

1	Basic Concepts	1
1.1	Definitions	1
1.2	Lie Algebras	2
1.3	Change of Basis	3
1.4	Complex Extensions	4
1.5	Lie Subalgebras	5
1.6	Abelian Algebras	6
1.7	Direct Sum	6
1.8	Ideals (Invariant Subalgebras)	8
1.9	Semisimple Algebras	8
1.10	Semidirect Sum	9
1.11	Metric Tensor	9
1.12	Compact and Non-Compact Algebras	11
1.13	Derived Algebras	11
1.14	Nilpotent Algebras	12
1.15	Invariant Casimir Operators	13
1.16	Invariant Operators for Non-Semisimple Algebras	14
1.17	Contractions of Lie Algebras	15
1.18	Structure of Lie Algebras	17
	1.18.1 Algebras with One Element	17
	1.18.2 Algebras with Two Elements	18
	1.18.3 Algebras with Three Elements	18
2	Semisimple Lie Algebras	21
2.1	Cartan–Weyl Form of a (Complex) Semisimple Lie Algebra	21
2.2	Graphical Representation of Root Vectors	22
2.3	Explicit Construction of the Cartan–Weyl Form	24
2.4	Dynkin Diagrams	25
2.5	Classification of (Complex) Semisimple Lie Algebras	27

2.6	Rules for Constructing the Root Vector Diagrams of Classical Lie Algebras	27
2.7	Rules for Constructing Root Vector Diagrams of Exceptional Lie Algebras	29
2.8	Dynkin Diagrams of Classical Lie Algebras	30
2.9	Dynkin Diagrams of Exceptional Lie Algebras	30
2.10	Cartan Matrices	30
2.11	Cartan Matrices of Classical Lie Algebras	31
2.12	Cartan Matrices of Exceptional Lie Algebras	32
2.13	Real Forms of Complex Semisimple Lie Algebras	32
2.14	Isomorphisms of Complex Semisimple Lie Algebras	33
2.15	Isomorphisms of Real Lie Algebras	33
2.16	Enveloping Algebra	33
2.17	Realizations of Lie Algebras	34
2.18	Other Realizations of Lie Algebras	35
3	Lie Groups	37
3.1	Groups of Transformations	37
3.2	Groups of Matrices	38
3.3	Properties of Matrices	38
3.4	Continuous Matrix Groups	39
3.5	Examples of Groups of Transformations	43
3.5.1	The Rotation Group in Two Dimensions, $SO(2)$	43
3.5.2	The Lorentz Group in One Plus One Dimension, $SO(1, 1)$	44
3.5.3	The Rotation Group in Three Dimensions, $SO(3)$	45
3.5.4	The Special Unitary Group in Two Dimensions, $SU(2)$	46
3.5.5	Relation Between $SO(3)$ and $SU(2)$	47
3.6	Other Important Groups of Transformations	48
3.6.1	Translation Group, $T(n)$	48
3.6.2	Affine Group, $A(n)$	49
3.6.3	Euclidean Group, $E(n)$	49
3.6.4	Poincare' Group, $P(n)$	50
3.6.5	Dilatation Group, $D(1)$	50
3.6.6	Special Conformal Group, $C(n)$	51
3.6.7	General Conformal Group, $GC(n)$	51
4	Lie Algebras and Lie Groups	53
4.1	The Exponential Map	53
4.2	Definition of Exp	53
4.3	Matrix Exponentials	54
4.4	More on Exponential Maps	55
4.5	Infinitesimal Transformations	56

5	Homogeneous and Symmetric Spaces (Coset Spaces)	57
5.1	Definitions	57
5.2	Cartan Classification	58
5.3	How to Construct Coset Spaces	58
6	Irreducible Bases (Representations)	61
6.1	Definitions	61
6.2	Abstract Characterization	61
6.3	Irreducible Tensors	61
6.3.1	Irreducible Tensors with Respect to $GL(n)$	61
6.3.2	Construction of Irreducible Tensors with Respect to $GL(n)$. Young Method	63
6.3.3	Irreducible Tensors with Respect to $SU(n)$	65
6.3.4	Irreducible Tensors with Respect to $SO(n)$	65
6.4	Tensor Representations of Classical Compact Algebras	66
6.4.1	Unitary Algebras $u(n)$	66
6.4.2	Special Unitary Algebras $su(n)$	66
6.4.3	Orthogonal Algebras $so(n)$, $n = \text{Odd}$	67
6.4.4	Orthogonal Algebras $so(n)$, $n = \text{Even}$	67
6.4.5	Symplectic Algebras $sp(n)$, $n = \text{Even}$	67
6.5	Spinor Representations	68
6.5.1	Orthogonal Algebras $so(n)$, $n = \text{Odd}$	68
6.5.2	Orthogonal Algebras $so(n)$, $n = \text{Even}$	69
6.6	Fundamental Representations	69
6.6.1	Unitary Algebras	69
6.6.2	Special Unitary Algebras	70
6.6.3	Orthogonal Algebras, $n = \text{Odd}$	70
6.6.4	Orthogonal Algebras, $n = \text{Even}$	70
6.6.5	Symplectic Algebras	71
6.7	Realization of Bases	71
6.8	Chains of Algebras	72
6.9	Canonical Chains	72
6.9.1	Unitary Algebras	72
6.9.2	Orthogonal Algebras	74
6.10	Isomorphisms of Spinor Algebras	75
6.11	Nomenclature for $u(n)$	76
6.12	Dimensions of the Representations	77
6.12.1	Dimensions of the Representations of $u(n)$	77
6.12.2	Dimensions of the Representations of $su(n)$	78
6.12.3	Dimensions of the Representations of $A_n \equiv su(n+1)$	78
6.12.4	Dimensions of the Representations of $B_n \equiv so(2n+1)$	79
6.12.5	Dimensions of the Representations of $C_n \equiv sp(2n)$	79
6.12.6	Dimensions of the Representations of $D_n \equiv so(2n)$	80

