1	Introduction	1
1.1	General Aspects of Polymeric Materials	1
1.2	Nomenclature	3
1.3	General Classification of Polymeric Materials	4
	References	5
2	Physical Structure of Macromolecules	7
2.1	Structure and Brownian Motion of Macromolecules	7
2.2	Molar Mass and Molar Mass Distribution	10
2.3	The Random Walk Problem in Three Dimensions	19
2.4	Macromolecules in Solution	25
2.5	Statistical Shape of Linear Macromolecules in Θ -Solution	31
2.6	Statistical Shape of Macromolecules in Good Solvents	35
2.7	Analysis of Branched Macromolecules	37
2.8	Size of Macromolecules in the Glassy and Molten State	40
	References	41
3	Experimental Methods to Determine Molecular Quantities	43
3.1	Osmometry	43
3.2	Viscometry	49
3.3	Light Scattering	62
3.4	Gel Permeation Chromatography	68
	References	75
4	Structure and States of Polymers	77
4.1	Classification of Polymeric Materials	77
4.2	Molecular Structure of Amorphous Polymers	87
4.3	States of Order of Uncross-Linked Amorphous Polymers	89
4.4	Influence of Molar Mass and Cross-Linking Density	94
4.5	Semicrystalline Polymers	99
4.5.1	Features of Crystallinity	99
4.5.2	States of Order	104
4.5.3	Crystallization	110

4.6	The Specific Volume of Polymers	111
4.6.1	The Specific Volume of Amorphous Polymers.	111
4.6.2	The Free Volume Theory	115
4.6.3	Volume Relaxation and Physical Aging	117
	References	119
5	Linear Viscoelastic Deformation Behavior in Simple Shear	121
5.1	Theoretical Description of the Deformation Behavior of Polymers	121
5.2	Creep, Creep Recovery, and Stress Relaxation	122
5.3	The Principle of Superposition	127
5.4	Relaxation and Retardation Spectra	130
5.5	The Creep Recovery Experiment	137
5.6	The Creep Compliance of Amorphous Polymers	140
5.7	Relations Between Creep and Stress Relaxation	149
5.8	Oscillatory Experiments	155
5.9	Approximate Relations Between Measurable Viscoelastic Functions.	167
5.10	The Viscoelastic Behavior of Amorphous Polymers in Shear.	177
	References	186
6	Time-Temperature Shift of Mechanical Properties.	189
6.1	The Significance of the Time-Temperature Shift for the Description of the Deformation Behavior of Polymers	189
6.2	The Time-Temperature Shift Principle	190
6.3	The Time-Temperature Shift of the Glass-Rubber Transition	193
6.4	The Time-Temperature Shift in the Flow Region of Amorphous Polymers	203
6.5	The Time-Temperature Shift in the Flow Region of Semicrystalline Polymers.	210
6.6	The Time-Temperature Shift of Secondary Transitions in the Glassy State	216
	References	222
7	Linear Viscoelastic Deformation Under Three-Dimensional Stresses	223
7.1	The Stress Tensor and the Equations for the Balance of Forces.	223
7.2	The Strain Tensor for Small Deformations	227
7.3	The Rheological Equation of State for Isotropic Linear Elastic Materials (Hookean Theory of Elasticity)	230

7.4	The Rheological Equation of State for Isotropic Linear Viscoelastic Materials at Small Deformations	231
7.5	Simple Shear	233
7.6	Isotropic Compression	234
7.7	Uniaxial Tensile Stress	235
7.8	The Viscoelastic Functions for Amorphous Uncross-Linked Polymers	239
	References	241
8	Fundamentals of the Rheology of Large Deformations	243
8.1	Kinematics of Large Deformations	243
8.2	Deformation Gradient and Finite Strain Tensors	247
8.3	Relative Deformation Gradient and Relative Strain Tensors	250
8.4	The Rate of Strain Tensor	254
8.5	Dynamics of Deformable Bodies	256
8.6	Eigenvalues and Invariants of the Stress Tensor	259
8.7	Transformation of the Strain Tensors and the Rate of Strain Tensor to Principal Axis	265
8.7.1	Time-Dependent Simple Shear	268
8.7.2	Multidimensional Time-Dependent Incompressible (Isochoric) Extension	271
	References	273
9	Large Deformations of Polymers	275
9.1	Stress-Strain Behavior of Polymeric Materials	275
9.2	Rheological Equation of State for Isotropic Elastic Materials	280
9.3	Rheological Equation of State for the Ideal Rubber	284
9.4	Statistical Theory of Rubber Elasticity	289
	References	295
10	Equations of State for Polymer Melts	297
10.1	Introduction	297
10.2	Rheological Equation of State for the Elastic Liquid After Lodge	298
10.2.1	The Constitutive Equation	298
10.2.2	The Lodge Liquid in Time-Dependent Simple Shear	301
10.2.3	The Lodge Liquid in a Stressing Experiment in Simple Shear	302
10.2.4	The Lodge Liquid in Shear Creep and Creep Recovery	305
