New Data and Updates for several IIa-VI Compounds (Structural Properties, Thermal and Thermodynamic Properties, and Lattice Properties)

Systematics of Semiconductor Properties ..... see LB III/44A

Index of Substances ..... see LB III/44A

List of Symbols..... see LB III/44A

Conversion Factors..... see LB III/44A

New Data and Updates for several IIa-VI Compounds (Structural Properties, Thermal and Thermodynamic Properties, and Lattice Properties)

BaO: phase transition pressure, phase stability (*D. Strauch*) ..... 1

BaO: lattice parameters (*D. Strauch*) ..... 4

BaO: phonon dispersion relations, phonon density of states (*D. Strauch*) ..... 8

BaO: phonon frequencies (*D. Strauch*) ..... 10

BaO: elastic constants, internal strain parameter (*D. Strauch*) ..... 12

BaO: bulk modulus (*D. Strauch*) ..... 15

BaO: dielectric constant, Born effective charge (*D. Strauch*) ..... 18

BaO: piezoelectric constants, spontaneous polarization (*D. Strauch*)..... 20

BaPo: phase transition (*D. Strauch*) ..... 22

BaPo: lattice parameters (*D. Strauch*) ..... 23

BaPo: elastic constants (*D. Strauch*) ..... 24

BaPo: bulk modulus (*D. Strauch*) ..... 25

BaS: phase transition (*D. Strauch*) ..... 26

BaS: lattice parameters (*D. Strauch*) ..... 28

BaS: phonon dispersion relations, phonon density of states (*D. Strauch*) ..... 30

BaS: phonon frequencies, mode-Grüneisen parameters (*D. Strauch*) ..... 31

BaS: elastic constants, acoustic attenuation (*D. Strauch*) ..... 33

BaS: bulk modulus (*D. Strauch*) ..... 36

BaS: dielectric constant, Born effective charge (*D. Strauch*) ..... 38

BaSe: phase transition (*D. Strauch*) ..... 40

BaSe: lattice parameters (*D. Strauch*) ..... 41

BaSe: phonon dispersion relations, phonon density of states (*D. Strauch*) ..... 43

BaSe: phonon frequencies, mode-Grüneisen parameters (*D. Strauch*) ..... 44

BaSe: elastic constants, acoustic attenuation ( <i>D. Strauch</i> ).....	46
BaSe: bulk modulus ( <i>D. Strauch</i> ) .....	49
BaSe: dielectric constant, Born effective charge ( <i>D. Strauch</i> ).....	51
BaTe: phase transition pressure ( <i>D. Strauch</i> ).....	53
BaTe: lattice parameters ( <i>D. Strauch</i> ).....	55
BaTe: phonon dispersion relation, phonon density of states ( <i>D. Strauch</i> ) .....	57
BaTe: phonon frequencies, mode-Grüneisen parameters ( <i>D. Strauch</i> ).....	58
BaTe: elastic constants, acoustic attenuation ( <i>D. Strauch</i> ) .....	60
BaTe: bulk modulus ( <i>D. Strauch</i> ) .....	62
BaTe: dielectric constant, Born effective charge ( <i>D. Strauch</i> ) .....	64
BeO: phase transition pressure, phase transition temperature, phase stability, phase diagram ( <i>D. Strauch</i> ) .....	66
BeO: Gibbs free energy ( <i>D. Strauch</i> ).....	70
BeO: thermal expansion ( <i>D. Strauch</i> ).....	72
BeO: lattice parameters ( <i>D. Strauch</i> ) .....	73
BeO: Debye-Waller factor, temperature factor ( <i>D. Strauch</i> ) .....	79
BeO: phonon dispersion curves, phonon density of states ( <i>D. Strauch</i> ) .....	80
BeO: phonon frequencies, mode-Grüneisen parameters ( <i>D. Strauch</i> ) .....	85
BeO: phonon line width ( <i>D. Strauch</i> ) .....	87
BeO: elastic constants ( <i>D. Strauch</i> ) .....	88
BeO: bulk modulus ( <i>D. Strauch</i> ) .....	91
BeO: piezoelectric constant, spontaneous polarization ( <i>D. Strauch</i> ) .....	95
BeO: dielectric constant, Born effective charge ( <i>D. Strauch</i> ).....	97
BeS: transition pressure, phase stability ( <i>D. Strauch</i> ).....	99
BeS: thermal expansion ( <i>D. Strauch</i> ).....	101
BeS: lattice parameters ( <i>D. Strauch</i> ).....	102
BeS: phonon dispersion curves, phonon density of states ( <i>D. Strauch</i> ).....	105
BeS: phonon frequencies ( <i>D. Strauch</i> ).....	107
BeS: elastic constants, internal strain parameter, acoustic attenuation ( <i>D. Strauch</i> ).....	110
BeS: bulk modulus ( <i>D. Strauch</i> ) .....	114
BeS: dielectric constant, Born effective charge ( <i>D. Strauch</i> ) .....	118
BeSe: phase transition pressure, phase stability ( <i>D. Strauch</i> ) .....	121
BeSe: specific heat ( <i>D. Strauch</i> ) .....	123
BeSe: thermal expansion ( <i>D. Strauch</i> ).....	124
BeSe: lattice parameters ( <i>D. Strauch</i> ).....	125
BeSe: Debye-Waller factor, temperature factor ( <i>D. Strauch</i> ) .....	128
BeSe: phonon dispersion curves, phonon density of states, surface phonon dispersion curves, surface phonon density of states ( <i>D. Strauch</i> ).....	129
BeSe: phonon frequencies, mode-Grüneisen parameters ( <i>D. Strauch</i> ) .....	131
BeSe: elastic constants, internal strain parameter, acoustic attenuation ( <i>D. Strauch</i> ).....	135
BeSe: bulk modulus ( <i>D. Strauch</i> ) .....	139
BeSe: dielectric constant, Born effective charge ( <i>D. Strauch</i> ).....	143
BeTe: phase transition pressure, phase stability ( <i>D. Strauch</i> ).....	145
BeTe: thermal expansion ( <i>D. Strauch</i> ).....	147
BeTe: lattice parameters ( <i>D. Strauch</i> ).....	148
BeTe: phonon dispersion curves, phonon density of states ( <i>D. Strauch</i> ) .....	151
BeTe: phonon frequencies ( <i>D. Strauch</i> ).....	152
BeTe: phonon line width ( <i>D. Strauch</i> ).....	155
BeTe: elastic constants, internal-strain parameter, acoustic attenuation ( <i>D. Strauch</i> ) .....	156
BeTe: bulk modulus ( <i>D. Strauch</i> ) .....	160
BeTe: dielectric constant, Born effective charge ( <i>D. Strauch</i> ) .....	164
CaO: phase transition pressure, phase stability, phase diagram, ferroelectric phases transition ( <i>D. Strauch</i> ) .....	166
CaO: thermal expansion ( <i>D. Strauch</i> ).....	169

