

Contents

Session 1: Prospects, Legal Regulation, Perception – Part 1

Railway Noise Control in Europe: Current Status	1
<i>J. Oertli</i>	
Novel Legislation for Railway Lines and Motorways in The Netherlands . . .	7
<i>P.H. de Vos</i>	
Bearable Railway Noise Limits in Europe	13
<i>F.B.J. Elbers, E. Verheijen</i>	
State-of-the-Art of the Noise Emission of Railway Cars	21
<i>S. Lutzenberger, C. Gutmann, U. Reichart</i>	

Session 2: Prospects, Legal Regulation, Perception – Part 2

On Separation of Vehicle Noise for Limit Setting in Future Legislation	31
<i>T. Thron, S. Leth, B. Stegemann</i>	

Session 2: Wheel and Rail Noise – Part 1

Estimating the Performance of Wheel Dampers Using Laboratory Methods and a Prediction Tool	39
<i>B. Betgen, P. Bouvet, G. Squicciarini, D.J. Thompson, C.J.C. Jones</i>	
Estimating the Performance of Rail Dampers Using Laboratory Methods and Software Predictions	47
<i>M.G.R. Toward, G. Squicciarini, D.J. Thompson, Y. Gao</i>	
Experimental and Theoretical Studies on Impact Noise Generation due to Rail Joints	55
<i>T. Kitagawa, K. Murata, T. Kawaguchi, S. Tanaka, K. Nagakura</i>	

An Explicit Integration Finite Element Method for Impact Noise Generation at a Squat	63
<i>Z. Yang, Z. Li, R.P.B.J. Dollevoet</i>	
Poster Session 1: Prospects, Legal Regulation, Perception/Wheel and Rail Noise/Prediction, Measurements, Monitoring	
Future European Noise Emission Ceilings: Threat or Solution? A Review Based on Swiss and Dutch Ceilings	71
<i>E. Verheijen, F.B.J. Elbers</i>	
Comparison between Road and Rail Noise Cost per Transported Ton of Cargo	79
<i>M. Ögren, H. Andersson, T. Jerson</i>	
A Survey of Freight Locomotive Passby Noise Emissions	85
<i>B.E. Croft, B. Dowdell, D. Hanson, D.C. Anderson</i>	
On the Importance of Accuracy of Geographic Model Data for Noise Impact Studies	93
<i>A.H.W.M. Kuijpers, M.S. Roovers, G.H. Groenveld</i>	
The Efficiency of Noise Reduction Measures on Railway Infrastructure in Normal Operating Conditions - NOVIBRAIL	101
<i>J. Hlavdčák, L. Hejzlár, R. Kolmačka</i>	
Characterizing Wheel Flat Impact Noise with an Efficient Time Domain Model	109
<i>J. Yang, D.J. Thompson, Y. Takano</i>	
Study on the Sound Radiation Directivity of a Railway Wheel and the Relationship between Directivity and Mode Shape	117
<i>J. Han, X.B. Xiao, R.Q. Wang, X. Zhao, G.T. Zhao, X.S. Jin</i>	
Empirical Modeling of Railway Aerodynamic Noise Using One Microphone Pass-By Recording	125
<i>X. Zhang</i>	
Localizing Noise Sources on a Rail Vehicle during Pass-By	133
<i>J. Gomes, J. Hald, B. Ginn</i>	
Experimental Characterization of the Vibro-Acoustic Behaviour of a Switch	141
<i>B. Faure, E. Bongini, A. Renoncourt, A. Pouzet</i>	

