

Contents

1	Introduction	1
1.1	Short Introduction to Graph Theory	1
1.2	Distance in Graphs	2
1.3	Harary Index of a Graph	2
1.4	Harary Matrix of a Graph	4
1.5	Modified Harary Index	8
	References	10
2	Extremal Graphs with Respect to Harary Index	13
2.1	General Graphs	13
2.2	Trees	19
2.3	Generalized Trees	23
	References	25
3	Relation Between the Harary Index and Related Topological Indices	27
3.1	Relation Between the Harary Index and Reciprocal Wiener Index	27
3.2	Relation Between the Harary Index and Zagreb Indices	31
	References	33
4	Some Properties and Applications of Harary Index	35
4.1	Some Properties of Harary Index	35
4.2	Application of Harary Index in Pure Graph Theory	39
4.3	Application of Harary Index in Mathematical Chemistry	40
4.4	Application of Harary Index to Structure-Property Modeling	48
	References	53

5	The Variants of Harary Index	55
5.1	Extremal Graphs with Respect to H_A and H_M	56
5.2	Some Properties of Additively Weighted Harary Index	63
	References	67
6	Open Problems	69
6.1	Determining the Minimal Harary Index in a Given Set	69
6.2	Other Attractive Open Problems	70
	References	73
