

Contents

1	Introduction	1
1.1	Switched System	1
1.2	Optimal Control	2
1.2.1	Standard Optimal Control	2
1.2.2	Optimal Switching Control	4
1.3	Fermentation Process	5
1.3.1	Generic Fermentation Process	5
1.3.2	1,3-Propanediol Fermentation	7
1.3.3	Kinetics and Physiological Modeling	8
1.4	Outline of the Book	9
2	Mathematical Preliminaries	13
2.1	Lebesgue Measure and Integration	13
2.2	Normed Spaces	17
2.3	Linear Functionals and Dual Spaces	20
2.4	Bounded Variation.....	22
3	Constrained Mathematical Programming	25
3.1	Introduction.....	25
3.2	Gradient-Based Algorithms.....	26
3.2.1	Optimality Conditions.....	27
3.2.2	The Quadratic Penalty Method	28
3.2.3	Augmented Lagrangian Method	30
3.2.4	Sequential Quadratic Programming	32
3.3	Evolutionary Algorithms.....	35
3.3.1	Particle Swarm Optimization	35
3.3.2	Differential Evolution	36
3.3.3	Constraint-Handling Techniques.....	38

4	Elements of Optimal Control Theory	41
4.1	Introduction	41
4.2	Dynamical Systems	41
4.2.1	Ordinary Differential System	41
4.2.2	Delay-Differential System	44
4.2.3	Switched System	48
4.3	Optimal Control Problems	49
4.3.1	Standard Optimal Control Problem	49
4.3.2	Optimal Multiprocess Control Problem	50
4.4	Necessary Optimality Conditions	52
4.4.1	Necessary Conditions for Standard Optimal Control Problem	52
4.4.2	Necessary Conditions for Optimal Multiprocesses	54
5	Optimal Control of Nonlinear Multistage Systems	59
5.1	Introduction	59
5.2	Controlled Multistage Systems	60
5.3	Properties of the Controlled Multistage Systems	63
5.4	Optimal Control Models	66
5.5	Computational Approaches	68
5.6	Numerical Results	73
5.7	Conclusion	76
6	Optimal Control of Switched Autonomous Systems	77
6.1	Introduction	77
6.2	Switched Autonomous Systems	78
6.3	Optimal Control Models	80
6.4	Computational Approaches	82
6.5	Numerical Results	85
6.6	Conclusion	86
7	Optimal Control of Time-Dependent Switched Systems	89
7.1	Introduction	89
7.2	Time-Dependent Switched Systems	90
7.3	Constrained Optimal Control Problems	93
7.4	Computational Approaches	94
7.4.1	Approximate Problem	94
7.4.2	Continuous State Constraints	96
7.4.3	Optimization Algorithms	98
7.5	Numerical Results	99
7.6	Conclusion	103
8	Optimal Control of State-Dependent Switched Systems	105
8.1	Introduction	105
8.2	State-Dependent Switched Systems	106
8.3	Optimal Control Models	110

8.4	Solution Methods for the Inner Optimization Problem.....	113
8.5	Numerical Results	118
8.6	Conclusion	119
9	Optimal Parameter Selection of Multistage Time-Delay Systems.....	123
9.1	Introduction	123
9.2	Problem Formulation.....	124
9.2.1	Multistage Time-Delay Systems	124
9.2.2	Properties of the Multistage Time-Delay Systems	126
9.3	Parametric Sensitivity Analysis.....	128
9.3.1	Sensitivity Functions	128
9.3.2	Numerical Simulation Results	132
9.4	Optimal Parameter Selection Problems	135
9.4.1	Optimal Parameter Selection Models	135
9.4.2	A Computational Procedure.....	136
9.4.3	Numerical Results	139
9.5	Conclusion	142
10	Optimal Control of Multistage Time-Delay Systems	143
10.1	Introduction.....	143
10.2	Controlled Multistage Time-Delay Systems	144
10.3	Constrained Optimal Control Problems	148
10.4	Computational Approaches	149
10.5	Numerical Results	155
10.6	Conclusion	158
11	Optimal Control of Switched Time-Delay Systems	159
11.1	Introduction.....	159
11.2	Switched Time-Delay Systems	160
11.3	Optimal Control Problems	163
11.3.1	Free Time Delayed Optimal Control Problem	163
11.3.2	The Equivalent Optimal Control Problem	164
11.4	Numerical Solution Methods	166
11.4.1	Approximation Problem.....	166
11.4.2	A Computational Procedure.....	167
11.5	Numerical Results	173
11.6	Conclusion	174
	References.....	177
