

Contents

Part I Fundamentals of Bioluminescence

How Synthetic Biology Will Reconsider Natural Bioluminescence and Its Applications	3
Benjamin Reeve, Theo Sanderson, Tom Ellis and Paul Freemont	
Optimization of the Firefly Luciferase Reaction for Analytical Purposes	31
Arne Lundin	

Part II Applications of Bioluminescence in Environment and Security

Evaluation of the Ecotoxicity of Pollutants with Bioluminescent Microorganisms	65
Francisca Fernández-Piñas, Ismael Rodea-Palomares, Francisco Leganés, Miguel González-Pleiter and M. Angeles Muñoz-Martín	
Molecular Manipulations for Enhancing Luminescent Bioreporters Performance in the Detection of Toxic Chemicals	137
Sharon Yagur-Kroll and Shimshon Belkin	

Part III Applications of Bioluminescence in Agriculture and Bioprocess

Biosensors, Antibiotics and Food	153
Nina Virolainen and Matti Karp	

Part IV Applications of Bioluminescence in Health

Rapid In-vitro Testing for Chemotherapy Sensitivity in Leukaemia Patients	189
Elizabeth Anderson and Vyv Salisbury	
Index	215
