Image and Geometry Processing for 3-D Cinematography: An Introduction	1
Rémi Ronfard and Gabriel Taubin	
Part I 3-D Cinematography and Applications	
Stereoscopic Cinema	11
Frédéric Devernay and Paul Beardsley	
Free-Viewpoint Television	53
Masayuki Tanimoto	
Free-Viewpoint Video for TV Sport Production	77
Adrian Hilton, Jean-Yves Guillemaut, Joe Kilner, Oliver Grau, and Graham Thomas	
Challenges for Multi-View Video Capture	107
Bennett Wilburn	
Part II Recent Developments in Geometry	
Performance Capture from Multi-View Video	127
Christian Theobalt, Edilson de Aguiar, Carsten Stoll, Hans-Peter Seidel, and Sebastian Thrun	
Combining Multi-view Stereo and Bundle Adjustment for Accurate Camera Calibration	151
Yasutaka Furukawa and Jean Ponce	
Cell-Based 3D Video Capture Method with Active Cameras	171
Tatsuhisa Yamaguchi, Hiromasa Yoshimoto, and Takashi Matsuyama	

Dense 3D Motion Capture from Synchronized Video Streams193
Yasutaka Furukawa and Jean Ponce

Part III Recent Developments in Image Processing

Wavelet-Based Inverse *Light and Reflectance from Images*
of a Known Object215
Dana Cobzas, Cameron Upright, and Martin Jagersand

3-D Lighting Environment Estimation with Shading and
Shadows239
Takeshi Takai, Susumu Iino, Atsuto Maki, and Takashi Matsuyama

3-D Cinematography with Approximate or No Geometry259
Martin Eisemann, Timo Stich, and Marcus Magnor

View Dependent Texturing Using a Linear Basis285
Martin Jagersand, Neil Birkbeck, and Dana Cobzas
