

Contents

1	Software Project Management: Setting the Context	1
1.1	Motivation	1
1.2	Characteristics of Software Projects and Why Software Project Management Is Difficult	3
1.3	Ten Knowledge Areas of Software Project Management	6
1.4	The Book's Coverage of the PMBOK Knowledge Areas	16
1.5	The Multidisciplinary Nature of Project Management	18
1.6	The Future of Software Engineering	19
1.7	Software Project Management: Past and Future	20
1.8	This Book	21
	References	23
 Part I Fundamentals		
2	Rethinking Success in Software Projects: Looking Beyond the Failure Factors	27
2.1	The Extent of Software Project Failures	27
2.2	Beyond Simple Success Measures	31
2.3	Rethinking Project Success	34
2.4	Towards Multiple Levels of Success	36
2.5	Mapping Success	37
2.6	Illustrative Examples	40
2.7	The Impact of Time	41
2.8	Measuring Success	42
2.9	Conclusions	46
	References	47
3	Cost Prediction and Software Project Management	51
3.1	Introduction	51
3.2	A Review of State-of-the-Art Techniques	52
3.3	A Review of Cost Estimation Research	55

3.4	The Interaction Between People and Formal Techniques	58
3.5	Practical Recommendations	63
3.6	Follow-Up Sources of Information	65
	Glossary	66
	References	68
4	Human Resource Allocation and Scheduling for Software Project Management	73
4.1	Introduction	74
4.2	Human Resource Allocation and Scheduling Approaches	76
4.3	The Implication of Software Development Personality Types	92
4.4	Further Research Trends and Challenges	100
4.5	Concluding Remarks	101
	References	102
5	Software Project Risk and Opportunity Management	107
5.1	Introduction	107
5.2	The Duality of Risks and Opportunities	108
5.3	Fundamentals of Risk–Opportunity Management	109
5.4	Risk and Opportunity Management Methods, Processes, and Tools	115
5.5	Top-10 Risk Item Tracking	117
5.6	Risk-Balanced Activity Levels	119
5.7	Summary and Conclusions	120
	References	120

Part II Supporting Areas

6	Model-Based Quality Management of Software Development Projects	125
6.1	Introduction	126
6.2	Selecting the Right Quality Models	129
6.3	Building Custom-Tailored Quality Models	136
6.4	Specification and Application of Quality Models	145
6.5	Strategic Usage of Quality Models	150
6.6	Conclusions and Future Work	153
	References	154
7	Supporting Project Management Through Integrated Management of System and Project Knowledge	157
7.1	Introduction	158
7.2	Our Vision: Integrated System and Project Knowledge Management	161
7.3	Literature Review	165
7.4	Integrating System and Project Knowledge Using Work Items	168

7.5	Integrating System and Project Knowledge Using Decisions . . .	175
7.6	Research Issues on Integrating System and Project Knowledge . . .	185
7.7	Conclusions and Outlook	187
	References	188
8	Framework for Implementing Product Portfolio Management in Software Business	193
8.1	Introduction	194
8.2	Research Approach	196
8.3	Theory-Building Case Study and Evaluation	201
8.4	Software Product Portfolio Management Implementation Framework	204
8.5	Maturity Matrix for PPM	211
8.6	Theory-Testing Case Study	214
8.7	Implications	217
8.8	Conclusions and Future Research	218
	References	219
9	Managing Global Software Projects	223
9.1	Introduction	224
9.2	Foundations	225
9.3	Benefits and Challenges	226
9.4	Global Software Development	232
9.5	Work Organization	235
9.6	Risk Management in Global Software Projects	239
9.7	Trends and Conclusions	243
	References	245
10	Motivating Software Engineers Working in Virtual Teams Across the Globe	247
10.1	Introduction	248
10.2	Motivation Theory	249
10.3	Characteristics of a Software Engineer	254
10.4	Software Engineer Motivation in GSD—A Case Study	256
10.5	Motivational Factors and GSD Guidelines	262
10.6	Theory and Practice of GSD Motivation	262
10.7	Summary and Conclusions	269
	References	271
 Part III New Paradigms		
11	Agile Project Management	277
11.1	Introduction	277
11.2	Software Project Management	278
11.3	Self-Managing Software Teams	282
11.4	Team Leadership	284

11.5	Feedback and Learning	287
11.6	Principles of Agile Project Management	292
11.7	Conclusions	296
	References	296
12	Distributed Project Management	301
12.1	Introduction	301
12.2	Ten Misconceptions in Distributed Software Development	305
12.3	Conclusions	318
	References	319
13	Management and Coordination of Free/Open Source Projects	321
13.1	Introduction	322
13.2	F/OSS Management	327
13.3	Current Challenges in F/OSS Management	332
13.4	Future Open Source Management Techniques	335
13.5	Conclusions	340
	References	340
14	Inner Source Project Management	343
14.1	Introduction	344
14.2	Inner Source	345
14.3	A Framework for Understanding Project Management in Inner Source	352
14.4	Case Studies	357
14.5	Discussion and Future Work	365
	References	367
 Part IV Emerging Techniques		
15	Search-Based Software Project Management	373
15.1	Introduction	373
15.2	Search-Based Software Engineering	375
15.3	Search-Based Software Project Management	376
15.4	Possible Directions for Future Work on Search-Based Project Management	388
15.5	Conclusions	392
	References	392
16	Social Media Collaboration in Software Projects	401
16.1	Introduction	401
16.2	Interactions in Software Projects	403
16.3	Social Aspects of Software Projects	404
16.4	Importance of Social Media in Software Projects	405
16.5	Pilot Study	405
16.6	The Future of Social Media in Software Projects	420

16.7	Conclusions	422
	References	422
17	Process Simulation: A Tool for Software Project Managers?	425
17.1	Purpose and Scope of Software Process Simulation	426
17.2	An Illustrative Application Example	428
17.3	The Gap Between State of the Art and State of Practice	438
17.4	Issues that need to be Addressed	441
17.5	Conclusions	444
	References	445
18	Occam's Razor and Simple Software Project Management	447
18.1	Introduction	447
18.2	Occam's Razor and Project Management	450
18.3	Speculation-Based Modeling (Is Difficult)	452
18.4	Support-Based Modeling (Can Be Simplified with Data Mining)	454
18.5	Spectral Learning and Project Management	461
18.6	General Applications to Project Management	469
18.7	Discussion	470
	References	471
	Index	473
