

Table of Contents

1	Introduction	1
2	Survey	7
2.1	Short Company History – Power Generation	11
2.1.1	BBC Aktiengesellschaft Brown Boveri & Cie., 1891–1988	13
2.1.2	ABB Asea Brown Boveri Power Generation Ltd., 1988–2000	26
2.1.3	ALSTOM Power Ltd., since 2000	30
2.2	Gas Turbine Types.....	32
2.2.1	Stationary Power Generation Gas Turbines	32
2.2.2	Gas/Steam Combined-Cycle Power Plants.....	35
2.2.3	Aero Propulsion Gas Turbines.....	36
2.3	Technical Basics	37
2.3.1	Gas Turbine Thermodynamics.....	37
2.3.2	Gas Turbine Component Performance	40
2.3.3	Gas/Steam Combined-Cycle Power Plant	41
3	Gas Turbine Forerunners	43
3.1	Turbomachines and Turbochargers.....	43
3.1.1	Early Turbo- and Fluidmachines	43
3.1.1.1	Historic Compressors.....	46
3.1.1.2	Water Wheels	48
3.1.1.3	Steam Turbines.....	50
3.1.1.4	Turbocompressors	52
3.1.2	Turbocharger Development History	53
3.2	Early Attempts with the Gas Turbine Principle.....	66
3.3	The Holzwarth Gas Turbine.....	72
4	The Path to the First Power Generation Gas Turbine, 1927–1945	77
4.1	Development Survey at BBC.....	77
4.1.1	Development Department and Business Environment	78
4.1.2	Prominent Engineers.....	84
4.1.2.1	Adolf Meyer (1880–1965)	87
4.1.2.2	Walter G. Noack (1881–1945).....	88
4.1.2.3	Claude Seippel (1900–1986)	92
4.1.2.4	Hans Pfenninger (1903–1989)	96

4.2	GT Key Component: Axial Flow Compressor.....	98
4.2.1	Early Ideas and Trials	99
4.2.2	First Axial Compressor Development Tests after 1926.....	102
4.2.3	The Degree of Reaction and Other Fluid Mechanic Research	109
4.2.4	Successful Compressor Reference Projects Beginning 1932	122
4.2.4.1	The First Supersonic Wind Tunnel at ETH Zurich.....	126
4.2.4.2	The Guidonia Wind Tunnel	128
4.2.4.3	The AVA/LFM Wind Tunnel Projects	131
4.2.4.4	The Mach 4 Wind Tunnel at LRBA Vernon, France, 1947	135
4.2.4.5	The Hypersonic Wind Tunnel for Kochel/Tullahoma 1943–1960	137
4.2.4.6	The von Kármán Team at BBC Baden CH, June 1945	146
4.2.5	Outlook – Further Compressor Development	152
4.3	The Early BBC Gas Turbines	158
4.3.1	VELOX Boiler	158
4.3.1.1	Concept Settlement.....	158
4.3.1.2	Multi-Purpose Velox Deliveries to UK, 1940.....	164
4.3.1.3	Blast Furnace Gas Extension of the Velox Principle.....	166
4.3.1.4	Velox – the Final Stages.....	168
4.3.2	Houdry Refinery Process	169
4.3.2.1	BBC Equipment.....	169
4.3.2.2	Transforming Crude Oil into 100 Octane Petrol	173
4.3.2.3	Strategic Importance and Side Effects	178
4.3.3	The World's First Utility Gas Turbine Set at Neuchâtel (1939).....	181
4.3.3.1	A Consequential Engineering Harvest	181
4.3.3.2	Certified by Stodola and at the 'Landi 39'	183
4.3.3.3	After 62 Years in Service – An ASME Technical Landmark.....	188
4.3.4	First BBC Power Generation Gas Turbines	191
4.3.5	BBC Locomotive Gas Turbines.....	196
4.3.5.1	Von Ohain's 'Tuttlingen Engine'	204
4.3.5.2	German Tank Gas Turbine Developments	206
4.3.5.3	Separate Gas Generators for Large Transport Aircraft.....	208
5	Gas Turbine Technology Development 1945–1988	211
5.1	Development Survey at BBC	212
5.1.1	'Die Muehen der Ebene'	212
5.1.2	A Rare Top-Down View of the BBC Gas Turbine Business (1978)	221
5.1.3	Strategic Failures: The BST and Turbodyne Interlude	227
5.1.4	Business Facts.....	232
5.1.5	Early Plants and the Key Development Projects GT8/GT9/GT11/GT13.....	234
5.1.5.1	BBC Gas Turbine Development Roadmap 1945–1988.....	234
5.1.5.2	Beznau and Other Tailor-Made Gas Turbines	240
5.1.5.3	The Development of Ready-Made GT Families after 1970.....	246
5.1.5.4	GT Designs on the Brink – and Beyond.....	270
5.1.6	Prominent Engineers.....	279
5.1.6.1	Albert Eiermann (1924–2013).....	279

