

Table of Contents – Part I

Evolving Critical Systems

Evolving Critical Systems - Track Introduction	1
<i>Mike Hinchey and Tiziana Margaria</i>	
Statistical Abstraction Boosts Design and Test Efficiency of Evolving Critical Systems	4
<i>Axel Legay and Sean Sedwards</i>	
Combinatory Logic Synthesizer	26
<i>Jan Bessai, Andrej Dudenhefner, Boris Döder, Moritz Martens, and Jakob Rehof</i>	
Incremental Syntactic-Semantic Reliability Analysis of Evolving Structured Workflows	41
<i>Domenico Bianculli, Antonio Filieri, Carlo Ghezzi, and Dino Mandrioli</i>	
Prototype-Driven Development of Web Applications with DyWA	56
<i>Johannes Neubauer, Markus Frohme, Bernhard Steffen, and Tiziana Margaria</i>	
Domain-Specific Languages for Enterprise Systems	73
<i>Jesper Andersen, Patrick Bahr, Fritz Henglein, and Tom Hvitved</i>	

Rigorous Engineering of Autonomic Ensembles

Introduction to “Rigorous Engineering of Autonomic Ensembles” – Track Introduction	96
<i>Martin Wirsing, Rocco De Nicola, and Matthias Hölzl</i>	
HELENA@Work: Modeling the Science Cloud Platform	99
<i>Annabelle Klarl, Philip Mayer, and Rolf Hennicker</i>	
Formalizing Self-adaptive Clouds with KnowLang	117
<i>Emil Vassev, Mike Hinchey, and Philip Mayer</i>	
Towards Performance-Aware Engineering of Autonomic Component Ensembles	131
<i>Tomáš Bureš, Vojtěch Horký, Michał Kit, Lukáš Marek, and Petr Tůma</i>	
Self-expression and Dynamic Attribute-Based Ensembles in SCEL	147
<i>Giacomo Cabri, Nicola Capodieci, Luca Cesari, Rocco De Nicola, Rosario Pugliese, Francesco Tiezzi, and Franco Zambonelli</i>	

On Programming and Policing Autonomic Computing Systems	164
<i>Michele Loreti, Andrea Margheri, Rosario Pugliese, and Francesco Tiezzi</i>	

Rigorous System Design Flow for Autonomous Systems	184
<i>Saddek Bensalem, Marius Bozga, Jacques Combaz, and Ahlem Triki</i>	

Automata Learning

Learning Models for Verification and Testing — Special Track at ISoLA 2014 - Track Introduction	199
<i>Falk Howar and Bernhard Steffen</i>	

Algorithms for Inferring Register Automata: A Comparison of Existing Approaches	202
<i>Fides Aarts, Falk Howar, Harco Kuppens, and Frits Vaandrager</i>	

Active Learning of Nondeterministic Systems from an ioco Perspective.....	220
<i>Michele Volpato and Jan Tretmans</i>	

Verification of GUI Applications: A Black-Box Approach	236
<i>Stephan Arlt, Evren Ermas, Sergio Feo-Arenis, and Andreas Podelski</i>	

Formal Methods and Analysis in Software Product Line Engineering

Fomal Methods and Analyses in Software Product Line Engineering (Track Summary)	253
<i>Ina Schaefer and Maurice H. ter Beek</i>	

A Core Language for Separate Variability Modeling	257
<i>Alexandru F. Iosif-Lazăr, Ina Schaefer, and Andrzej Wąsowski</i>	

Domain Specific Languages for Managing Feature Models: Advances and Challenges	273
<i>Philippe Collet</i>	

Delta-Trait Programming of Software Product Lines	289
<i>Ferruccio Damiani, Ina Schaefer, Sven Schuster, and Tim Winkelmann</i>	

Deployment Variability in Delta-Oriented Models	304
<i>Einar Broch Johnsen, Rudolf Schlatte, and S. Lizeth Tapia Tarifa</i>	

DeltaCCS: A Core Calculus for Behavioral Change	320
<i>Malte Lochau, Stephan Mennicke, Hauke Baller, and Lars Ribbeck</i>	

Coverage Criteria for Behavioural Testing of Software Product Lines . . .	336
<i>Xavier Devroey, Gilles Perrouin, Axel Legay, Maxime Cordy, Pierre-Yves Schobbens, and Patrick Heymans</i>	

Challenges in Modelling and Analyzing Quantitative Aspects of Bike-Sharing Systems	351
<i>Maurice H. ter Beek, Alessandro Fantechi, and Stefania Gnesi</i>	

Towards Modular Verification of Software Product Lines with mCRL2	368
<i>Maurice H. ter Beek and Erik P. de Vink</i>	

Model-Based Code Generators and Compilers

Model-Based Code-Generators and Compilers - Track Introduction	386
<i>Uwe Aßmann, Jens Knoop, and Wolf Zimmermann</i>	

DSL Implementation for Model-Based Development of Pumps	391
<i>Christian Berg and Wolf Zimmermann</i>	

Building Code Generators for DSLs Using a Partial Evaluator for the Xtend Language	407
<i>Klaus Birken</i>	

Back-To-Back Testing of Model-Based Code Generators	425
<i>Sven Jörges and Bernhard Steffen</i>	

Rewriting Object Models with Cycles and Nested Collections: A Model-Based Metaprogramming Problem	445
<i>Markus Lepper and Baltasar Trancón y Widemann</i>	

Compiling SCCharts — A Case-Study on Interactive Model-Based Compilation	461
<i>Christian Motika, Steven Smyth, and Reinhard von Hanxleden</i>	

Domain-Specific Code Generator Modeling: A Case Study for Multi-faceted Concurrent Systems	481
<i>Stefan Naujokat, Louis-Marie Traonouez, Malte Isberner, Bernhard Steffen, and Axel Legay</i>	

Tutorial: Automata Learning in Practice

Tutorial: Automata Learning in Practice	499
<i>Falk Howar, Malte Isberner, and Bernhard Steffen</i>	

LNCS Transactions on Foundations for Mastering Change

LNCS Transactions on Foundations for Mastering Change: Preliminary Manifesto	514
<i>Bernhard Steffen</i>	
Formal Methods for Collective Adaptive Ensembles	518
<i>Martin Wirsing and Matthias Hölzl</i>	
Current Issues on Model-Based Software Quality Assurance for Mastering Change	521
<i>Michael Felderer</i>	
Compositional Model-Based System Design as a Foundation for Mastering Change	524
<i>Stavros Tripakis</i>	
Managing Change in Formal Software Analysis: Two Research Challenges	527
<i>Reiner Hähnle</i>	
Mastering Changes: Some Research Topics	530
<i>Axel Legay</i>	
Mastering Change @ Runtime	533
<i>Klaus Havelund</i>	
Forever Software	535
<i>Arend Rensink</i>	
Software (must) Change	538
<i>Mike Hinchey</i>	
The Change of Change	541
<i>Tiziana Margaria</i>	
Author Index	545
