

Table of Contents

Track: GPU Computing

Efficient Symmetric Band Matrix-Matrix Multiplication on GPUs	1
<i>Ernesto Dufrechou, Pablo Ezzatti, Enrique S. Quintana-Ortí, and Alfredo Remón</i>	

Track: Grid and Cloud Computing

Adaptive Spot-Instances Aware Autoscaling for Scientific Workflows on the Cloud	13
<i>David A. Monge and Carlos García Garino</i>	
SI-Based Scheduling of Parameter Sweep Experiments on Federated Clouds	28
<i>Elina Pacini, Cristian Mateos, and Carlos García Garino</i>	
Distributed Cache Strategies for Machine Learning Classification Tasks over Cluster Computing Resources	43
<i>John Edison Arévalo Ovalle, Raúl Ramos-Pollan, and Fabio A. González</i>	
A Flexible Strategy for Distributed and Parallel Execution of a Monolithic Large-Scale Sequential Application	54
<i>Felipe Navarro, Carlos González, Óscar Peredo, Gerson Morales, Álvaro Egaña, and Julián M. Ortiz</i>	
A Model to Calculate Amazon EC2 Instance Performance in Frost Prediction Applications	68
<i>Lucas Iacono, José Luis Vázquez-Poletti, Carlos García Garino, and Ignacio Martín Llorente</i>	
Ensemble Learning of Run-Time Prediction Models for Data-Intensive Scientific Workflows	83
<i>David A. Monge, Matěj Holec, Filip Železný, and Carlos García Garino</i>	
Implications of CPU Dynamic Performance and Energy-Efficient Technologies on the Intrusiveness Generated by Desktop Grids Based on Virtualization	98
<i>Germán Sotelo, Eduardo Rosales, and Harold Castro</i>	

Efficient Fluorescence Microscopy Analysis over a Volunteer Grid/Cloud Infrastructure	113
<i>Miguel Da Silva, Sergio Nesmachnow, Maximiliano Geier, Esteban Mocskos, Juan Angiolini, Valeria Levi, and Alfredo Cristobal</i>	

Track: HPC Architectures and Tools

Multiobjective Energy-Aware Datacenter Planning Accounting for Power Consumption Profiles	128
<i>Sergio Nesmachnow, Cristian Perfumo, and Íñigo Goiri</i>	
An Empirical Study of the Robustness of Energy-Aware Schedulers for High Performance Computing Systems under Uncertainty	143
<i>Santiago Iturriaga, Sebastián García, and Sergio Nesmachnow</i>	
MBSPDiscover: An Automatic Benchmark for MultiBSP Performance Analysis	158
<i>Marcelo Alaniz, Sergio Nesmachnow, Brice Goglin, Santiago Iturriaga, Verónica Gil Gosta, and Marcela Printista</i>	
Flexicache: Highly Reliable and Low Power Cache under Supply Voltage Scaling	173
<i>Gulay Yalcin, Azam Seyedi, Osman S. Unsal, and Adrian Cristal</i>	

Track: Parallel Programming

A Parallel Discrete Firefly Algorithm on GPU for Permutation Combinatorial Optimization Problems	191
<i>Pablo Vidal and Ana Carolina Olivera</i>	
A Parallel Multilevel Data Decomposition Algorithm for Orientation Estimation of Unmanned Aerial Vehicles	206
<i>Claudio Paz, Sergio Nesmachnow, and Julio H. Toloza</i>	

Track: Scientific Computing

A Numerical Solution for Wootters Correlation	221
<i>Abdul Hissami, Alberto Pretel, and E. Tamura</i>	
Solving Nonlinear, High-Order Partial Differential Equations Using a High-Performance Isogeometric Analysis Framework	236
<i>Adriano M.A. Côrtes, Philippe Vignal, Adel Sarmiento, Daniel García, Nathan Collier, Lisandro Dalcin, and Victor M. Calo</i>	

Alya Multiphysics Simulations on Intel's Xeon Phi Accelerators	248
<i>Mariano Vázquez, Guillaume Houzeaux, Félix Rubio, and Christian Simarro</i>	
Author Index	255
