|                                                                                |    |
|--------------------------------------------------------------------------------|----|
| 1. Dedication .....                                                            | 14 |
| 2. The motivation behind this book .....                                       | 15 |
| 3. Oscillation medicine – a fascinating approach .....                         | 17 |
| 4. The basis of bioresonance according to Paul Schmidt .....                   | 21 |
| 4.1 Bioresonance – what does it mean? .....                                    | 21 |
| 4.2 The biological window .....                                                | 22 |
| 4.2.1 Frequency criterion .....                                                | 23 |
| 4.2.2 Intensity and exposure time criteria .....                               | 24 |
| 4.2.3 Oscillation shape criterion .....                                        | 25 |
| 4.2.4 Polarity criterion .....                                                 | 26 |
| 4.3 Historical facts about bioresonance according to Paul Schmidt .....        | 26 |
| 4.4 The resonance system .....                                                 | 27 |
| 4.5 Conversion of a frequency to its fundamental frequency value .....         | 29 |
| 4.6 Bioresonance devices according to Paul Schmidt .....                       | 30 |
| 4.6.1 From the Rayometer to the Rayocomp .....                                 | 30 |
| 4.6.2 The Rayocomp devices .....                                               | 30 |
| 4.6.2.1 The Rayocomp PS 10 .....                                               | 31 |
| 4.6.2.2 The Rayocomp PS 1000 polar .....                                       | 32 |
| 4.7 Accessories for bioresonance devices according to Paul Schmidt .....       | 33 |
| 5. The Rayotest method .....                                                   | 36 |
| 5.1 Test method requirements .....                                             | 36 |
| 5.2 Active mental radiesthesia .....                                           | 37 |
| 5.3 Passive mental radiesthesia .....                                          | 37 |
| 5.3.1 The relation test in passive mental radiesthesia .....                   | 38 |
| 5.3.2 The rotation test in passive mental radiesthesia .....                   | 41 |
| 5.3.2.1 Introduction – from the macrocosm to the microcosm .....               | 41 |
| 5.3.2.2 The chakras – prime examples of rotational fields in the body .....    | 42 |
| 5.3.2.3 The polarisation of oscillations .....                                 | 44 |
| 5.3.2.4 Performing the rotation test on yourself (self-testing) .....          | 47 |
| 5.3.2.5 Performing the rotation test on someone else (testing of others) ..... | 49 |
| 5.4 Summary of the Rayotest method: choosing the right test .....              | 51 |
| 6. Testing and harmonising fundamental frequency values .....                  | 53 |
| 6.1 Self-testing and self-harmonising with the Rayocomp PS 10 .....            | 54 |
| 6.2 Testing and harmonising of others with the Rayocomp PS 10 .....            | 54 |
| 6.3 Testing and harmonising with the Rayocomp PS 1000 polar .....              | 55 |
| 6.4 Conducting a basic test using the check-up list .....                      | 55 |
| 6.5 The human-medicine atlas of frequencies at the physical level .....        | 57 |
| 7. Causal influences on health .....                                           | 58 |
| 7.1 The importance of your sleep environment .....                             | 59 |
| 7.2 Electrosmog .....                                                          | 59 |
| 7.2.1 The definition of electrosmog .....                                      | 60 |