Experimental Comparison of Maximum Length Sequence (MLS) and Impact Hammer Methods to Evaluate Vibration Transfer Functions in Soil	149
<i>G. Coquel, A. Kengni Kengang</i>	
sonRAIL Web Tool – A New Web Application of the Swiss Method on Railway Noise Calculation Released in 2013	157
<i>C. Czolbe, J.-M. Wunderli, F. Fischer</i>	
Concept for Measuring Aeroacoustic Noise Transmission in Trains Derived from Experience Gained in Aircraft Testing	165
<i>J. Galuba (formerly Kokavec), C. Spehr</i>	
Session 3: Wheel and Rail Noise – Part 2	
Innovative Measures for Reducing Noise Radiation from Track	173
<i>M. Beier, T. Lölgen, M. Starnberg</i>	
Innovative Noise Mitigation Measures in the Framework of “Konjunkturprogramm II” in Germany	181
<i>U. Moehler, M. Liepert, A. Martens</i>	
Session 3: Prediction, Measurements, Monitoring – Part 1	
Indirect Method of Rail Roughness Measurement – VUKV Implementation and Initial Results	189
<i>L. Phamová, P. Bauer, J. Malinský, M. Richter</i>	
Background for a New Standard on Pass-By Measurement of Combined Roughness, Track Decay Rate and Vibroacoustic Transfer Functions	197
<i>M.G. Dittrich, F. Létourneaux, H. Dupuis</i>	
Monitoring Rail Condition Based on Sound and Vibration Sensors Installed on an Operational Train	205
<i>T. Jensen, S. Chauhan, K. Haddad, W. Song, S. Junge</i>	
Session 4: Prediction, Measurements, Monitoring – Part 2	
Transposition of Noise Type Test Data for Tracks and Vehicles	213
<i>H.W. Jansen, M.G. Dittrich, G. Squicciarini, D.J. Thompson, B. Betgen</i>	
Virtual Testing within the TSI Noise: How to Introduce Numerical Simulation into a Certification Process?	221
<i>E. Bongini, R. Cordero</i>	
A Study of the Measurement Technology of Noise Sources of High-Speed Trains	229
<i>H.I. Koh, A. Nordborg, H.M. Noh</i>	

Determination of Insertion Losses for Vibration Mitigation Measures in Track by Artificial Vibration Excitation	237
<i>R. Garburg, D. Heiland, M. Mistler</i>	

The Prediction of Vibration Transfer for Railway Induced Ground Vibration	245
<i>H. Verbraken, N. Veirman, V. Cuellar, G. Lombaert, G. Degrande</i>	

Session 5: Ground-Borne Vibration – Part 1

Invited Paper: Ground-Borne Vibration due to Railway Traffic: A Review of Excitation Mechanisms, Prediction Methods and Mitigation Measures	253
<i>G. Lombaert, G. Degrande, S. François, D.J. Thompson</i>	

Prediction of Railway Induced Vibration and Ground Borne Noise Exposure in Building and Associated Annoyance	289
<i>M. Villot, S. Bailhache, C. Guigou, P. Jean</i>	

Attenuation of Railway Noise and Vibration in Two Concrete Frame Multi-storey Buildings	297
<i>D.E.J. Lurcock, D.J. Thompson, O.G. Bewes</i>	

Session 6: Ground-Borne Vibration – Part 2

Developing a Good Practice Guide on the Evaluation of Human Response to Vibration from Railways in Residential Environments	305
<i>J.S. Woodcock, E. Peris, D.C. Waddington, A.T. Moorhouse</i>	

Vibration Control at Sound Transit	313
<i>J.T. Nelson, D.L. Watry</i>	

Recent Developments in the Pipe-in-Pipe Model for Underground-Railway Vibration Predictions	321
<i>K.A. Kuo, S.W. Jones, M.F.M. Hussein, H.E.M. Hunt</i>	

Prediction of Railway-Induced Ground Vibrations: The Use of Minimal Coordinate Method for Vehicle Modelling	329
<i>G. Kouroussis, G. Alexandrou, J. Florentin, O. Verlinden</i>	

Poster Session 2: Interior Noise, Sound Barrier/Grinding, Corrugation, Roughness/Resilient Track Forms

Transfer Path Analysis on a Siemens Combino-Plus Tram in Almada – Seixal (Lisbon)	337
<i>G. Schleinzer, T. Kern</i>	

