

# Inhaltsverzeichnis Band IV

|                                                                                                                               |     |
|-------------------------------------------------------------------------------------------------------------------------------|-----|
| 122. On the use of indeterminates in the theory of the orthogonal and symplectic groups . . . . .                             | 1   |
| 123. Concerning the differential equations of some boundary layer problems                                                    | 9   |
| 124. Concerning the differential equations of some boundary layer problems. II                                                | 15  |
| 125. On the differential equations of the simplest boundary layer problems . . .                                              | 18  |
| 126. Theory of reduction for arithmetical equivalence. II. . . . .                                                            | 46  |
| 127. On geometry of numbers . . . . .                                                                                         | 75  |
| 128. Elementary note on prime number problems of Vinogradoff's type (R. D. JAMES and H. WEYL) . . . . .                       | 97  |
| 129. On the theory of analytic curves (H. WEYL and J. WEYL) . . . . .                                                         | 111 |
| 130. On Hodge's theory of harmonic integrals . . . . .                                                                        | 115 |
| 131. Obituary: DAVID HILBERT 1862—1943 . . . . .                                                                              | 121 |
| 132. DAVID HILBERT and his mathematical work . . . . .                                                                        | 130 |
| 133. Concerning a classical problem in the theory of singular points of ordinary differential equations . . . . .             | 173 |
| 134. Comparison of a degenerate form of Einstein's with Birkhoff's theory of gravitation . . . . .                            | 213 |
| 135. How far can one get with a linear field theory of gravitation in flat space-time? . . . . .                              | 218 |
| 136. Fundamental domains for lattice groups in division algebras. I, II. . . .                                                | 232 |
| 137. Encomium (WOLFGANG PAULI). . . . .                                                                                       | 265 |
| 138. Mathematics and logic. A brief survey serving as a preface to a review of "The Philosophy of BERTRAND RUSSELL" . . . . . | 268 |
| 139. Comment on a paper by LEVINSON . . . . .                                                                                 | 280 |
| 140. A remark on the coupling of gravitation and electron (left out, see p. 285)                                              |     |
| 141. A remark on the coupling of gravitation and electron . . . . .                                                           | 286 |
| 142. Wissenschaft als symbolische Konstruktion des Menschen . . . . .                                                         | 289 |
| 143. Elementary algebraic treatment of the quantum mechanical symmetry problem . . . . .                                      | 346 |
| 144. Supplementary note (anschließend an: S. Minakshisundaram: A generalization of Epstein zeta functions) . . . . .          | 360 |
| 145. Almost periodic invariant vector sets in a metric vector space . . . . .                                                 | 362 |
| 146. Inequalities between the two kinds of eigenvalues of a linear transformation                                             | 390 |
| 147. Relativity theory as a stimulus in mathematical research . . . . .                                                       | 394 |
| 148. Shock waves in arbitrary fluids . . . . .                                                                                | 401 |

|      |                                                                                                                                         |     |
|------|-----------------------------------------------------------------------------------------------------------------------------------------|-----|
| 149. | 50 Jahre Relativitätstheorie . . . . .                                                                                                  | 421 |
| 150. | Ramifications, old and new, of the eigenvalue problem . . . . .                                                                         | 432 |
| 151. | Elementary proof of a minimax theorem due to VON NEUMANN . . . . .                                                                      | 457 |
| 152. | A half-century of mathematics . . . . .                                                                                                 | 464 |
| 153. | Radiation capacity . . . . .                                                                                                            | 495 |
| 154. | Kapazität von Strahlungsfeldern . . . . .                                                                                               | 500 |
| 155. | Die natürlichen Randwertaufgaben im Außenraum für Strahlungsfelder beliebiger Dimension und beliebigen Ranges . . . . .                 | 512 |
| 156. | Über den Symbolismus der Mathematik und mathematischen Physik . . . . .                                                                 | 527 |
| 157. | Universities and Science in Germany . . . . .                                                                                           | 537 |
| 158. | A simple example for the legitimate passage from complex numbers to numbers of an arbitrary field . . . . .                             | 563 |
| 159. | Über die kombinatorische und kontinuumsmäßige Definition der Überschneidungszahl zweier geschlossener Kurven auf einer Fläche . . . . . | 568 |
| 160. | BAUER on Theory of Groups. . . . .                                                                                                      | 590 |
| 161. | Cartan on Groups and Differential Geometry . . . . .                                                                                    | 592 |
| 162. | COURANT and HILBERT on Partial Differential Equations . . . . .                                                                         | 596 |
| 163. | Review: The philosophy of BERTRAND RUSSELL. . . . .                                                                                     | 599 |

#### *Verschiedenes*

|      |                                                                                                             |     |
|------|-------------------------------------------------------------------------------------------------------------|-----|
| 164. | Address of the President of the Fields Medal Committee 1954 . . . . .                                       | 609 |
| 165. | Address on the Unity of knowledge delivered at the Bicentennial Conference of Columbia University . . . . . | 623 |
| 166. | Erkenntnis und Besinnung . . . . .                                                                          | 631 |
| 167. | Rückblick auf Zürich aus dem Jahre 1930 . . . . .                                                           | 650 |
|      | HERMANN WEYL (1885—1955) par C. CHEVALLEY et A. WEIL . . . . .                                              | 655 |
|      | Vollständige Liste aller Titel . . . . .                                                                    | 687 |
