1	Introduction	1
1.1	Introductory Principles	1
1.2	Vascular Access for Hemodialysis	2
1.3	Requirements for a Permanent Vascular Hemodialysis Access	2
1.4	Choice of the Vascular Access	2
1.5	Preoperative Assessment	3
1.6	Basics of Vascular Access Surgery	3
1.7	Practical Requirements	5
2	Central Venous Catheters for Hemodialysis	7
2.1	Temporary Catheters	7
2.2	Permanent Catheters	8
2.3	Handling of Catheters	9
	Literature	10
3	AV Fistulas	11
3.1	Basics	11
3.1.1	Types of Arteriovenous Anastomoses	11
3.1.2	Pathophysiology of the AV Fistula	12
3.1.3	Special Surgical Aspects of AV Fistulas	12
3.2	AV Fistula of the Forearm	15
3.2.1	AV Fistulas of the Cephalic Vein	16
3.2.2	AV Fistulas of the Basilic Vein	19
3.2.3	AV Fistula of the Median Antebrachial Vein	21
3.2.4	Repair of AV Fistulas in the Forearm	22
3.3	AV Fistulas in the Cubital Fossa and in the Upper Arm	35
3.3.1	Vascular Anatomy in the Cubital Fossa	35
3.3.2	Technical Hints	37
3.3.3	Arterialization of the Cephalic Vein	38
3.3.4	Arterialization of the Basilic Vein	45
3.3.5	Arterialization of the Cephalic and Basilic Veins in the Cubital Fossa	50
3.3.6	Arterialization of the Deep Vein in the Cubital Fossa	51
3.3.7	Aneurysms in the Cubital Fossa After AV Anastomoses	51
3.3.8	Great Saphenous Vein as AV Access	52
	Literature	54

4	AV Shunts	57
4.1	Pathophysiology	57
4.1.1	Arterial Anastomosis	57
4.1.2	Puncturable Segment	57
4.1.3	Venous Anastomosis	58
4.1.4	Tissue Proliferation Inside the AV Shunt	58
4.2	Hemodynamics of Arteriovenous Grafts	59
4.2.1	Pressure Curves Within an AV Interposition Graft	61
4.2.2	Influence of the Sudden Change of Diameter Between a Narrow Artery and a 7-mm Prosthesis on Blood Flow	61
4.2.3	Influence of the Design and Length of a Graft on Flow Rate	62
4.2.4	Venous Anastomosis	63
4.2.5	Evaluation of the Results	73
4.2.6	Hemodynamics and Shunt Thrombosis	74
4.3	Principles for the Implantation of Prosthetic Shunt Grafts	76
4.3.1	Preoperative Vascular Diagnostics	76
4.3.2	Anesthesia	76
4.3.3	Prevention of Infections	76
4.3.4	Isolation of the Vessels	77
4.3.5	Tunnel for the Prosthetic Graft	77
4.3.6	Fibrin Sealing of ePTFE Graft	77
4.3.7	Placing the Prosthetic Graft in the Subcutaneous Tunnel	78
4.3.8	Position of the Venous Anastomosis	81
4.3.9	Creating an Anastomosis	81
4.4	AV Grafts in the Forearm	85
4.4.1	Straight Graft	85
4.4.2	Loop Graft	86
4.4.3	Repair of Forearm Interposition Grafts	86
4.5	AV Grafts in the Upper Arm	86
4.5.1	Anatomy of the Infraaxillary Veins	86
4.5.2	Straight Graft	88
4.5.3	Loop Graft	90
4.5.4	Repair of Upper Arm Grafts	90
4.6	Infralavicular Graft	93
4.6.1	Access and Technical Advice	93
4.6.2	Repair of Infralavicular AV Grafts	98
4.7	Subclavianjugular AV Grafts	99

- 4.8 Femoral AV Graft 100
 - 4.8.1 Femoral Loop 101
 - 4.8.2 Femorofemoral Crossover Shunt 102
 - 4.8.3 Repair of Femoral Grafts 102
 - 4.9 Other AV Shunts. 103
 - 4.10 First Puncture of AV Grafts 103

10.1	Pathophysiology	141
10.2	Clinical Presentation and Therapy	141
10.2.1	Type I.	141
10.2.2	Type II.	141
10.2.3	Type III	142
10.2.4	Type IV.	143
10.2.5	Type V.	143
	Literature	144
11	Insufficient Peripheral Perfusion and Cardiac Strain After AV Access Creation	145
11.1	Insufficient Peripheral Perfusion.	145
11.1.1	Pathophysiology and Stages of Insufficient Perfusion	145
11.1.2	Vascular Investigations	146
11.1.3	Indications for Treatment	148
11.2	Therapy of Insufficient Peripheral Perfusion	148
11.2.1	Flow Reduction.	148
11.2.2	Proximalization of the Arterial Inflow	159

11.2.3	Proximalization of the Arterial Inflow into the Distal Arterial Stump	171
11.2.4	Comparison of Both Methods for Proximalization	171
11.3	Cardiac Strain Caused by AV Accesses	171
11.4	Prevention of Insufficient Peripheral Perfusion	172
	Literature	172
12	Arterial Reconstructions of AV Accesses	175
12.1	Clinical Presentation and Investigations	175
12.1.1	Reduced Arterial Inflow into the AV Access	175
12.1.2	Insufficient Peripheral Perfusion	176
12.1.3	Indications for Arterial Reconstructions	176
12.2	Reconstruction of Upper Extremity Arteries	176
12.2.1	Segment I: Stenoses/Occlusions of the Central Subclavian Artery (Aortovertebral Segment)	176
12.2.2	Segment II: Peripheral Subclavian Artery (Vertebroaxillary Segment)	179
12.2.3	Segment III: Axillary Artery	179
12.2.4	Segment IV: Proximal (Infraaxillary) Brachial Artery	180
12.2.5	Segment V: Middle Brachial Artery	181
12.2.6	Segment VI: Peripheral Brachial Artery	181
12.2.7	Segment VII: Forearm Arteries	181
12.2.8	Long Occlusions	181
12.3	Extreme Dilatation of the Feeding Artery	182
	Literature	183
13	Lymph Edema of the Arm After AV Access Surgery	185
13.1	Pathophysiology	185
13.2	Postoperative Lymph Edemas	185
13.2.1	Local Lymph Edema	185
13.2.2	Lymph Edema Distal to Operated Site	185
13.3	Chronic Postoperative Lymph Edema	186
13.3.1	Lymph Edema with Venous Congestion	186
13.3.2	Lymph Edema Without Venous Congestion	186
13.4	Prevention of Lymph Edema After AV Access Surgery	186
