Contents

1 Introduction 1
1.1 Mathematical Model Arising from Physics 1
1.2 Overview of Previous Research 3
1.2.1 Ground State Solutions 3
1.2.2 Multiple Solutions 5
1.3 Problems Studied in This Thesis 6

2 A BEC System with Dimensions $N = 2, 3$: Ground State Solutions 9
2.1 Main Results 9
2.2 Uniqueness of Positive Solutions 14
2.3 Optimal Parameter Range 18

3 A BEC System with Dimensions $N = 2, 3$: Sign-Changing Solutions 29
3.1 Main Results 29
3.2 Sign-Changing Solutions 32
3.3 Semi-nodal Solutions 50

4 A BEC System with Dimensions $N = 4$: Critical Case 57
4.1 Main Results 57
4.2 The Simple Case $\lambda_1 = \lambda_2$ 63
4.3 The Limit Problem 64
4.4 Uniqueness of Ground State Solutions 67
4.5 The General Case $\lambda_1 \neq \lambda_2$ 70
4.6 Phase Separation 86

5 A Generalized BEC System with Critical Exponents in Dimensions $N \geq 5$ 97
5.1 Main Results 97
5.2 The Symmetric Case $\lambda_1 = \lambda_2$ 104

5.3 The General Case $\lambda_1 \neq \lambda_2$ 121
5.4 Uniqueness of Ground State Solutions 138
5.5 Phase Separation and Sign-Changing Solutions of Brezis–Nirenberg Problem 142
5.6 Sharp Energy Estimates for Brezis–Nirenberg Problem 148

6 A Linearly Coupled Schrödinger System with Critical Exponent 157
6.1 Main Results 157
6.2 Sharp Parameter Ranges 162
6.3 Asymptotics 172
