

Table of Content

IYCr 2014 Celebration	3
Laue Prize 2013.....	4
Plenary Talks.....	5
Talks	8
MS01 – Crystallography of pharmaceutically active compounds & halogen and hydrogen bonds in crystal engineering.....	8
MS02 – Functional materials and technologies for energy conversion and catalysis	12
MS03 – Temperature, pressure and field induced processes/phase transitions.....	17
MS04 – Hot new structures I.....	22
MS05 – Inorganic structural chemistry – synthesis, structure, properties and applications I	24
MS06 – Structure-property relations in materials sciences I	29
MS07 – Synchrotron opportunities and challenging structure determinations I (Bio).....	34
MS08 – Quasicrystals and incommensurate structures	37
MS09 – Crystallography in geology – microstructures as indicators of rock forming processes	41
MS10 – Protein function and regulation.....	46
MS11 – Synchrotron opportunities and challenging structure determinations II (Other)	50
MS12 – Inorganic structural chemistry – synthesis, structure, properties and applications II.....	54
MS13 – Therapeutic targets and fragment-based drug discovery	59
MS14 – Structure-property relations in materials sciences II.....	63
MS15 – Charge density for understanding chemical bonding in organic and inorganic structures (dedic. to Prof. Luger).....	69
MS16 – Hot new structures II	72
MS17 – Spectroscopy as supporting method in structure determination	75
MS18 – Crystallography in archeometry.....	79
Poster	83
MS01 – Crystallography of pharmaceutically active compounds and halogen and hydrogen bonds in crystal engineering	83
MS02 – Functional materials and technologies for energy conversion and catalysis	86
MS03 – Temperature, pressure and field induced processes/phase transitions.....	97
MS04 – Hot new structures	103
MS05 – Inorganic structural chemistry – synthesis, structure, properties and applications.....	110
MS06 – Structure property relations in materials sciences.....	160
MS07 – Synchrotron opportunities and challenging structure determinations	174
MS08 – Quasicrystals and incommensurate structures	186
MS09 – Crystallography in geology – microstructures as indicators of rock forming processes	188
MS10 – Protein function and regulation.....	189
MS13 – Therapeutic targets and fragment-based drug discovery.....	201
MS15 – Charge density for understanding chemical bonding in organic and inorganic structures (dedic. to Prof. Luger)....	204
MS17 – Spectroscopy as supporting method in structure determination	207
MS18 – Crystallography in archeometry.....	210
Index of Authors.....	211
