

Table of Contents

A Hybrid Ant Colony Optimization Algorithm for the Far From Most String Problem	1
<i>Christian Blum and Paola Festa</i>	
A Parametric Framework for Cooperative Parallel Local Search	13
<i>Danny Munera, Daniel Diaz, Salvador Abreu, and Philippe Codognet</i>	
A Survey of Meta-heuristics Used for Computing Maximin Latin Hypercube	25
<i>Arpad Rimmel and Fabien Teytaud</i>	
An Analysis of Parameters of irace	37
<i>Leslie Pérez Cáceres, Manuel López-Ibáñez, and Thomas Stützle</i>	
An Improved Multi-objective Algorithm for the Urban Transit Routing Problem	49
<i>Matthew P. John, Christine L. Mumford, and Rhyd Lewis</i>	
An Iterated Greedy Heuristic for Simultaneous Lot-Sizing and Scheduling Problem in Production Flow Shop Environments	61
<i>Harlem M.M. Villadiego, José Elías C. Arroyo, and André Gustavo dos Santos</i>	
Balancing Bicycle Sharing Systems: An Approach for the Dynamic Case	73
<i>Christian Kloimüller, Petrina Papazek, Bin Hu, and Günther R. Raidl</i>	
Cooperative Selection: Improving Tournament Selection via Altruism ...	85
<i>Juan Luis Jiménez Laredo, Sune S. Nielsen, Grégoire Danoy, Pascal Bouvry, and Carlos M. Fernandes</i>	
Diversity-Driven Selection of Multiple Crossover Operators for the Capacitated Arc Routing Problem	97
<i>Pietro Consoli and Xin Yao</i>	
Dynamic Period Routing for a Complex Real-World System: A Case Study in Storm Drain Maintenance	109
<i>Yujie Chen, Peter Cowling, and Stephen Remde</i>	
Elementary Landscape Decomposition of the Hamiltonian Path Optimization Problem	121
<i>Darrell Whitley and Francisco Chicano</i>	

Gaussian Based Particle Swarm Optimisation and Statistical Clustering for Feature Selection	133
<i>Mitchell C. Lane, Bing Xue, Ivy Liu, and Mengjie Zhang</i>	
Global Optimization of Multimodal Deceptive Functions	145
<i>David Iclănzan</i>	
Learning Inherent Networks from Stochastic Search Methods	157
<i>David Iclănzan, Fabio Daolio, and Marco Tomassini</i>	
Metaheuristics for the Pick-Up and Delivery Problem with Contracted Orders.....	170
<i>Philip Mourdjis, Peter Cowling, and Martin Robinson</i>	
Modeling an Artificial Bee Colony with Inspector for Clustering Tasks.....	182
<i>Cosimo Birtolo, Giovanni Capasso, Davide Ronca, and Gennaro Sorrentino</i>	
Personalized Multi-day Trips to Touristic Regions: A Hybrid GA-VND Approach	194
<i>Ali Divsalar, Pieter Vansteenwegen, Masoud Chitsaz, Kenneth Sörensen, and Dirk Cattrysse</i>	
Phase Transition and Landscape Properties of the Number Partitioning Problem	206
<i>Khulood Alyahya and Jonathan E. Rowe</i>	
The Firefighter Problem: Application of Hybrid Ant Colony Optimization Algorithms.....	218
<i>Christian Blum, Maria J. Blesa, Carlos García-Martínez, Francisco J. Rodríguez, and Manuel Lozano</i>	
The Influence of Correlated Objectives on Different Types of P-ACO Algorithms	230
<i>Ruby L.V. Moritz, Enrico Reich, Matthias Bernt, and Martin Middendorf</i>	
Author Index.....	243
