

Table of Contents

Keynote

Conjoint Mining of Data and Content with Applications in Business, Bio-medicine, Transport Logistics and Electrical Power Systems.....	1
<i>Tharam S. Dillon, Yi-Ping Phoebe Chen, Elizabeth Chang, and Mukesh Mohania</i>	

Learning-Ensemble Learning

Breaking Ties of Plurality Voting in Ensembles of Distributed Neural Network Classifiers Using Soft Max Accumulations	20
<i>Yiannis Kokkinos and Konstantinos G. Margaritis</i>	
Predicting Firms' Credit Ratings Using Ensembles of Artificial Immune Systems and Machine Learning – An Over-Sampling Approach	29
<i>Petr Hájek and Vladimír Olej</i>	
Automating Transition Functions: A Way to Improve Trading Profits with Recurrent Reinforcement Learning	39
<i>Jin Zhang</i>	
Utilising Tree-Based Ensemble Learning for Speaker Segmentation	50
<i>Mohamed Abou-Zleikha, Zheng-Hua Tan, Mads Græsbøll Christensen, and Søren Holdt Jensen</i>	

Social Media and Mobile Applications of AI

Speakers' Language Characteristics Analysis of Online Educational Videos.....	60
<i>Dimitrios Kravvaris and Katia Lida Kermanidis</i>	
Fall Detection Using Commodity Smart Watch and Smart Phone	70
<i>Ilias Maglogiannis, Charalampos Ioannou, George Spyroglou, and Panayiotis Tsanakas</i>	
Predicting Information Diffusion Patterns in Twitter	79
<i>Eleanna Kafeza, Andreas Kanavos, Christos Makris, and Pantelis Vikatos</i>	
An Ensemble of HMMs for Cognitive Fault Detection in Distributed Sensor Networks	90
<i>Manuel Roveri and Francesco Trovò</i>	

Modeling ReTweet Diffusion Using Emotional Content 101
*Andreas Kanavos, Isidoros Perikos, Pantelis Vikatos,
Ioannis Hatzilygeroudis, Christos Makris, and Athanasios Tsakalidis*

Hybrid - Changing Environments

A Partially-Observable Markov Decision Process for Dealing with
Dynamically Changing Environments 111
Sotirios P. Chatzis and Dimitrios Kosmopoulos

Platform for Simulation and Improvement of Swarm Behavior in
Changing Environments 121
Sergi Canyameres and Doina Logofătu

A Neuro-memetic System for Music Composing 130
Jacek Mańdziuk, Aleksandra Woźniczko, and Marcin Goss

Profound Degree: A Conservative Heuristic to Repair Dynamic CSPs . . . 140
*Yosra Acodad, Amine Benamrane, Imade Benelallam, and
El Houssine Bouyahkf*

Agents (AGE)

A Greedy Agent-Based Resource Allocation in the Smart Electricity
Markets 150
*Armin Ghasem Azar, Mansoor Davoodi, Mohsen Afsharchi, and
Bahram Sadeghi Bigham*

Implicit Predictive Indicators: Mouse Activity and Dwell Time 162
Stephen Akuma, Chrisina Jayne, Rahat Iqbal, and Faiyaz Doctor

Normative Monitoring of Agents to Build Trust in an Environment for
B2B 172
*Eugénio Oliveira, Henrique Lopes Cardoso,
Maria Joana Urbano, and Ana Paula Rocha*

Extending the Kouretes Statechart Editor for Generic Agent Behavior
Development 182
*Georgios Papadimitriou, Nikolaos I. Spanoudakis, and
Michail G. Lagoudakis*

Hierarchic Fuzzy Approach Applied in the Development of an
Autonomous Architecture for Mobile Agents 193
*Márcio Mendonça, Esdras Salgado da Silva,
Karina Assolari Takano, Mauricio Iwama Takano, and
Lúcia Valéria Ramos de Arruda*

