

Contents

1 Introduction	1
Jean-Marc Mercantini	
1.1 Complexity of the Risk Concept	2
1.1.1 Overview and Definitions	2
1.1.2 Ontological Analysis of the Risk Concept	5
1.1.3 The Various Conceptions of Risk	6
1.2 From Cognition to Engineering	11
1.2.1 Cognition	11
1.2.2 Cognitive Science	12
1.2.3 Cognitive Engineering	13
1.2.4 Knowledge Engineering	13
1.3 Summary of the Book	15
1.4 Conclusion	17
References	17
 2 The Role of Risk Perception and Political Culture:	
A Comparative Study of Regulating Genetically Modified Food	21
Tony E. Wohlers	
2.1 Introduction	21
2.2 Political Culture, Risk Perceptions, and Policymaking	22
2.3 Research Design	25
2.4 Risk Perceptions and Policy Trajectories	29
2.4.1 The United States	29
2.4.2 Canada	34
2.4.3 Brazil	37
2.4.4 The European Union	42
2.5 Conclusion	47
References	51

3	The Importance of Risk Communication as an Integral Part of Risk Management in the Republic of Serbia	61
	Vesela Radovic and Jean-Marc Mercantini	
3.1	Introduction	62
3.2	The Risk Management in Serbia	64
3.2.1	The Exposure to Risks	64
3.2.2	The Political Institutions	65
3.2.3	Organisation of the Competent Services	66
3.3	The Importance of the Risk Communication at the Local Level	70
3.4	A Case Study About Hazardous Waste Policy	74
3.5	Opportunities for Improvement of Risk Communication	77
3.6	Conclusion	85
	References	86
4	Metaphors and Risk Cognition in the Discourse on Food-Borne Diseases	89
	Magdalena Bielenia-Grajewska	
4.1	Introduction	89
4.2	Food-Borne Diseases from the Risk Perspective	91
4.3	Communicating Food-Borne Diseases	91
4.4	Metaphors	93
4.5	Metaphors and Food-Borne Diseases	94
4.6	Metaphors of Food-Borne Diseases—Research	96
4.6.1	Disease Is a War	96
4.6.2	Disease Is a Sport	97
4.6.3	Disease Is a Physical Entity	97
4.6.4	Disease Is a Journey	98
4.6.5	Disease is a Natural Disaster	99
4.7	Discussion	99
4.8	Summary	100
	Articles Quoted in Providing Examples	100
	Appendix	101
	References	101
5	User-Centred Design as a Risk Management Tool	107
	Damien J. Williams and Martin Groen	
5.1	Introduction	107
5.2	The Association Between Risk and Design	109
5.3	The Role of Users in the Design Process	111
5.4	UCD as a Risk Management Tool	111
5.5	Involving the User in Design	112
5.6	Who Are the Users?	115

5.7	Implementation of UCD	116
5.7.1	Case Study 1: Control Room Design	116
5.7.2	Case Study 2: Retail Website Design	117
5.7.3	Case Study 3: Consumer Product Design	119
5.7.4	From Accommodation to Assimilation	120
5.8	Recommendations for Design	120
5.9	Conclusion	121
	References	122
6	Analysis of the User Behaviour When Interacting with Systems During Critical Situations	129
	Yuska P.C. Aguiar, Maria de Fátima Q. Vieira, Edith Galy-Marie and Charles Santoni	
6.1	Introduction.	130
6.1.1	Critical Systems Usability and Human Error Prevention . .	131
6.2	Understanding the Human Behaviour	132
6.2.1	Subjective Measures.	133
6.2.2	Performance Measures	134
6.2.3	Psycho-Physiological Measures	135
6.3	A Simplified Abstract Model of the Human Behaviour.	136
6.3.1	The Experimental Protocol—PEOI.	137
6.3.2	PEOI: Data Gathering Methods	139
6.3.3	PEOI: Data Analysis	141
6.4	Case Study	141
6.4.1	The Experiment.	142
6.4.2	Data Gathering and Analysis Results	143
6.4.3	Results Discussion	149
6.5	Final Considerations and Future Work	152
	References	152
7	Hydraulic Dam Safety Assessment with the Timed Observations Theory	155
	Marc Le Goc, Ismail Fakhfakh, Corinne Curt and Lucile Torres	
7.1	Introduction.	156
7.2	Dam Safety.	157
7.3	Introduction to the Timed Observations Theory	159
7.3.1	Observed Process.	160
7.3.2	Timed Observation and Observation Class	162
7.3.3	Binary Temporal Relations	163
7.4	Risk Assessment with the TOT	166
7.4.1	Knowledge	167
7.4.2	Model	168

7.5	TOM4D KE Methodology	169
7.5.1	TOM4D Modeling Principles	170
7.5.2	TOM4D Modeling Process	173
7.5.3	Controlling the Semantic	176
7.6	Application to the French Sapins Dam	178
7.6.1	Knowledge Interpretation	179
7.6.2	Perception Model	181
7.6.3	Generic Modeling	184
7.7	Diagnosis-Based Risk Assessment with TOM4D Models	191
7.8	Conclusion	192
	References	194
8	Building a Domain Ontology to Design a Decision Support Software to Plan Fight Actions Against Marine Pollutions	197
	Jean-Marc Mercantini	
8.1	Introduction	197
8.2	The CLARA 2 Project	199
8.3	Evolution of the Methods for Building Ontologies	202
8.3.1	Definitions	202
8.3.2	Ontology Engineering	203
8.3.3	Criteria Needed for a Methodology for Building Ontologies	205
8.4	KOD: A Knowledge Engineering Method	206
8.4.1	General Presentation of KOD	206
8.4.2	KOD: Elaboration of the Models	208
8.4.3	The Life Cycle of Ontologies with KOD	209
8.5	Elaboration of the Ontology for GENEPI	210
8.5.1	Ontology Specification	210
8.5.2	Corpus Definition and Analysis	210
8.5.3	Linguistic Study of the Corpus	212
8.5.4	Conceptualization	215
8.5.5	Formalization and Software Model	219
8.6	Architecture of the GENEPI Module	221
8.6.1	The Situation Management	222
8.6.2	The Action Search Engine	222
8.6.3	The Plan Generator	223
8.6.4	The Ontology Management Module	224
8.7	Conclusion	224
	References	225

9 The Operators' System of Instruments: A Risk Management Tool	229
Grégory Munoz, Christine Vidal-Gomel and Gaëtan Bourmaud	
9.1 Introduction: Instruments and Risk Management	230
9.2 Systems of Instruments and Safety Rules	232
9.2.1 Characteristics of the Systems of Instruments	232
9.2.2 System of Instruments and Safety Rules	233
9.2.3 System of Instruments and Resilience	234
9.3 Methodology of the Case Study	235
9.3.1 Collected Data: A Study of the "Redefined Task"	235
9.3.2 The Subject's Characteristics	236
9.3.3 Data Analysis: Components of the System of Instruments and Functional Analysis	236
9.4 Results: The System of Instruments of a Preventionist	237
9.4.1 General Results of Work Analysis	237
9.4.2 The System of Instruments of an Experienced Preventionist	239
9.5 Systems of Instruments, Training and Risk Management	243