5.1.6.2	Wilhelm Endres (1927–2007).....	283
5.1.6.3	Franz Farkas (*1935).....	285
5.2	Competitive Designs and Developments.....	287
5.2.1	Escher Wyss – The Closed Cycle AK Engine.....	287
5.2.2	Sulzer – Gas Turbine with Semi-Closed Process.....	290
5.2.3	Other Companies.....	292
5.3	GT Key Component: Combustor.....	298
5.3.1	Early Developments and Evolution of Combustor Arrangements.....	299
5.3.2	First Generation Lean Dry, Low NOx Technology.....	305
5.3.3	Multi-Injection Burner and GT8 Annular Combustor.....	307
5.3.4	Second Generation EV Premix Burner Technology.....	308
5.3.5	SEV Burner Development for GT24/GT26 Applications.....	311
5.3.6	Further Low Emission Combustion Development.....	315
5.4	BBC Gas Turbine Mechanical Design and Manufacturing.....	317
5.4.1	General Gas Turbine Design Principles.....	317
5.4.2	The Welded Rotor Design and Manufacturing.....	319
5.4.3	Gas Turbine Manufacturing Sites and Network.....	325
5.5	Gas Turbine Special Projects.....	333
5.5.1	Mobile and Packaged Energy Stations.....	333
5.5.2	Aero Jet Expander.....	337
5.5.3	Compressed Air Energy Storage.....	340
5.5.4	Low and Medium BTU Fuels (GT11N2-LBTU, GT13E2-MBTU).....	343
6	Combined Cycle Power Plants – GT Technology Breakthroughs since the 1990s	347
6.1	Gas Turbine Development Survey.....	347
6.1.1	The GT Technology and Business Environment in the 1990s.....	348
6.1.2	The ABB/Alstom Development Department.....	351
6.1.3	The Key Development Project GT24/GT26.....	354
6.1.3.1	Secret ‘Skunk Works’ 1991–1995.....	356
6.1.3.2	GT24/GT26 Design Stabilisation 1996–2002.....	366
6.1.3.3	GT24/GT26 Success Story since 2003.....	376
6.1.4	Prominent Engineers.....	380
6.1.4.1	Fredy Haeusermann (*1942).....	380
6.1.4.2	Jakob J. Keller (1950–1999).....	381
6.1.4.3	Hans Koch (*1929).....	383
6.2	GT Key Component: Turbine.....	384
6.2.1	Aerodynamic Turbine Development Milestones.....	385
6.2.2	Turbine Cooling Technology.....	397
6.2.2.1	Out of Time: Turbine Water and Film Cooling 1925–1945.....	397
6.2.2.2	Heavy-Duty GT Turbine Cooling Development after 1965.....	407
6.2.3	High Temperature Materials and Coatings.....	414
6.2.4	Tests at the Gas Turbine Power Plant Birr.....	421

6.3	The Combined Cycle Power Plants	423
6.3.1	Historic Developments.....	424
6.3.2	The Bright Presence of Combined-Cycle Power Generation	428
6.4	Gas Turbine Outlook	434
6.4.1	Future Power Generation Market.....	434
6.4.2	Innovative Gas Turbine Technologies.....	435
7	'Les Palmarès'	439
7.1	BBC-ABB-Alstom Historical Firsts in Gas Turbine Technology for Power Generation	439
7.2	BBC-ABB-Alstom GT Development Directors (Baden, CH).....	441
7.3	The Members of the GT Development 'Hall of Fame'	442
8	Bibliography	445
9	Index of Names	473
10	Subject Index	479
11	Nomenclature and Abbreviations	491
12	The Author	497
