<b>1</b>	<b>Optical Screening as a Photoprotective Mechanism</b>	1
	References	6
<b>2</b>	<b>Screening Pigments: General Questions</b>	9
2.1	The Specificity of the Screening Pigments' Function	9
2.2	The Evolution of Screening Pigments in Plants	11
2.3	The Diversity of Screening Pigments	13
2.3.1	Mycosporin-Like Amino Acids	14
2.3.2	Phenolic Compounds	15
2.3.3	Betalains	18
2.3.4	Carotenoids	19
2.3.5	Other Screening Pigments	23
2.4	Concluding Remarks	23
	References	25
<b>3</b>	<b>Stress-Induced Buildup of Screening Pigments</b>	33
3.1	Buildup of Mycosporine-Like Amino Acid and Phenolic Sunscreens	34
3.1.1	Induction and Regulation of the Synthesis of Mycosporine-Like Amino Acids	35
3.1.2	Induction of Biosynthesis of Phenolic Compounds	35
3.1.3	Accumulation of Different Phenolic Compounds in Response to Strong Solar Irradiation	37
3.2	Accumulation of Screening Pigments as a Result of Carotenogenesis	43
3.2.1	Carotenogenesis in Microalgae	43
3.2.2	Carotenogenesis in Higher Plants	50
3.3	Concluding Remarks	58
	References	58
