1	Introduction	1
1.1	We Are All Users	1
1.2	The User Is Not Like Me	2
1.3	What Is User-Centred Engineering?	3
1.4	Lessons from History	8
2	User-Centred Engineering	11
2.1	Software Engineering: The Forgotten User?	11
2.2	Overview: User-Centred Techniques in Context	15
3	The 7 ± 2 Most Important User-Centred Techniques	25
3.1	Aspects of Life: Contextual Inquiry	25
3.2	Modelling Reality: Personas and Scenarios	32
3.3	Just Communicate: Storyboards	39
3.4	Scribbling for Intermediates: UI Prototyping	42
3.5	Taking It Forward into Development: Use Cases	51
3.6	Guidelines and Style Guides	57
3.7	Usability Testing	62
3.8	Numerical Data: Questionnaires	68
4	Getting a Handle on UX: Planning	75
4.1	Achieving Goals	75
4.2	Controlling Risk	76
4.3	Constraints	77
4.4	Some Planning Examples	78
4.5	Involving Users	82
4.6	Tricky Situations	84
4.7	“It’s Carl’s Job”	87
5	A User-Oriented Strategy: Company-Wide UX	89
5.1	User-Centred Engineering as a Feedback Loop	89
5.2	Building a User-Centred Process	90
5.3	Creating a Common Language	92
5.4	Establishing a User-Oriented Company Culture	94
5.5	So What’s the Story in Your Company?	96

6	That's Life: Examples from Actual Practice	99
6.1	Case Study 1: User-Centred Requirements Clear the Air	99
6.2	Case Study 2: User-Centred Engineering from A to Z	102
6.3	Case Study 3: User-Centred Innovation: Simulating Reality	106
6.4	Case Study 4: Discount Usability Engineering	110
7	Flashback: Principles of User-Centred Engineering	113
7.1	Identifying the Question: A Goal-Oriented Approach	113
7.2	Context: Designing for Reality	114
7.3	Partnership: Involving Users Constructively	115
7.4	Interpreting Factual Information	116
7.5	Modelling and Collecting Feedback	116
8	Outlook: Related Fields	117
8.1	Accessibility	117
8.2	Interaction Design	118
8.3	Security and Usability	119
8.4	Web Usability	119
8.5	Mobile User Experience	120
8.6	The Ubiquitous Computer	123