|                                                                                      |     |
|--------------------------------------------------------------------------------------|-----|
| 7.2.2 Alternating electrical fields.....                                             | 61  |
| 7.2.2.1 Threshold values of alternating electrical fields .....                      | 62  |
| 7.2.2.2 Example 1: The high-voltage power line .....                                 | 63  |
| 7.2.2.3 Example 2: Earthed and non-earthed devices .....                             | 63  |
| 7.2.2.4 Example 3: Electric blankets generate a high body voltage.....               | 64  |
| 7.2.2.5 Example 4: The alternating electrical field of metal-sprung mattresses.....  | 65  |
| 7.2.2.6 Example 5: Mains disconnectors are often a good solution.....                | 66  |
| 7.2.2.7 Example 6: The typical electrical configuration of a bedroom.....            | 67  |
| 7.2.3 Alternating magnetic fields.....                                               | 68  |
| 7.2.3.1 Threshold values of alternating magnetic fields .....                        | 68  |
| 7.2.3.2 Example 1: High-voltage power lines.....                                     | 69  |
| 7.2.3.3 Example 2: Transformers .....                                                | 69  |
| 7.2.3.4 Example 3: Large distances between supply and return conductors.....         | 70  |
| 7.2.3.5 Example 4: The electric blanket – again.....                                 | 70  |
| 7.2.3.6 Options for reducing alternating magnetic fields .....                       | 70  |
| 7.2.4 Constant electrical fields.....                                                | 71  |
| 7.2.5 Constant magnetic fields.....                                                  | 72  |
| 7.2.6 High-frequency electromagnetic waves.....                                      | 73  |
| 7.2.6.1 The critical importance of pulse modulation .....                            | 74  |
| 7.2.7 Testing and harmonising electrosmog-induced stress .....                       | 76  |
| 7.2.8 Electrosmog threshold values for bioresonance according to Paul Schmidt .....  | 78  |
| 7.2.9 Problem-solving approaches using bioresonance according to Paul Schmidt .....  | 80  |
| 7.3 Zones of geological interference.....                                            | 81  |
| 7.3.1 Locating zones of geological interference.....                                 | 82  |
| 7.3.1.1 Locating interferences with the relation test.....                           | 84  |
| 7.3.1.2 Locating interferences with the rotation test .....                          | 85  |
| 7.3.2 Geopathic testing of the body .....                                            | 86  |
| 7.3.3 Examples of testing zones of geological interference .....                     | 88  |
| 7.3.4 The effects of geological interference zones on the body .....                 | 92  |
| 7.3.5 "Suppression" of zones of geological interference .....                        | 93  |
| 7.3.5.1 Experiences from practice .....                                              | 96  |
| 7.4 Nutrition .....                                                                  | 99  |
| 7.4.1 Water .....                                                                    | 99  |
| 7.4.1.1 Introduction .....                                                           | 99  |
| 7.4.1.2 The water balance in our body .....                                          | 100 |
| 7.4.1.3 Water and homeopathy .....                                                   | 100 |
| 7.4.1.4 Water can store information .....                                            | 101 |
| 7.4.1.5 The energising of water .....                                                | 102 |
| 7.4.2 The acid-base balance.....                                                     | 104 |
| 7.4.2.1 Introduction.....                                                            | 104 |
| 7.4.2.2 The urine test .....                                                         | 107 |
| 7.4.2.3 The acid-base balance test using bioresonance according to Paul Schmidt..... | 108 |
| 7.4.3 Testing for over- or undersupply.....                                          | 109 |
| 8. Energy status and body polarities .....                                           | 111 |
| 8.1 Testing the energy status with the relation test .....                           | 111 |
| 8.2 Testing and harmonising the energy status with bioresonance devices .....        | 112 |
| 8.3 Testing and harmonising body polarities .....                                    | 113 |
| 9. Testing and harmonising the chakras .....                                         | 115 |

