<b>1</b>	<b>Combustion Synthesis of Nitrides for Development of Ceramic Materials of New Generation</b>	<b>1</b>
	<i>Inna P. Borovinskaya, Vazgen E. Loryan, and Vladimir V. Zakorzhevsky</i>	
1.1	Introduction	1
1.2	Peculiarities of Phase and Structure Formation of Metal and Nonmetal Nitrides in Combustion Mode	2
1.2.1	Systems of Transition Metal of the IV–V Groups of the Periodic Table with Nitrogen	2
1.2.1.1	Two Threshold Mechanisms of Combustion and Structure Formation	5
1.2.1.2	Structural and Morphological Peculiarities of Silicon, Boron, and Aluminum Nitrides – Nanosized Powders	7
1.3	Dependence of SHS Nitride Composition and Structure on Infiltration Combustion Mode	20
1.3.1	Two Stages of SHS Process	21
1.3.1.1	Nitride Dissociation	26
1.3.1.2	Role of Nitrogen Admission to the Reaction Zone	30
1.4	SHS Equipment for Powder Synthesis	32
1.5	Synthesis of SHS-Ceramics Based on Silicon and Aluminum Nitrides and SiAlON Powders	33
1.5.1	Silicon Nitride Powders and Items	33
1.5.2	SiAlON Powders and Items	35
1.5.3	Aluminum Nitride Powders and Items	37
1.6	Direct Production of Materials and Items Based on Nitride Ceramics by SHS Gasostating	38
1.6.1	Nitride Ceramics Based on SiAlONs	39
1.6.2	Nitride Ceramics Based on BN	40
1.6.3	Nitride Ceramics Based on AlN	42

1.7	Conclusion	44
	References	44
<b>2</b>	<b>Combustion Synthesis of Boron Nitride Ceramics: Fundamentals and Applications</b>	<b>49</b>
	<i>Alexander S. Mukasyan</i>	
2.1	Introduction	49
2.1.1	Background: Brief Historical Overview	49
2.1.2	Key Properties and Markets Values	49
2.1.3	Applications of h-BN	51
2.1.4	Method of Synthesis: Advantages and Disadvantages	52
2.1.5	Combustion Synthesis in Gas–Solid Systems: General Definitions	53
2.2	Combustion in Boron–Nitrogen System	57
2.2.1	Thermodynamic Considerations	58
2.2.2	Conditions for Combustion Synthesis of Boron Nitride Material	59
2.3	Mechanism of Structure Formation in CS wave	62
2.3.1	Methods of Investigation of Structural Transformation in Combustion Wave	62
2.3.2	Mechanism of BN Formation	64
2.4	Combustion Synthesis of Nitride-Based Ceramics	67
2.4.1	CS of Boron Nitride Ceramics	68
2.4.2	Properties of BN Materials Synthesized by CS Technology	70
2.4.3	Examples of Special Application of CS-BN Ceramics	72
2.5	Final Remarks	72
	References	73
<b>3</b>	<b>Combustion Synthesis of Aluminum Nitride (AlN) Powders with Controlled Grain Morphologies</b>	<b>75</b>
	<i>Zhongqi Shi, Yoshinari Miyamoto, and Hailong Wang</i>	
3.1	Introduction	75
3.2	Combustion Synthesis of Quasi-Aligned AlN Nanowhiskers	76
3.2.1	Experimental Methods of Approach	76
3.2.2	Results and Discussion	78
3.3	Enhanced Thermal Conductivity of Polymer Composites Filled with 3D Brush-Like AlN Nanowhiskers by Combustion Method	83
3.3.1	Experimental Methods of Approach	84
3.3.2	Results and Discussion	84
3.4	Growth of Flower-Like AlN by Combustion Synthesis Assisted with Mechanical Activation	86
3.4.1	Experimental Methods of Approach	87
3.4.2	Results and Discussion	87
3.5	Combustion Synthesis of AlN Porous-Shell Hollow Spheres	90

3.5.1	Experimental Methods of Approach	90
3.5.2	Results and Discussion	91
3.6	Summary and Conclusions	93
	References	94
<b>4</b>	<b>Combustion Synthesis and Spark Plasma Sintering of <math>\beta</math>-SiAlON</b>	<b>97</b>
	<i>Xuemei Yi, Tomohiro Akiyama, and Kazuya Kurokawa</i>	
4.1	Introduction	97
4.1.1	$\beta$ -SiAlON	97
4.1.2	Combustion Synthesis (CS)	98
4.1.3	Spark Plasma Sintering (SPS)	98
4.2	CS of High-Purity $\beta$ -SiAlON and Densification by SPS	99
4.2.1	Reaction Mechanisms	99
4.2.2	Dense $\beta$ -SiAlON by CS and SPS	101
4.2.2.1	Combustion Synthesis of $\beta$ -SiAlON Powder	101
4.2.2.2	Spark Plasma Sintering of CSed Powders	102
4.2.2.3	Characterization of CS-SPSed $\beta$ -SiAlON	103
4.3	Physical Properties of CS-SPSed $\beta$ -SiAlON	108
4.3.1	Vickers Hardness	108
4.3.2	Thermal Conductivity	109
4.4	Corrosion Resistance	112
4.4.1	Oxidation Behavior in Air	112
4.4.1.1	Oxidation Kinetics	113
4.4.1.2	Microstructure of Oxide Scale	113
4.4.1.3	Reaction Mechanisms	116
4.4.2	Corrosion Resistance in Supercritical Water	118
4.5	Conclusions of This Chapter	122
	References	122
<b>5</b>	<b>Combustion Synthesis of AlN (<math>\text{Al}_3\text{O}_3\text{N}</math>), BN, ZrN, and TiN in Air and Ceramic Application</b>	<b>125</b>
