Abstract	VII
Kurzfassung	IX
List of Figures	XV
List of Tables	XIX
List of Abbreviations	XXI
List of Symbols	XXIII
1 Introduction	1
1.1 Autonomous Cooperating Logistic Processes	2
1.2 Thesis Structure	3
2 State of the Art	5
2.1 Routing in Mobile Ad-hoc Networks	6
2.2 Routing in Wireless Sensor Networks	8
2.2.1 Flat Routing in Wireless Sensor Networks	9
2.2.2 Hierarchical Routing in Wireless Sensor Networks	11
2.3 Routing in Logistic Networks	15
2.3.1 Static Logistic Scenarios	15
2.3.2 Routing in Dynamic Logistic Environments	17
2.3.3 Distributed Routing in Logistics	17
2.4 Research Challenge	18
3 Context-based Routing Protocol Development	19
3.1 Formal Description of Context-based Routing	19
3.1.1 State of the Art in Formalisation	19
3.1.2 Definition of Context	20
3.1.3 Formalisation in this Thesis	22

3.1.3.1	Context Notation	22
3.2	Requirement Analysis	23
3.2.1	Information to be Carried	24
3.2.2	Message Flows	26
3.2.2.1	Message Flows in Proactive Routing	26
3.2.2.2	Message Flows in Reactive Routing	26
3.2.2.3	Consequences for a Context-aware Routing Protocol	27
3.3	Protocol Design	28
3.3.1	Generic Protocol Description	28
3.3.2	Specialisation for Wireless Sensor Networks	31
3.3.2.1	Reactive Environmental Monitoring Aware Routing	32
3.3.3	Specialisation for Logistic Scenarios	36
3.3.3.1	The Distributed Logistic Routing Protocol	38
4	Multi-Criteria Decision Systems	45
4.1	State of the Art	45
4.1.1	Sequential Use of Multiple Criteria	45
4.1.2	Parallel Handling of Multiple Criteria	46
4.1.3	Multiple Criteria in a Combined Cluster/Chain Approach	48
4.1.4	Fuzzy-logic Approach for Multi-criteria Route Decisions	49
4.1.5	Context-aware Routing with Context Prediction	50
4.2	Multi-criterial Optimisation Function for Context-based Routing	51
4.2.1	General Characteristic Scaling Functions	53
4.2.2	Example for a Multi-criteria Evaluation Function	55
5	Analytical Examination of Route Discovery Traffic	57
5.1	Solution Space Description	58
5.1.1	Destination-oriented Routing	58
5.1.2	Destinationless Routing	62
5.1.3	Validation of the Estimates	63
5.2	Solution Space Reduction	66
5.2.1	Hop Count Limitation	66
5.2.2	Use of the MCCD for the Reduction of Routing Traffic	68
5.2.2.1	Destination-oriented Routing	69
5.2.2.2	Destinationless Routing	70
5.2.3	Combination of Hop Count Limitation and Limitation According to the MCCD	70

5.2.4	Impact of Different Context Characteristics	71
5.2.4.1	Recommendations for Context Criteria	75
5.2.5	Route Rediscoveries	75
6	Evaluation in Logistic Networks	77
6.1	Evaluation Criteria	77
6.1.1	Evaluation Criteria for Logistic Networks	78
6.1.1.1	Logistic Measures	78
6.1.1.2	Communication Traffic	78
6.2	Decision System for Logistic Networks	79
6.2.1	Vehicle Routing	79
6.2.2	Package Routing	84
6.3	Logistic Scenario	87
6.3.1	Analytical Estimate of Routing Messages in the Scenario	89
6.4	Logistic Simulation	92
6.4.1	Simulation Environment	92
6.4.2	Simulation Results	93
6.4.2.1	Proof of Concept	93
6.4.2.2	Weight Variations for Performance Improvement	106
6.4.2.3	Modified Time Constraints	111
6.4.2.4	Forwarding Limit Variations	116
6.4.2.5	Traffic Jams	121
6.5	Summary of this Chapter	123
7	Evaluation in Wireless Sensor Networks	125
7.1	Evaluation Criteria for Sensor Networks	125
7.2	Decision System Setup for Sensor Networks	125
7.3	Sensor Network Scenario	127
7.4	Sensor Network Simulation	129
7.4.1	Simulation Environment	129
7.4.2	Simulation Results	130
7.4.2.1	Initial Results	132
7.4.2.2	Comparison to other Routing Approaches	135
7.4.2.3	Multiple Sinks	143
7.4.2.4	Reactive and Proactive EMA under Presence of Mobility	144
7.5	Reactive and Proactive EMA with Sleep Cycles	148
7.6	Summary of this Chapter	150

8	Conclusions and Outlook	153
8.1	Conclusions	153
8.2	Outlook	155
8.3	Final Statement	156
	Appendix	157
A	Proactive Environmental Monitoring Aware Routing	159
A.1	Route Update Signalling	159
A.2	Best Neighbour Election	160
A.3	Sensor Data Transmission	161
B	Decision Concept in [SRRWM08]	163
B.1	Goods Routing	163
B.2	Vehicle Routing	163
C	Result Tables of Individual Logistic Simulation Runs	165
D	DLRP Message Sizes	177
D.1	Route Request Messages	177
D.2	Route Reply Messages	178
D.3	Route Announcement Messages	178
D.4	Route Disannouncement Messages	179
	Bibliography	181
