INTRODUCTION	1
1 PREVARIETIES	7
Affine algebraic sets	8
Affine algebraic sets as spaces with functions	17
Prevarieties	22
Projective varieties	26
Exercises	35
2 SPECTRUM OF A RING	40
Spectrum of a ring as a topological space	41
Excursion: Sheaves	46
Spectrum of a ring as a locally ringed space	57
Exercises	62
3 SCHEMES	66
Schemes	66
Examples of schemes	72
Basic properties of schemes and morphisms of schemes	74
Prevarieties as Schemes	78
Subschemes and Immersions	83
Exercises	88
4 FIBER PRODUCTS	93
Schemes as functors	93
Fiber products of schemes	97
Base change, Fibers of a morphism	105
Exercises	114
5 SCHEMES OVER FIELDS	118
Schemes over a field which is not algebraically closed	118
Dimension of schemes over a field	120
Schemes over fields and extensions of the base field	133
Intersections of plane curves	138
Exercises	141
6 LOCAL PROPERTIES OF SCHEMES	145
The tangent space	146
Smooth morphisms	153
Regular schemes	158
Normal schemes	161
Exercises	164

7	QUASI-COHERENT MODULES	169
	Excursion: \mathcal{O}_X -modules	169
	Quasi-coherent modules on a scheme	181
	Properties of quasi-coherent modules	189
	Exercises	199
8	REPRESENTABLE FUNCTORS	205
	Representable Functors	206
	The example of the Grassmannian	209
	Brauer-Severi schemes	219
	Exercises	222
9	SEPARATED MORPHISMS	226
	Diagonal of scheme morphisms and separated morphisms	226
	Rational maps and function fields	232
	Exercises	238
10	FINITENESS CONDITIONS	241
	Finiteness conditions (noetherian case)	242
	Finiteness conditions in the non-noetherian case	249
	Schemes over inductive limits of rings	258
	Constructible properties	270
	Exercises	278
11	VECTOR BUNDLES	286
	Vector bundles and locally free modules	286
	Flattening stratification for modules	296
	Divisors	298
	Vector bundles on \mathbb{P}^1	313
	Exercises	316
12	AFFINE AND PROPER MORPHISMS	320
	Affine morphisms	320
	Finite and quasi-finite morphisms	324
	Serre's and Chevalley's criteria to be affine	334
	Normalization	339
	Proper morphisms	343
	Zariski's main theorem	349
	Exercises	361
13	PROJECTIVE MORPHISMS	366
	Projective spectrum of a graded algebra	367
	Embeddings into projective space	384
	Blowing-up	406
	Exercises	418

14	FLAT MORPHISMS AND DIMENSION	423
	Flat morphisms	423
	Properties of flat morphisms	429
	Faithfully flat descent	439
	Dimension and fibers of morphisms	463
	Dimension and regularity conditions	473
	Hilbert schemes	478
	Exercises	480
15	ONE-DIMENSIONAL SCHEMES	485
	Morphisms into and from one-dimensional schemes	485
	Valuative criteria	487
	Curves over fields	491
	Divisors on curves	496
	Exercises	500
16	EXAMPLES	503
	Determinantal varieties	503
	Cubic surfaces and a Hilbert modular surface	520
	Cyclic quotient singularities	528
	Abelian varieties	532
	Exercises	539
A	THE LANGUAGE OF CATEGORIES	541
B	COMMUTATIVE ALGEBRA	547
C	PERMANENCE FOR PROPERTIES OF MORPHISMS OF SCHEMES	573
D	RELATIONS BETWEEN PROPERTIES OF MORPHISMS OF SCHEMES	576
E	CONSTRUCTIBLE AND OPEN PROPERTIES	578
	BIBLIOGRAPHY	583
	DETAILED LIST OF CONTENTS	588
	INDEX OF SYMBOLS	598
	INDEX	602