CaO: lattice parameters ( <i>D. Strauch</i> ) .....	170
CaO: phonon dispersion relations, phonon density of states ( <i>D. Strauch</i> ) .....	174
CaO: phonon frequencies ( <i>D. Strauch</i> ) .....	177
CaO: phonon line width ( <i>D. Strauch</i> ) .....	179
CaO: elastic constants, internal strain parameter ( <i>D. Strauch</i> ) .....	180
CaO: bulk and shear moduli ( <i>D. Strauch</i> ) .....	185
CaO: piezoelectric constant, spontaneous polarization ( <i>D. Strauch</i> ) .....	191
CaO: dielectric constant, Born effective charge ( <i>D. Strauch</i> ) .....	192
CaPo: phase transition pressure, equation of state ( <i>D. Strauch</i> ) .....	195
CaPo: thermal expansion ( <i>D. Strauch</i> ) .....	196
CaPo: lattice parameters ( <i>D. Strauch</i> ) .....	197
CaPo: phonon dispersion curves, phonon density of states ( <i>D. Strauch</i> ) .....	198
CaPo: phonon frequencies ( <i>D. Strauch</i> ) .....	200
CaPo: elastic constants, internal strain parameter ( <i>D. Strauch</i> ) .....	201
CaPo: bulk modulus ( <i>D. Strauch</i> ) .....	203
CaS: phase transition pressure ( <i>D. Strauch</i> ) .....	205
CaS: lattice parameters ( <i>D. Strauch</i> ) .....	207
CaS: phonon frequencies ( <i>D. Strauch</i> ) .....	209
CaS: phonon line width ( <i>D. Strauch</i> ) .....	210
CaS: elastic constants ( <i>D. Strauch</i> ) .....	211
CaS: bulk modulus ( <i>D. Strauch</i> ) .....	214
CaS: dielectric constant ( <i>D. Strauch</i> ) .....	217
CaSe: phase transition pressure ( <i>D. Strauch</i> ) .....	218
CaSe: lattice parameters ( <i>D. Strauch</i> ) .....	220
CaSe: elastic constants ( <i>D. Strauch</i> ) .....	222
CaSe: bulk modulus ( <i>D. Strauch</i> ) .....	225
CaSe: dielectric constant ( <i>D. Strauch</i> ) .....	227
CaTe: phase transition pressure ( <i>D. Strauch</i> ) .....	228
CaTe: lattice parameters ( <i>D. Strauch</i> ) .....	230
CaTe: elastic constants ( <i>D. Strauch</i> ) .....	231
CaTe: bulk modulus ( <i>D. Strauch</i> ) .....	233
CaTe: dielectric constant ( <i>D. Strauch</i> ) .....	235
