1	Introduction to the Theory of Stellar Evolution	1
	Giacomo Beccari and Giovanni Carraro	
1.1	The Pre-Main Sequence Phase	1
1.2	The Main Sequence	3
1.3	The Combustion of Hydrogen in a Shell: The Sub and Red Giant Branches	4
1.4	The Helium-Burning in the Core: The Horizontal Branch	8
1.5	Two Burning Shells: The AGB	10
1.6	The Final Stages of the Evolution of the Stars	13
	References	16
2	Blue Straggler Stars: Early Observations That Failed to Solve the Problem	17
	Russell D. Cannon	
2.1	Introduction	17
2.2	The <i>Classical</i> Blue Stragglers	19
2.2.1	Globular Clusters	19
2.2.2	The Older Open Clusters	20
2.2.3	Younger Open Clusters and BSSs in the Field	23
2.3	Early Ideas on the Origin of Blue Stragglers	24
2.3.1	Blue Stragglers and Algol-Type Eclipsing Binaries	24
2.3.2	Other Possible Explanations for BSSs	25
2.4	Expanding the Definition of BSSs, 1970–1990	26
	Conclusions	26
	References	27
3	The Blue Stragglers of the Old Open Cluster NGC 188	29
	Robert D. Mathieu and Aaron M. Geller	
3.1	Blue Stragglers in Open Clusters	29
3.1.1	The Open Cluster NGC 188	30
3.1.2	The WIYN Open Cluster Study and Radial Velocities	30

3.2	Observational Findings from the Blue Stragglers in NGC 188	32
3.2.1	Binary Frequency	32
3.2.2	Orbital Period and Eccentricity Distributions	32
3.2.3	Secondary-Star Mass Distribution	34
3.2.4	Detection of White Dwarf Companions	35
3.2.5	Stellar Rotational Velocities.....	36
3.2.6	Spatial Distribution	38
3.2.7	Blue-Straggler Masses.....	39
3.2.8	Insights from Two Notable Blue Straggler Systems	42
3.2.9	Summary	44
3.3	Blue Straggler Formation Within an N -Body Model of NGC 188.....	45
3.3.1	The NGC 188 N -Body Model	45
3.3.2	Formation Channels for Blue Stragglers in the NGC 188 Model	46
3.3.3	Implications for the Origins of the NGC 188 Blue Stragglers.....	48
3.3.4	Outstanding Questions and Missing Pieces in the N -Body Model	53
3.3.5	Efficiency of Mass Transfer in the N -Body Model	56
3.3.6	Summary of Findings from N -Body Modeling of NGC 188.....	59
	Conclusions	61
	References	62
4	Field Blue Stragglers and Related Mass Transfer Issues.....	65
	George W. Preston	
4.1	Introduction.....	65
4.1.1	Historical Developments in First Part of the Twentieth Century	65
4.2	Identification of BSS	67
4.2.1	The Metal-Poor Halo	67
4.2.2	FBS of the Thick/Thin Disc	75
4.3	Group Properties of Metal-Poor FBS	75
4.3.1	Colour Boundaries.....	75
4.3.2	Specific Frequencies.....	78
4.3.3	The Distinguishing Characteristics of FBS Binary Orbits.....	79
4.4	Galactic Distribution	82
4.4.1	Smooth Halo Field.....	82
4.4.2	The Galactic Bulge	83
4.4.3	Halo Streams	84
4.5	Metal-Rich A-Type Stars Above the Galactic Plane: Another Inconvenient Truth.....	85

4.6	Abundance Issues	86
4.6.1	Lithium	87
4.6.2	Alpha/Fe	88
4.6.3	The Neutron-Capture Elements	89
4.6.4	How Many Evolved Mass-Transfer Binaries Are There?	90
4.7	Pulsating Blue Stragglers	91
4.7.1	Non-variable Stars in the SX Phe Instability Strip	91
4.7.2	RRLYR-02792, Archetype of a New Kind of Mass-Transfer Pulsator	93
4.8	Odds and Ends	93
4.8.1	Mass Transfer in Hierarchical Triples	93
4.8.2	Heresy	94
	References	95
5	Blue Straggler Stars in Globular Clusters: A Powerful Tool to Probe the Internal Dynamical Evolution of Stellar Systems	99
	Francesco R. Ferraro, Barbara Lanzoni, Emanuele Dalessandro, Alessio Mucciarelli, and Loredana Lovisi	
5.1	Introduction	99
5.2	BSS Specific Frequency and Primordial Binary Fraction	100
5.3	The Ultraviolet Route to Study BSS	103
5.4	The Discovery of the Double BSS Sequence	106
5.5	The BSS Radial Distribution	109
