

# Contents

<b>1</b>	<b>Introduction</b>	1
1.1	Background	1
1.2	Introduction to Satellite Networking	4
1.3	Current Status of Research on Satellite Network Routing	7
1.3.1	Border Routing	7
1.3.2	Access Routing	8
1.3.3	Inter Satellite Routing	8
1.4	Contents and Structure of the Book	15
1.4.1	Contents of the Book	15
1.4.2	The Main Points of the Book	16
1.4.3	Contents of Each Chapter	17
	References	18
<b>2</b>	<b>Satellite Network Constellation Design</b>	21
2.1	Introduction	21
2.2	Principle of Constellation Design	23
2.2.1	Constellation Structure Selection	23
2.2.2	Orbit Type Selection	26
2.2.3	Selection of Orbit Altitude	28
2.2.4	Selection of the Numbers of Orbits and Satellites	30
2.2.5	Selection of Model Parameters of a Multilayered Constellation	34
2.3	Simulation Analysis of Constellation Design	35
2.4	Analysis of the Constellation Parameters and Their Effect on Routing	37
2.5	Summary	38
	References	39
<b>3</b>	<b>Satellite Network Routing Strategies.</b>	41
3.1	Introduction	41
3.2	The Components of NSGRP	44
3.2.1	Intersatellite Links	45
3.2.2	GEO Satellites	45
3.2.3	MEO Satellites	46

3.2.4	LEO Satellites . . . . .	46
3.2.5	Terrestrial Gateways . . . . .	47
3.3	The Implementation of NSGRP . . . . .	48
3.3.1	Concepts and Definitions . . . . .	48
3.3.2	Implementation of NSGRP . . . . .	50
3.4	The Structure of NSGRP . . . . .	63
3.5	Simulations and Results . . . . .	67
3.5.1	Delay Characteristic . . . . .	68
3.5.2	Effects of Node Failure . . . . .	71
3.5.3	Effects of Link Congestion . . . . .	72
3.6	Summary . . . . .	73
	References . . . . .	73
<b>4</b>	<b>Satellite Network Traffic Engineering . . . . .</b>	<b>75</b>
4.1	Introduction . . . . .	75
4.2	Traffic Prediction of the Satellite Network . . . . .	77
4.3	Traffic Engineering of the Satellite Network . . . . .	82
4.3.1	Concepts and Definitions . . . . .	82
4.3.2	The Implementation of PTCE . . . . .	85
4.4	Simulations and Results . . . . .	88
4.5	Summary . . . . .	91
	References . . . . .	91
<b>5</b>	<b>Satellite Network Multi QoS Objective Routing Algorithm . . . . .</b>	<b>93</b>
5.1	Introduction . . . . .	93
5.2	Satellite Network Heuristic QoS Routing Algorithm . . . . .	96
5.2.1	Satellite Network Routing Model . . . . .	97
5.2.2	Ant Colony QoS Routing Algorithm . . . . .	99
5.2.3	Taboo Search QoS Routing Algorithm . . . . .	103
5.2.4	Genetic QoS Routing Algorithm . . . . .	106
5.2.5	Beehive QoS Routing Algorithm . . . . .	109
5.3	Satellite Network Multi QoS Optimization Routing Algorithm . . . . .	111
5.3.1	Prior-Order QoS Routing Algorithm . . . . .	113
5.3.2	PEC Routing Algorithm . . . . .	115
5.4	Simulations and Results . . . . .	117
5.5	Summary . . . . .	126
	References . . . . .	127
<b>6</b>	<b>Summary and Outlook . . . . .</b>	<b>129</b>
6.1	Summary . . . . .	129
6.2	Outlook of Further Endeavors . . . . .	130
