Keynote Talks

What to Make of Multicore Processors for Reliable Real-Time Systems?	1
<i>Theodore P. Baker</i>	
Control Co-design: Algorithms and Their Implementation	19
<i>Pedro Albertos, Alfons Crespo, José Simó, and Adel Fernández</i>	

Multicores and Ada

Dispatching Domains for Multiprocessor Platforms and Their Representation in Ada	41
<i>Alan Burns and Andy Wellings</i>	
Implementing Multicore Real-Time Scheduling Algorithms Based on Task Splitting Using Ada 2012	54
<i>Björn Andersson and Luís-Miguel Pinho</i>	
Preliminary Multiprocessor Support of Ada 2012 in GNU/Linux Systems	68
<i>Sergio Sáez and Alfons Crespo</i>	

Software Dependability

Practical Limits on Software Dependability: A Case Study	83
<i>Patrick J. Graydon, John C. Knight, and Xiang Yin</i>	
Program Verification in SPARK and ACSL: A Comparative Case Study	97
<i>Eduardo Brito and Jorge Sousa Pinto</i>	
Static Versioning of Global State for Race Condition Detection	111
<i>Steffen Keul</i>	

Critical Systems

Using Hardware Support for Scheduling with Ada	125
<i>Rod White</i>	
Cache-Aware Development of High-Integrity Systems	139
<i>Enrico Mezzetti, Adam Betts, José Ruiz, and Tullio Vardanega</i>	

Preservation of Timing Properties with the Ada Ravenscar Profile 153
Enrico Mezzetti, Marco Panunzio, and Tullio Vardanega

Real-Time Systems

Towards the Definition of a Pattern Sequence for Real-Time
Applications Using a Model-Driven Engineering Approach 167
*Juan Ángel Pastor, Diego Alonso, Pedro Sánchez, and
Bárbara Álvarez*

Scheduling Configuration of Real-Time Component-Based
Applications..... 181
Patricia López Martínez, Laura Barros, and José M. Drake

The Evolution of Real-Time Programming Revisited: Programming the
Giotto Model in Ada 2005 196
Andy Wellings and Alan Burns

Language Technology

AdaStreams: A Type-Based Programming Extension for Stream-
Parallelism with Ada 2005 208
Gingun Hong, Kirak Hong, Bernd Burgstaller, and Johann Blieberger

A Comparison of Generic Template Support: Ada, C++, C#, and
Java™ 222
Benjamin M. Brosgol

Towards Ada 2012: An Interim Report..... 238
Edmond Schonberg

Distribution and Persistency

Managing Transactions in Flexible Distributed Real-Time Systems 251
*Daniel Sangorrín, Michael González Harbour, Héctor Pérez, and
J. Javier Gutiérrez*

An Efficient Implementation of Persistent Objects..... 265
Jacob Sparre Andersen

Author Index..... 277