|                                                                                    |     |
|------------------------------------------------------------------------------------|-----|
| 10. Bacteria, viruses, parasites and fungi.....                                    | 118 |
| 10.1 Testing with bioresonance according to Paul Schmidt .....                     | 119 |
| 10.2 Harmonising with bioresonance according to Paul Schmidt .....                 | 121 |
| 11. The control plan for the human organism .....                                  | 122 |
| 11.1 The historical perspective.....                                               | 122 |
| 11.2 The basic idea .....                                                          | 122 |
| 11.3 The design .....                                                              | 123 |
| 11.4 Rules for devising control plans .....                                        | 125 |
| 11.5 Pre-control plans in the appendix.....                                        | 130 |
| 11.6 Correlation of the control plan with the spinal column .....                  | 130 |
| 11.7 Devising control plans for the regulation of other areas .....                | 133 |
| 12. Harmonising with integrated programs.....                                      | 134 |
| 12.1 The list of integrated harmonising programs.....                              | 135 |
| 12.2 A study of integrated harmonising programs.....                               | 137 |
| 12.2.1 Study conduct.....                                                          | 137 |
| 12.2.2 Study results.....                                                          | 137 |
| 12.2.3 Summary of the study outcomes .....                                         | 142 |
| 13. The model approach in bioresonance: range value testing .....                  | 143 |
| 13.1 Conducting a range value test.....                                            | 144 |
| 13.2 Harmonising the range values.....                                             | 146 |
| 14. <i>Product and medication test</i> .....                                       | 148 |
| 14.1 Assessing efficacy.....                                                       | 148 |
| 14.2 Assessing side effects.....                                                   | 149 |
| 14.3 Development of optimal dietary supplements .....                              | 149 |
| 15. Allergen test and allergen harmonisation.....                                  | 151 |
| 15.1 Introduction.....                                                             | 151 |
| 15.2 Performing an allergen test on yourself.....                                  | 152 |
| 15.3 Performing an allergen test on another person .....                           | 153 |
| 15.4 Testing of allergens.....                                                     | 154 |
| 15.4.1 Preparations for the allergen test.....                                     | 154 |
| 15.4.2 The testing procedure .....                                                 | 155 |
| 15.4.3 Is the intolerance detected mild or severe?.....                            | 155 |
| 15.4.4 Testing with multi-allergen ampoules .....                                  | 155 |
| 15.4.5 Important information on the protective cup and protective detector .....   | 157 |
| 15.4.5.1 The protective detector .....                                             | 157 |
| 15.4.5.2 The protective cup .....                                                  | 158 |
| 15.5 Allergen harmonisation .....                                                  | 158 |
| 15.5.1 The typical sequence of harmonising allergens.....                          | 159 |
| 15.6 Some practical tips and advice .....                                          | 160 |
| 16. Oscillation transfer from urine, stool, blood and saliva .....                 | 161 |
| 17. Energising frequency carriers and duplicating of energy patterns .....         | 163 |
| 18. Testing and harmonising of acupuncture channels.....                           | 167 |
| 18.1 Introduction.....                                                             | 167 |
| 18.2 Traditional Chinese Medicine and bioresonance according to Paul Schmidt ..... | 168 |