6.13	Action of the Elements of g on the Basis $\mathcal{B}$	80
6.14	Tensor Products	83
6.15	Non-canonical Chains	87
7	Casimir Operators and Their Eigenvalues	93
7.1	Definitions	93
7.2	Independent Casimir Operators	93
7.2.1	Casimir Operators of $u(n)$	93
7.2.2	Casimir Operators of $su(n)$	94
7.2.3	Casimir Operators of $so(n)$, $n = \text{Odd}$	95
7.2.4	Casimir Operators of $so(n)$, $n = \text{Even}$	95
7.2.5	Casimir Operators of $sp(n)$, $n = \text{Even}$	95
7.2.6	Casimir Operators of the Exceptional Algebras	96
7.3	Complete set of Commuting Operators	96
7.3.1	The Unitary Algebra $u(n)$	96
7.3.2	The Orthogonal Algebra $so(n)$, $n = \text{Odd}$	97
7.3.3	The Orthogonal Algebra $so(n)$, $n = \text{Even}$	97
7.4	Eigenvalues of Casimir Operators	97
7.4.1	The Algebras $u(n)$ and $su(n)$	97
7.4.2	The Orthogonal Algebra $so(2n + 1)$	100
7.4.3	The Symplectic Algebra $sp(2n)$	102
7.4.4	The Orthogonal Algebra $so(2n)$	103
7.5	Eigenvalues of Casimir Operators of Order One and Two	105
8	Tensor Operators	107
8.1	Definitions	107
8.2	Coupling Coefficients	108
8.3	Wigner-Eckart Theorem	109
8.4	Nested Algebras: Racah's Factorization Lemma	111
8.5	Adjoint Operators	114
8.6	Recoupling Coefficients	115
8.7	Symmetry Properties of Coupling Coefficients	117
8.8	How to Compute Coupling Coefficients	117
8.9	How to Compute Recoupling Coefficients	118
8.10	Properties of Recoupling Coefficients	119
8.11	Double Recoupling Coefficients	120
8.12	Coupled Tensor Operators	121
8.13	Reduction Formula of the First Kind	122
8.14	Reduction Formula of the Second Kind	123
9	Boson Realizations	125
9.1	Boson Operators	125
9.2	The Unitary Algebra $u(1)$	126
9.3	The Algebras $u(2)$ and $su(2)$	128
9.3.1	Subalgebra Chains	128

9.4	The Algebras $u(n)$, $n \geq 3$	132
9.4.1	Racah Form	132
9.4.2	Tensor Coupled Form of the Commutators	133
9.4.3	Subalgebra Chains Containing $so(3)$	134
9.5	The Algebras $u(3)$ and $su(3)$	135
9.5.1	Subalgebra Chains	135
9.5.2	Lattice of Algebras	139
9.5.3	Boson Calculus of $u(3) \supset so(3)$	139
9.5.4	Matrix Elements of Operators in $u(3) \supset so(3)$	141
9.5.5	Tensor Calculus of $u(3) \supset so(3)$	142
9.5.6	Other Boson Constructions of $u(3)$	143
9.6	The Unitary Algebra $u(4)$	145
9.6.1	Subalgebra Chains not Containing $so(3)$	145
9.6.2	Subalgebra Chains Containing $so(3)$	146
9.7	The Unitary Algebra $u(6)$	152
9.7.1	Subalgebra Chains not Containing $so(3)$	152
9.7.2	Subalgebra Chains Containing $so(3)$	152
9.8	The Unitary Algebra $u(7)$	162
9.8.1	Subalgebra Chain Containing g_2	162
9.8.2	The Triplet Chains	164
9.9	Contractions of Bosonic Algebras	170
9.9.1	The Heisenberg Algebra $h(2)$	170
9.9.2	The Heisenberg Algebra $h(n)$, $n = \text{Even}$	171
10	Fermion Realizations	175
10.1	Fermion Operators	175
10.2	Lie Algebras Constructed with Fermion Operators	176
10.3	Racah Form	177
10.4	The Algebras $u(2j + 1)$	178
10.4.1	Subalgebra Chain Containing $Spin(3)$	178
10.4.2	The Algebras $u(2)$ and $su(2)$: Spinors	179
10.4.3	The Algebra $u(4)$	180
10.4.4	The Algebra $u(6)$	182
10.4.5	Branchings of $u(2j + 1)$	183
10.5	The Algebra $u(\sum_i (2j_i + 1))$	183
10.6	Internal Degrees of Freedom (Different Spaces)	184
10.6.1	The Algebras $u(4)$ and $su(4)$	184
10.6.2	The Algebras $u(6)$ and $su(6)$	185
10.7	Internal Degrees of Freedom (Same Space)	187
10.7.1	The Algebra $u((2l + 1)(2s + 1))$: L - S Coupling	187
10.7.2	The Algebra $u(\sum_j (2j + 1))$: j - j Coupling	190
10.7.3	The Algebra $u((\sum_l (2l + 1))(2s + 1))$: Mixed L - S Configurations	191