Classification Pattern Recognition

Classification of Mammograms Using Cartesian Genetic Programming Evolved Artificial Neural Networks	203
<i>Arbab Masood Ahmad, Gul Muhammad Khan, and Sahibzada Ali Mahmud</i>	
A Face Recognition Based Multiplayer Mobile Game Application	214
<i>Ugur Demir, Esam Ghaleb, and Hazim Kemal Ekenel</i>	
A Dynamic Questionnaire to Further Reduce Questions in Learning Style Assessment	224
<i>Esperance Mwamikazi, Philippe Fournier-Viger, Chadia Moghrabi, and Robert Baudouin</i>	
Recognizing Emotions from Facial Expressions Using Neural Network . . .	236
<i>Isidoros Perikos, Epaminondas Ziakopoulos, and Ioannis Hatzilygeroudis</i>	
Automatically Detected Feature Positions for LBP Based Face Recognition	246
<i>Ladislav Lenc and Pavel Král</i>	
Limited Generalization Capabilities of Autoencoders with Logistic Regression on Training Sets of Small Sizes	256
<i>Alexey Potapov, Vita Batishcheva, and Maxim Peterson</i>	
A Pattern Recognition Approach for Peak Prediction of Electrical Consumption	265
<i>Morten Goodwin and Anis Yazidi</i>	
Semi-automatic Measure and Identification of Allergenic Airborne Pollen	276
<i>Antonio García-Manso, Carlos J. García-Orellana, Rafael Tormo-Molina, Ramón Gallardo-Caballero, M. Macías-Macías, and Horacio M. González-Velasco</i>	

Genetic Algorithms

Enhancing Growth Curve Approach Using CGPANN for Predicting the Sustainability of New Food Products	286
<i>Jawad Ali, Gul Muhammad Khan, and Sahibzada Ali Mahmud</i>	
DX-IFD: An Intelligent Force Deployment System	298
<i>Junpeng Bao, Yuepeng Zhang, Wenqing Wang, Jun Zeng, De Zhang, and Ruiyu Yuan</i>	

A Practical Application of Evolving Fuzzy-Rule-Based Classifiers for the Development of Spoken Dialog Systems	307
<i>David Griol, José Antonio Iglesias, Agapito Ledezma, and Araceli Sanchis</i>	
Sequence Matching Genetic Algorithm for Square Jigsaw Puzzles.....	317
<i>Josef Hynek</i>	
Scalable Distributed Genetic Algorithm for Data Ordering Problem with Inversion Using MapReduce	325
<i>Doina Logofătu and Daniel Stamate</i>	
Application of Evolutionary Algorithms in Project Management	335
<i>Christos Kyriklidis and Georgios Dounias</i>	
Inverse Reliability Task: Artificial Neural Networks and Reliability-Based Optimization Approaches.....	344
<i>David Lehký, Ondřej Slowik, and Drahomír Novák</i>	
Image - Video Processing	
Model-Based Generation of Realistic 3D Full Body Avatars from Uncalibrated Multi-view Photographs	354
<i>Nicholas Michael and Andreas Lanitis</i>	
Data-Driven Motion Reconstruction Using Local Regression Models	364
<i>Christos Mousas, Paul Newbury, and Christos-Nikolaos Anagnostopoulos</i>	
Calculation of Complex Zernike Moments with Geodesic Correction for Pose Recognition in Omni-directional Images	375
<i>Kostas K. Delibasis, Spiros Georgakopoulos, Vassilis Plagianakos, and Ilias Maglogiannis</i>	
Fish-Eye Camera Video Processing and Trajectory Estimation Using 3D Human Models	385
<i>Konstantina Kottari, Kostas Delibasis, Vassilis Plagianakos, and Ilias Maglogiannis</i>	
Feature Extraction	
Analysis of Relevant Features for Pollen Classification	395
<i>Gildardo Lozano-Vega, Yannick Benezeth, Franck Marzani, and Frank Boochs</i>	
Identifying Features with Concept Drift in Multidimensional Data Using Statistical Tests	405
<i>Piotr Sobolewski and Michał Woźniak</i>	

Features Extraction of Growth Trend in Social Websites Using Non-linear Genetic Programming	414
<i>Umer Khayam, Durre Nayab, Gul Muhammad Khan, and Sahibzada Ali Mahmud</i>	