Characteristics of Sound Insulation and Insertion Loss of Different Deloading Sound Barriers for High-Speed Railways	345
<i>B. He, X.B. Xiao, X. Zhou, J. Han, X.S. Jin</i>	
Optimizing Capacity of Railroad Yards within Noise Limits Using a Dynamic Noise Model	353
<i>S.N. Hoogzaad, M.S. Roovers</i>	
Modeling of Wheel-Track Interaction with Rail Vibration Damper and Its Application for Suppressing Short Pitch Rail Corrugation	361
<i>T.X. Wu, Y.R. Wang</i>	
Investigating the Effects of a Network-Wide Rail Grinding Strategy on Wayside Noise Levels	369
<i>N.J. Craven, O.G. Bewes, B.A. Fenech, R.R.K. Jones</i>	
Acoustic and Dynamic Characteristics of a Complex Urban Turnout Using Fibre-Reinforced Foamed Urethane (FFU) Bearers	377
<i>S. Kaewunruen</i>	
Ensuring Acceptable Vibration Levels in Listed Buildings by Means of Precise Vibration Measurements and Highly-Efficient Floating Slab Track	385
<i>T. Jaquet</i>	
An Assessment of the Effectiveness of Replacing Slab Track to Control Groundborne Noise and Vibration in Buildings above an Existing Railway Tunnel	393
<i>O.G. Bewes, L.J. Jakielaszek, M.L. Richardson</i>	
Mitigation Measures against Vibration for Ballasted Tracks – Optimisation of Sleepers, Sleeper Pads and the Substructure by Combined Finite-Element Boundary-Element Calculations	401
<i>L. Auersch, W. Rücker</i>	
Session 7: Squeal Noise, Structure-Borne Noise	
Innovative Measures for Reducing Noise Radiation from Steel Railway Bridges	409
<i>D. Stiebel, T. Lölgen, C. Gerbig</i>	
Modelling of Railway Curve Squeal Including Effects of Wheel Rotation ...	417
<i>A. Pieringer, L. Baeza, W. Kropp</i>	
FASTSIM with Falling Friction and Friction Memory	425
<i>E.A.H. Vollebregt</i>	
Towards an Engineering Model for Curve Squeal	433
<i>I. Zenzerovic, A. Pieringer, W. Kropp</i>	

An Investigation of the Influence of Track Dynamics on Curve Noise	441
<i>J. Jiang, I. Ying, D. Hanson, D.C. Anderson</i>	
Field Trials of Gauge Face Lubrication and Top-of-Rail Friction Modification for Curve Noise Mitigation	449
<i>D. Curley, D.C. Anderson, J. Jiang, D. Hanson</i>	
Session 8: High-Speed Trains, Aerodynamic Noise – Part 1	
Invited Paper: Railway Noise Generated by High-Speed Trains	457
<i>F. Poisson</i>	
Component-Based Model for Aerodynamic Noise of High-Speed Trains	481
<i>E. Latorre Iglesias, D.J. Thompson, M.G. Smith</i>	
Analysis of Aerodynamic and Aeroacoustic Behaviour of a Simplified High-Speed Train Bogie	489
<i>J.Y. Zhu, Z.W. Hu, D.J. Thompson</i>	
Derivation of Sound Emission Source Terms for High Speed Trains Running at Speeds in Excess of 300 km/h	497
<i>T. Marshall, B.A. Fenech, R. Greer</i>	
Session 9: High-Speed Trains, Aerodynamic Noise – Part 2	
Mastering Micro-Pressure Wave Effects at the Katzenbergtunnel – Design of Measures, Prediction of Efficiency and Full-Scale Test Verification	505
<i>M. Hieke, C. Gerbig, T. Tielkes</i>	
Aerodynamic Noise Reduction of a Pantograph Panhead by Applying a Flow Control Method	515
<i>T. Mitsumoji, T. Sueki, N. Yamazaki, Y. Sato, M. Ikeda, R. Takinami, H. Gejima, K. Fukagata</i>	
Session 9: Ground-Borne Vibration – Part 3	
Reduction of Train Induced Ground Vibration by Vehicle Design	523
<i>A. Mirza, A. Frid, J.C.O. Nielsen</i>	
RIVAS – Mitigation Measures on Vehicles (WP5); Experimental Analysis of SBB Ground Vibration Measurements and Vehicle Data	531
<i>Ph. Huber, B. Nélain, R. Müller</i>	
Stiff Wave Barriers for the Mitigation of Railway Induced Vibrations	539
<i>P. Coulier, A. Dijckmans, J. Jiang, D.J. Thompson, G. Degrande, G. Lombaert</i>	

