

1	Fabrication and Reduction	1
1.1	Experimental Fabrication	1
1.2	Oxidation Mechanism	4
1.3	Chemical Reduction	7
1.3.1	Ways of Chemical Reduction	7
1.3.2	Theoretical Illustration of GO Reduction	9
	References	11
2	Structural Characterization	15
2.1	Spectroscopic Characterization	15
2.1.1	Solid-State NMR	15
2.1.2	XPS	16
2.1.3	XANES	19
2.1.4	FT-IR	20
2.1.5	Raman	20
2.2	Microscopic Characterization	22
2.2.1	TEM	22
2.2.2	STM	24
2.2.3	Other Microscopic Tools and Combined Techniques	25
	References	28
3	Structural Modeling and Physical Properties	31
3.1	Structural Modeling	31
3.1.1	Sketching Models	31
3.1.2	Atomistic Simulations	33
3.2	Physical Properties	39
3.2.1	Thermodynamic Stabilities	39
3.2.2	Mechanical Properties	41
3.2.3	Electronic Properties	45
3.2.4	Optical Properties	48
	References	54

4	Application of GO in Electronics and Optics	57
4.1	GO for Electronics	57
4.1.1	Transparent Conductors	57
4.1.2	Field-Effect Devices	59
4.1.3	Flexible Electronic Materials	62
4.1.4	Electrical Sensors	65
4.2	GO for Optics	66
4.2.1	Fluorescence Quenching	66
4.2.2	SERS	67
4.2.3	Nonlinear Optical Materials	69
4.3	GO for Optoelectronics	71
4.3.1	Photovoltaic Devices	71
4.3.2	Light-Emitting Devices	73
	References	75
5	Application of GO in Energy Conversion and Storage	79
5.1	Hydrogen Production and Storage	79
5.1.1	Photocatalytic Water Splitting	79
5.1.2	Physical Hydrogen Storage	84
5.1.3	Chemical Hydrogen Storage	89
5.2	Lithium Batteries	91
5.2.1	Lithium Ion Batteries	91
5.2.2	Lithium-Sulfur Batteries	95
5.2.3	Lithium-Air Batteries	98
5.3	Supercapacitors	100
5.3.1	GO and RGO	100
5.3.2	GO/RGO Combined with Other Carbon Materials	103
5.3.3	GO/RGO-Transition Metal Oxide Composites	104
5.3.4	Composites of GO/RGO and Conducting Polymers	108
5.3.5	Other GO/RGO-Based Composites	111
	References	112
6	Application of GO in Environmental Science	119
6.1	Air Pollutant Removal	119
6.1.1	Gas Adsorption and Detection	119
6.1.2	Gas Conversion	122
6.2	Water Purification	124
6.2.1	Capture of Pollutants	124
6.2.2	Conversion of Pollutants	129
	References	132

7	Application of GO in Biotechnology	137
7.1	Biofunctionalization	137
7.1.1	Interaction with Proteins	137
7.1.2	Interaction with DNA	139
7.1.3	Interaction with Other Biomolecules	140
7.2	Bioapplications	141
7.2.1	Optical Biosensors	141
7.2.2	Electrochemical Biosensors	143
7.2.3	Enzyme Inhibitors	148
7.2.4	Drug Delivery	149
	References	150
8	Conclusion and Outlook	153