Environmental AI

Comparison of Self Organizing Maps Clustering with Supervised Classification for Air Pollution Data Sets	424
<i>Ilias Bougoudis, Lazaros Iliadis, and Stefanos Spartalis</i>	
Predicting Water Permeability of the Soil Based on Open Data	436
<i>Jonne Pohjankukka, Paavo Nevalainen, Tapio Pahikkala, Eija Hyvönen, Pekka Hänninen, Raimo Sutinen, Jari Ala-Ilomäki, and Jukka Heikkonen</i>	
Solar Radiation Time-Series Prediction Based on Empirical Mode Decomposition and Artificial Neural Networks	447
<i>Petros-Fotios Alvanitopoulos, Ioannis Andreadis, Nikolaos Georgoulas, Michalis Zervakis, and Nikolaos Nikolaidis</i>	
Extracting Trends Ensembles in Solar Irradiance for Green Energy Generation Using Neuro-evolution	456
<i>Mehreen Rehman, Jawad Ali, Gul Muhammad Khan, and Sahibzada Ali Mahmud</i>	

Simulations and Fuzzy Modeling

Optimal Control Using Feedback Linearization for a Generalized T-S Model	466
<i>Agustín Jiménez, Basil Mohammed Al-Hadithi, Juan Pérez-Oria, and Luciano Alonso</i>	
HHT-Based Artificial Seismic Accelerograms Generation	476
<i>Eleni Vrochidou, Petros-Fotios Alvanitopoulos, Ioannis Andreadis, Anaxagoras Elenas, and Katerina Mallousi</i>	
Peak Observer Based Self-tuning of Type-2 Fuzzy PID Controllers	487
<i>Engin Yesil, Tufan Kumbasar, M. Furkan Dodurka, and Ahmet Sakalli</i>	
TSK Fuzzy Modeling with Nonlinear Consequences	498
<i>Jacek Kabziński and Jarosław Kacereka</i>	

Data Mining-Forecasting

Novel Techniques for Text Annotation with Wikipedia Entities	508
<i>Christos Makris and Michael Angelos Simos</i>	

An Avatar-Based Weather Forecast Sign Language System for the Hearing-Impaired	519
<i>Juhyun Oh, Seonggyu Jeon, Minho Kim, Hyukchul Kwon, and Iktae Kim</i>	
Interpretation of Possessive and Reflexive-Possessive Pronouns of Bulgarian Language in DATR	528
<i>Velislava Stoykova</i>	
Forecasting Algorithm Adaptive Automatically to Time Series Length	537
<i>Kolyo Onkov and Georgios Tegos</i>	

AI Applications - Mobile Applications

Six Degrees of Freedom Implicit Haptic Rendering	546
<i>Konstantinos Moustakas</i>	
Application of Supervised Self Organising Models for Wheat Yield Prediction	556
<i>Xanthoula Eirini Pantazi, Dimitrios Moshou, Abdul Mounem Mouazen, Boyan Kuang, and Thomas Alexandridis</i>	
Prediction of 30-Day Mortality after a Hip Fracture Surgery Using Neural and Bayesian Networks	566
<i>Dimitrios Galiatsatos, George C. Anastassopoulos, Georgios Drosos, Athanasios Ververidis, Konstantinos Tilkeridis, and Konstantinos Kazakos</i>	
Application of Artificial Neural Network to Predict Static Loads on an Aircraft Rib	576
<i>Ramin Amali, Samson Cooper, and Siamak Noroozi</i>	
Android Based Electronic Travel Aid System for Blind People	585
<i>Paraskevas Diamantatos and Ergina Kavallieratou</i>	

Image Video Processing 4

Shoreline Extraction from Coastal Images Using Chebyshev Polynomials and RBF Neural Networks	593
<i>Anastasios Rigos, Olympos P. Andreadis, Manousakis Andreas, Michalis I. Voutsdoukas, George E. Tsekouras, and Adonis Velegrakis</i>	
Automation System Development for Micrograph Recognition for Mineral Ore Composition Evaluation in Mining Industry	604
<i>Olga E. Baklanova, Olga Shvets, and Zhanbai Uzdenbaev</i>	

Similarity Based Cross-Section Segmentation in Rough Log End Images	614
<i>Rudolf Schraml and Andreas Uhl</i>	
Visual Security Evaluation Based on SIFT Object Recognition	624
<i>Stefan Jenisch and Andreas Uhl</i>	
Author Index	635