Poster Session 3: Ground-Borne Vibration/High-Speed Trains, Aerodynamic Noise/Squeal Noise, Structure-Borne Noise

Ground-Borne Vibration Mitigation Measures for Turnouts: State-of-the-Art and Field Tests	547
<i>R. Müller, J.C.O. Nielsen, B. Nélain, A. Zemp</i>	
Reducing Railway Induced Ground-Borne Vibration by Using Trenches and Buried Soft Barriers	555
<i>J. Jiang, M.G.R. Toward, A. Dijckmans, D.J. Thompson, G. Degrande, G. Lombaert, J. Ryue</i>	
Pantograph Area Noise and Vibration Transmission Characteristics and Interior Noise Reduction Method of High-Speed Trains	563
<i>J.Q. Guo, J.M. Ge, Z.J. Sun, S.Q. Liu, Y.J. Zhao, J.S. Lin</i>	
Micro-Pressure Wave Emissions from German High-Speed Railway Tunnels – An Approved Method for Prediction and Acoustic Assessment . . .	571
<i>C. Gerbig, M. Hieke</i>	
Three Noise Mitigation Measures for Steel Railway Bridges	579
<i>H. Venghaus</i>	
The Mechanisms of Curve Squeal	587
<i>J. Jiang, D.C. Anderson, R. Dwight</i>	
Proposals for Improved Measurement Methods for Curve Squeal and Braking Noise	595
<i>M.G. Dittrich, H.W. Jansen</i>	
Curve Squeal in the Presence of Two Wheel/Rail Contact Points	603
<i>G. Squicciarini, S. Usberti, D.J. Thompson, R. Corradi, A. Barbera</i>	

Session 10: Resilient Track Forms

A Review of Measurement Data on the Performance of a Resilient Track Form as a Mitigation Measure for Ground-Borne Noise	611
<i>S.J. Cox, D. Herron</i>	
Challenges in the Design and Fabrication of Elastomeric Springs for Floating Slab Tracks	619
<i>S. Rajaram, H.J. Saurenman</i>	
Vibration Mitigation by Innovative Low Stiffness Rail Fastening Systems for Ballasted Track	627
<i>B. Faure, E. Bongini, G. Lombaert, C. Guigou-Carter, D. Herron</i>	

Control of Railway Induced Ground Vibrations: Influence of Excitation Mechanisms on the Efficiency of Resilient Track Layers	635
<i>B. Nélain, N. Vincent, G. Lombaert, G. Degrande</i>	

Session 11: Grinding, Corrugation, Roughness

Measurement of Long Wavelength Irregularities on Rails	643
<i>S.L. Grassie</i>	

Statistical Description of Wheel Roughness	651
<i>G. Squicciarini, M.G.R. Toward, D.J. Thompson, C.J.C. Jones</i>	

Rail Corrugation Growth on Curves – Measurements, Modelling and Mitigation	659
<i>P.T. Torstensson, J.C.O. Nielsen</i>	

Effects of Track Stiffness and Tuned Rail Damper on Rail Roughness Growth and Rail Vibration Levels on Metro System	667
<i>A. Wang, Z. Wang, Z. Zhao, Y. Zhang, Y. Duan, T. Lei, M. Du</i>	

Session 11: Interior Noise, Sound Barrier – Part 1

Prediction of Acoustical Wall Pressure Levels of Rolling Stock Vehicles	675
<i>A. Bistagnino, A. Vallespín, J. Sapena</i>	

Session 12: Interior Noise, Sound Barrier – Part 2

Study on Effective Sound Barriers for High Speed Trains	683
<i>T. Kitagawa, K. Nagakura, S. Tanaka, K. Murata</i>	

Study on Abnormal Interior Noise of High-Speed Trains	691
<i>J. Zhang, X.B. Xiao, G. Han, Y. Deng, X.S. Jin</i>	

Interior Noise Prediction of High-Speed Train Based on Hybrid FE-SEA Method	699
<i>Y.J. Zhao, X. Deng, S.Q. Liu, R. Shuai, Z.J. Sun, J.Q. Guo, Y. Xu</i>	

Attractive Train Interiors: Minimizing Annoying Sound and Vibration	707
<i>U. Orrenius, U. Carlsson</i>	

Author Index	715
