Contents

| Abstracts | 1 |
|---|----|
| English | 1 |
| German | 2 |
| 1. Introduction | 5 |
| Foveal and Peripheral Vision – Physiological and Functional Fundamentals | 7 |
| 1.2. A Brief Glance on the Subject of Visual Attention | 9 |
| 1.3. The Allocation of Gaze in Natural Tasks | 12 |
| 1.3.1. 'Walter' - A Model of Scheduling Gaze Allocation | 12 |
| 1.3.2. Findings on Human Behavior in Naturalistic Tasks using Virtual Reality | 25 |
| 1.4. An Effect of Peripheral Information on Gaze | |
| 1.4.1. The Visual Center of Gravity – Defining the Concept | |
| 1.4.2. Approaches to a Visual Center of Gravity | 32 |
| 1.4.3. Findings on the Visual Center of Gravity Effect | 34 |
| 1.5. The Paradigm and the Aim of the Study | 41 |
| 1.6. Hypotheses and Implementation | 43 |
| 2. Methods | 45 |
| 2.1. Sample | 45 |
| 2.2. Equipment | 46 |
| 2.3. Stimuli and Task | 48 |

| 2.4. Design | 50 |
|--|------------|
| 2.5. Procedure | 53 |
| 2.5.1. Procedure of the Experimental Conduct | 53 |
| 2.5.2. Procedure of a Trial | 55 |
| 2.6. Data Preparation and Handcoding | 55 |
| 3. Results | 59 |
| 3.1. Total Frequencies of Fixations and Exclusion of Data | 59 |
| 3.2. The Gaze Bias Towards Neighbors for Two Visible Objects | 62 |
| 3.2.1. The Computation of a New Variable | 62 |
| 3.2.2. The Analysis of the Gaze Bias Towards Neighboring Objects | 63 |
| 3.3. Screening of Possibly Interfering Direction Effects | 70 |
| 3.3.1. Direction Preferences of Gaze | 71 |
| 3.3.2. Differences in the Configuration of Objects | 73 |
| 3.3.3. Direction Preferences of Gaze for One Visual Object | 75 |
| 4. Discussion | 79 |
| 4.1. Summary of Results | 79 |
| 4.2. A Visual Center of Gravity Effect in Real-Life Tasks | 82 |
| 4.3. The Task-Relevance of Objects and its Impact on Gaze Position | 8 6 |
| 4.3.1. The Task-Relevance of the Fixated Object | 87 |
| 4.3.2. The Task-Relevance of the Neighboring Object | 87 |
| 4.4. Alternative Explanations and Limitations of the Study | 90 |
| 4.5. Prospects | 93 |
| 4.6. Conclusion | 94 |
| 5. References | 97 |