|          |                                                                                                                                                            |     |
|----------|------------------------------------------------------------------------------------------------------------------------------------------------------------|-----|
| 18.2.1   | Acupuncture oscillation therapy for the experienced TCM practitioner.....                                                                                  | 168 |
| 18.2.2   | Acupuncture oscillation therapy for the TCM beginner.....                                                                                                  | 168 |
| 18.3     | The formative principle of Yin and Yang .....                                                                                                              | 169 |
| 18.4     | The theory of the five elements.....                                                                                                                       | 170 |
| 18.5     | The individual channels .....                                                                                                                              | 170 |
| 18.5.1   | Spring – childhood – liver and gallbladder channel.....                                                                                                    | 171 |
| 18.5.2   | Summer – the fieriness of youth – heart/small intestine channel .....                                                                                      | 172 |
| 18.5.2.1 | The heart/circulation channel (or pericardium channel) and the Triple Warmer.....                                                                          | 173 |
| 18.5.3   | Mid- and late summer – the prime of life – spleen/pancreas and stomach channel .....                                                                       | 174 |
| 18.5.4   | Autumn – harvest time – lung and large intestine channel .....                                                                                             | 175 |
| 18.5.5   | Winter – old age – kidney and bladder channel.....                                                                                                         | 176 |
| 18.5.6   | Extraordinary channels .....                                                                                                                               | 177 |
| 18.5.6.1 | The conception vessel – Ren Mai.....                                                                                                                       | 177 |
| 18.5.6.2 | The central vessel – Du Mai (also know as the governing vessel) .....                                                                                      | 178 |
| 18.5.6.3 | The girdle vessel – Dai Mai.....                                                                                                                           | 178 |
| 18.6     | A wisdom from Lao-tse .....                                                                                                                                | 178 |
| 18.7     | The channel test .....                                                                                                                                     | 178 |
| 18.7.1   | Fundamental frequency values of channel endpoints .....                                                                                                    | 178 |
| 18.7.2   | Direct testing of channel points.....                                                                                                                      | 179 |
| 18.7.3   | Indirect testing of channel points .....                                                                                                                   | 180 |
| 18.8     | Harmonising the channels.....                                                                                                                              | 181 |
| 18.9     | Visualising the results.....                                                                                                                               | 182 |
| 19.      | Determining the fundamental frequency values of substances.....                                                                                            | 183 |
| 20.      | The Rayonex Analysis and Harmonising System (RAH).....                                                                                                     | 186 |
| 20.1     | Basic information on the RAH.....                                                                                                                          | 186 |
| 20.2     | The RAH – an open expert system .....                                                                                                                      | 187 |
| 20.3     | The RAH expert panel.....                                                                                                                                  | 187 |
| 20.4     | Assembling frequencies using the RAH .....                                                                                                                 | 188 |
| 20.5     | Reducing treatment time with the RAH.....                                                                                                                  | 188 |
| 20.6     | Organisation and structure of the RAH .....                                                                                                                | 189 |
| 20.7     | Integration of the RAH in the Rayocomp PS 10 and Rayocomp PS 1000 polar.....                                                                               | 192 |
| 20.8     | Application of the RAH .....                                                                                                                               | 193 |
| 20.8.1   | Analysis preparation .....                                                                                                                                 | 193 |
| 20.8.2   | Testing the energy programs.....                                                                                                                           | 193 |
| 20.8.3   | Differentiating between weak and severe disturbances.....                                                                                                  | 194 |
| 20.8.4   | The cause-orientated approach to testing is also the most robust in the RAH.....                                                                           | 194 |
| 20.8.5   | Physiology and pathology in the RAH .....                                                                                                                  | 195 |
| 20.8.6   | Detoxification with the RAH.....                                                                                                                           | 198 |
| 20.9     | Information on the RAH programs according to Dr Hamada, MD.....                                                                                            | 201 |
| 20.9.1   | Pathogen-related stress caused, for example, by bacteria, viruses, fungi or parasites....                                                                  | 201 |
| 20.9.2   | Sexual dysfunction.....                                                                                                                                    | 202 |
| 20.9.3   | Interference fields in reproductive organ areas, such as inflammatory diseases or dysfunction of the gonads (ovaries) or testicles (sperm production)..... | 203 |
| 20.9.4   | An imbalance of male or female sex hormones .....                                                                                                          | 203 |
| 20.9.5   | A lack of neurotransmitters or their counterparts (antagonists) .....                                                                                      | 204 |

20.9.6 Pressure on the hormonal balance from environmental hormones  
such as octylphenol, bisphenol A and nonylphenol (endocrine fields of interference) 204

