr N. Devyagin, Alexey V. Khoroshilov, Victor V. Kuliamin, Alexander K. Petrenko, and Ilya V. Shchepetkov</i>	
Detecting Network Policy Conflicts Using Alloy	314
<i>Ferney A. Maldonado-Lopez, Jaime Chavarriaga, and Yezid Donoso</i>	
Staged Evaluation of Partial Instances in a Relational Model Finder	318
<i>Vajih Montaghani and Derek Rayside</i>	
Domain-Specific Visualization of Alloy Instances	324
<i>Loïc Gammaitoni and Pierre Kelsen</i>	
Optimizing Alloy for Multi-objective Software Product Line Configuration	328
<i>Ed Zulkoski, Chris Kleynhans, Ming-Ho Yee, Derek Rayside, and Krzysztof Czarnecki</i>	
Author Index	335