11	Differential Realizations	193
11.1	Differential Operators	193
11.2	Unitary Algebras $u(n)$	193
11.3	Orthogonal Algebras $so(n)$	194
11.3.1	Casimir Operators: Laplace-Beltrami Form	197
11.3.2	Basis for the Representations	197
11.4	Orthogonal Algebras $so(n, m)$	198
11.5	Symplectic Algebras $sp(2n)$	199
12	Matrix Realizations	201
12.1	Matrices	201
12.2	Unitary Algebras $u(n)$	202
12.3	Orthogonal Algebras $so(n)$	205
12.4	Symplectic Algebras $sp(2n)$	205
12.5	Basis for the Representation	207
12.6	Casimir Operators	208
13	Coset Spaces	211
13.1	Coset Spaces $U(n)/U(n-1) \otimes U(1)$	211
13.2	Coherent (or Intrinsic) States	212
13.2.1	'Algebraic' Coherent States	212
13.2.2	'Group' Coherent States	213
13.2.3	'Projective' Coherent States	214
13.2.4	Coset Spaces	215
13.3	Coherent States of $u(n)$, $n = \text{Even}$	215
13.3.1	Coherent States of $u(2)$	216
13.3.2	Coherent States of $u(4)$	216
13.3.3	Coherent States of $u(6)$	218
13.4	Coherent States of $u(n)$, $n = \text{Odd}$	220
13.4.1	Coherent States of $u(3)$	220
13.5	Generalized Coherent States	221
13.6	The Geometry of Algebraic Models	221
13.7	Coset Spaces $SO(n+m)/SO(n) \otimes SO(m)$	222
13.7.1	The Coset Space $SO(3)/SO(2)$: The Sphere S^2	222
13.7.2	The Coset Space $SO(4)/SO(3)$	224
13.7.3	The Coset Spaces $SO(n+2)/SO(n) \otimes SO(2)$	226
13.8	Coset Spaces $SO(n, m)/SO(n) \otimes SO(m)$	229
13.8.1	The Coset Space $SO(2, 1)/SO(2)$: The Hyperboloid H^2	229
13.8.2	The Coset Space $SO(3, 1)/SO(3)$	230
13.9	Action of the Coset $P = G/H$	231
13.9.1	Cosets $SO(n+1)/SO(n)$	231
13.9.2	Cosets $SO(n, 1)/SO(n)$	233
14	Spectrum Generating Algebras and Dynamic Symmetries	235
14.1	Spectrum Generating Algebras	235
14.2	Dynamic Symmetries	236

14.3	Bosonic Systems	236
14.3.1	Dynamic Symmetries of $u(4)$	237
14.3.2	Dynamic Symmetries of $u(6)$	240
14.4	Fermionic Systems	242
14.4.1	Dynamic Symmetry of $u(4)$	243
14.4.2	Dynamic Symmetry of $u(6)$	244
15	Degeneracy Algebras and Dynamical Algebras	247
15.1	Degeneracy Algebras	247
15.2	Degeneracy Algebras in $\nu \geq 2$ Dimensions	248
15.2.1	The Isotropic Harmonic Oscillator	248
15.2.2	The Coulomb Problem	251
15.3	Degeneracy Algebra in $\nu = 1$ Dimension	256
15.4	Dynamical Algebras	256
15.5	Dynamical Algebras in $\nu \geq 2$ Dimensions	257
15.5.1	Harmonic Oscillator	257
15.5.2	Coulomb Problem	257
15.6	Dynamical Algebra in $\nu = 1$ Dimension	258
15.6.1	Pöschl-Teller Potential	258
15.6.2	Morse Potential	260
15.6.3	Lattice of Algebras	263