20.9.7 Insufficient excretion, detoxification and dissolution of interference fields ..... 205

20.9.8 Hamada Green Card..... 206

20.9.9 Further applications of the Hamada Green Card ..... 206

20.10 Application with the Rayocomp PS 10, PS 1000 polar and the RAH Green Card..... 208

20.10.1 Application of the RAH with the Rayocomp PS 10 ..... 208

20.10.2 Application of the RAH with the Rayocomp PS 1000 polar ..... 209

20.10.3 RAH testing protocols..... 209

20.10.4 The cause test with the Rayocomp PS 1000 polar ..... 214

20.11 Integrating new programs in the RAH ..... 215

21. Bioresonance according to Paul Schmidt in the veterinary field..... 217

21.1 Fundamental frequency values of animals..... 217

21.3 Detectors ..... 218

21.3 Testing with fundamental frequency values and frequency spectra ..... 220

21.3.1 The RAH in the veterinary field..... 221

21.3.2 Range value testing in veterinary medicine..... 223

21.3.3 Testing for geopathy and electrosmog..... 223

21.3.4 Testing the energy status and body polarities..... 224

21.3.5 Testing the acid-base balance..... 226

21.3.6 Testing animal fodder ..... 229

21.3.7 Testing medications ..... 230

21.3.7.1 The medication test and side effects ..... 231

21.3.8 Intolerances ..... 231

21.3.8.1 Testing for intolerable substances ..... 232

21.3.8.2 Harmonising of intolerable substances ..... 233

21.4 Oscillation transfer from urine, stool, blood and saliva ..... 234

21.5 Energising frequency carriers..... 235

21.6 Energy duplication ..... 237

21.7 Testing and harmonising acupuncture channels ..... 238

22. The Rayoscan ..... 240

22.1 Introduction..... 240

22.2 Functionality of the Rayoscan..... 241

22.3 Detecting degenerative and inflammatory diseases with the Rayoscan ..... 243

23. Future perspectives / critique ..... 244

24. Bibliography ..... 245

25. Appendix..... 248

25.1 Human medicine, alphabetical table of fundamental frequency values ..... 249

25.2 Human medicine, numerical table of fundamental frequency values ..... 260

25.3 Check-up list (human medicine, horses, dogs, cats) ..... 271

25.4 The human-medicine atlas of fundamental frequency values at the physical level..... 275

25.4.1 Cerebellum – nerves – neuronal pathways of the brain ..... 275

25.4.2 Hair – skin ..... 280

25.4.3 Cellular building blocks..... 281

25.4.4 Organ of hearing and balance – tongue..... 281

|         |                                                                                 |     |

| 25.12.12.1 Gall bladder channel, human. ....                                              | 453 |
| 25.12.12.2 Gall bladder channel, horse. ....                                              | 454 |
| 25.12.12.3 Gall bladder channel, dog. ....                                                | 455 |
| 25.12.13 Channel of the Governor Vessel. ....                                             | 456 |
| 25.12.13.1 Channel of the Governor Vessel, human. ....                                    | 457 |
| 25.12.13.2 Channel of the Governor Vessel, horse. ....                                    | 458 |
| 25.12.13.3 Channel of the Governor Vessel, dog. ....                                      | 459 |
| 25.12.14 Channel of the Conception Vessel. ....                                           | 460 |
| 25.12.14.1 Channel of the Conception Vessel, human. ....                                  | 461 |
| 25.12.14.2 Channel of the Conception Vessel, horse. ....                                  | 462 |
| 25.12.14.3 Channel of the Conception Vessel, dog. ....                                    | 463 |
| 25.13 Fundamental frequency values for horses, dogs and cats (according to Hußmann). .... | 464 |
| 25.13.1 Alphabetical table of fundamental frequency values for horses. ....               | 464 |
| 25.13.2 Numerical table of fundamental frequency values for horses. ....                  | 467 |
| 25.13.3 Alphabetical table of fundamental frequency values for dogs. ....                 | 472 |
| 25.13.4 Numerical table of fundamental frequency values for dogs. ....                    | 475 |
| 25.13.5 Alphabetical table of fundamental frequency values for cats. ....                 | 480 |
| 25.13.6 Numerical table of fundamental frequency values for cats. ....                    | 483 |
| 25.14 Organ-specific tables of channels and pathogens. ....                               | 488 |
| 24.15 The RAH programs. ....                                                              | 496 |
| 26. Acknowledgements. ....                                                                | 544 |
