Invited Talk

A Risk-Driven Decision Table for Software Process Selection.....	1
<i>Barry W. Boehm</i>	

Process Alignment

Using Process Definitions to Support Reasoning about Satisfaction of Process Requirements	2
<i>Leon J. Osterweil and Alexander Wise</i>	

Early Empirical Assessment of the Practical Value of GQM ⁺ Strategies	14
<i>Vladimir Mandić, Lasse Harjumaa, Jouni Markkula, and Markku Oivo</i>	

Determining Organization-Specific Process Suitability	26
<i>Ove Armbrust</i>	

On Scoping Stakeholders and Artifacts in Software Process	39
<i>Xu Bai, LiGuo Huang, and He Zhang</i>	

Critical Success Factors for Rapid, Innovative Solutions	52
<i>Jo Ann Lane, Barry Boehm, Mark Bolas, Azad Madni, and Richard Turner</i>	

Process Management

Evidence-Based Software Processes	62
<i>Barry Boehm and Jo Ann Lane</i>	

SoS Management Strategy Impacts on SoS Engineering Effort	74
<i>Jo Ann Lane</i>	

Using Project Procedure Diagrams for Milestone Planning	88
<i>Klaus Bergner and Jan Friedrich</i>	

A Framework for the Flexible Instantiation of Large Scale Software Process Tailoring	100
<i>Peter Killisperger, Markus Stumptner, Georg Peters, Georg Grossmann, and Thomas Stückl</i>	

A Methodological Framework and Software Infrastructure for the Construction of Software Production Methods	112
<i>Mario Cervera, Manoli Albert, Victoria Torres, and Vicente Pelechano</i>	
Software Factories: Describing the Assembly Process	126
<i>Maidier Azanza, Oscar Díaz, and Salvador Trujillo</i>	
How to Welcome Software Process Improvement and Avoid Resistance to Change	138
<i>Daniela C.C. Peixoto, Vitor A. Batista, Rodolfo F. Resende, and Clarindo Isaías P.S. Pádua</i>	

Process Models

The Incremental Commitment Model Process Patterns for Rapid-Fielding Projects	150
<i>Supannika Koolmanojwong and Barry Boehm</i>	
A Repository of Agile Method Fragments	163
<i>Hesam Chiniforooshan Esfahani and Eric Yu</i>	
OAP: Toward a Process for an Open World	175
<i>Yuanzhi Wang</i>	
An Automatic Approach to Aid Process Integration within a Secure Software Processes Family	188
<i>Jia-kuan Ma, Ya-sha Wang, Lei Shi, and Hong Mei</i>	
Engineering Adaptive IT Service Support Processes Using Meta-modeling Technologies	200
<i>Beijun Shen, Xin Huang, Kai Zhou, and Wenwei Tang</i>	
Modeling a Resource-Constrained Test-and-Fix Cycle and Test Phase Duration	211
<i>Dan Houston and Man Lieu</i>	

Process Representation

Visual Patterns in Issue Tracking Data	222
<i>Patrick Knab, Martin Pinzger, and Harald C. Gall</i>	
Disruption-Driven Resource Rescheduling in Software Development Processes	234
<i>Junchao Xiao, Leon J. Osterweil, Qing Wang, and Mingshu Li</i>	

MODAL: A SPEM Extension to Improve Co-design Process Models	248
<i>Ali Koudri and Joel Champeau</i>	

Process Analysis and Measurement

Application of Re-estimation in Re-planning of Software Product Releases	260
<i>Ahmed Al-Emran, Anas Jadallah, Elham Paikari, Dietmar Pfahl, and Günther Ruhe</i>	
Software Process Model Blueprints	273
<i>Julio Ariel Hurtado Alegria, Alejandro Lagos, Alexandre Bergel, and María Cecilia Bastarrica</i>	
Measurement and Analysis of Process Audit: A Case Study	285
<i>Fengdi Shu, Qi Li, Qing Wang, and Haopeng Zhang</i>	
A Fuzzy-Based Method for Evaluating the Trustworthiness of Software Processes	297
<i>Haopeng Zhang, Fengdi Shu, Ye Yang, Xu Wang, and Qing Wang</i>	

Process Simulation Modeling

Software Process Simulation Modeling: An Extended Systematic Review	309
<i>He Zhang, Barbara Kitchenham, and Dietmar Pfahl</i>	
SimSWE – A Library of Reusable Components for Software Process Simulation	321
<i>Thomas Birkhölzer, Ray Madachy, Dietmar Pfahl, Dan Port, Harry Beitinger, Michael Schuster, and Alexey Olkov</i>	
Applications of a Generic Work-Test-Rework Component for Software Process Simulation	333
<i>Thomas Birkhölzer, Dietmar Pfahl, and Michael Schuster</i>	

Experience Reports and Empirical Studies

An Empirical Study of Lead-Times in Incremental and Agile Software Development	345
<i>Kai Petersen</i>	
Improving the ROI of Software Quality Assurance Activities: An Empirical Study	357
<i>Qi Li, Fengdi Shu, Barry Boehm, and Qing Wang</i>	

Benchmarking the Customer Configuration Updating Process of the
International Product Software Industry 369
 Slinger Jansen, Wouter Buts, Sjaak Brinkkemper, and
 André van der Hoek
