

Contents

1. Introduction	1
2. The Architecture Description Language MontiArc	3
2.1. Applications and Extensions of MontiArc	5
3. MontiArcAutomaton Example and Overview	7
3.1. Related Modeling Languages	10
4. A MontiArcAutomaton Language Profiles and Semantics	13
4.1. Language Profile for Time-Synchronous Communication	14
4.2. A Language Profile for Event-Driven Automata	16
5. MontiArcAutomaton Language Reference	19
5.1. Automaton Declarations	19
5.2. Variables	19
5.3. Values and Sequences	20
5.4. State Declarations	21
5.4.1. Initial States and Initial Outputs	22
5.5. Transitions	23
5.5.1. Guard Expressions over Ports and Variables	24
5.5.2. Input on Ports and Current Variable Values	24
5.5.3. Output on Ports	26
5.5.4. Variable Value Assignments	27
5.6. Generic Types	27
6. MontiArcAutomaton Context Conditions	29
6.1. Uniqueness Conditions	29
6.2. Convention Conditions	31
6.3. Referential Integrity Conditions	32
6.4. Type Correctness Conditions	33
6.5. MAA_{ts} Specific Context Conditions	37
6.6. MAA_{ed} Specific Context Conditions	40
7. Case Studies	43
7.1. Lego NXT Coffee Service	44
7.2. ROS Robotino Logistics	44
7.3. SmartSoft Robotino Logistics	45

7.4. IServeU	46
8. Discussion and Current Limitations	49
8.1. Expressiveness of Automata for Behavior Modeling	49
8.2. Extension with Additional Behavior Modeling Languages	50
8.3. Code Generation, Deployment, and Platforms	50
9. Summary	51
Bibliography	53
List of Figures	61
List of Listings	63
A. Human Readable Grammar	65
B. Parser Grammar	67
