Foreword XXI

Preface XXV

List of Contributors XXXIII

Part I: Chemistry Education: A Global Endeavour -1

1	Chemistry Education and Human Activity 3
1.1	Peter Mahaffy Overview 3
1.1	
1.2	Chemistry Education and Human Activity 3
1.3	A Visual Metaphor: Tetrahedral Chemistry Education 4
1.4	Three Emphases on Human Activity in Chemistry Education 5
1.4.1	The Human Activity of Learning and Teaching Chemistry 6
1.4.1.1	Atoms or Learners First? 6
1.4.1.2	Identifying Learners and Designing Curriculum to Meet Their
	Needs 7
1.4.1.3	Effective Practices in the Human Activity of Learning and Teaching
	Chemistry 8
1.4.1.4	Identifying and Eliminating Worst Practices as a Strategy? 8
1.4.1.5	Exemplar: Emphasizing the Human Activity of Learning and
	Teaching Chemistry 9
1.4.2	The Human Activity of Carrying Out Chemistry 10
1.4.2.1	Explicit and Implicit Messages about the Nature of Chemistry 10
1.4.2.2	Breathing the Life of Imagination into Chemistry's Facts 11
1.4.2.3	Exemplars: Emphasizing the Human Activity of Carrying Out
	Chemistry 13
1.4.3	Chemistry Education in the Anthropocene Epoch 14
1.4.3.1	Planetary Boundaries: A Chemistry Course Outline? 15
1.4.3.2	Steps toward Anthropocene-Aware Chemistry Education 16
1.4.3.3	Exemplars: Anthropocene-Aware Chemistry Education 17
1.5	Teaching and Learning from Rich Contexts 18
1.5.1	Diving into an Ocean of Concepts Related to Acid-Base
	Chemistry 18

Contents	
1.5.2 1.5.3	What Is Teaching and Learning from Rich Contexts? 20 Teaching and Learning from Rich Contexts – Evidence for
1.5.4	Effectiveness 21 From "Chemical" to "Chemistry" Education – Barriers to Change 22 Acknowledgments 23 References 24
2	Chemistry Education That Makes Connections: Our Responsibilities 27 Cathy Middlecamp
2.1	·
2.1	What This Chapter Is About 27
2.2	Story #1: Does This Plane Have Wings? 28
2.3	Story #2: Coaching Students to "See" the Invisible 30
2.4	Story #3: Designing Super-Learning Environments for Our Students 34
2.5	Story #4: Connections to Public Health (Matthew Fisher) 37
2.6	Story #5: Green Chemistry Connections (Richard Sheardy) 39
2.7	Story #6: Connections to Cardboard (Garon Smith) 41
2.8	Story #7: Wisdom from the Bike Trail 44
2.9	Conclusion: The Responsibility to "Connect the Dots" 46
2.7	References 48
3	The Connection between the Local Chemistry Curriculum and Chemistry Terms in the Global News: The Glocalization Perspective 51 Mei-Hung Chiu and Chin-Cheng Chou
3.1	Introduction 51
3.2	Understanding Scientific Literacy 52
3.3	Introduction of Teaching Keywords-Based Recommendation
	System 55
3.4	Method 56
3.5	Results 57
3.5.1	Example 1: Global Warming 57
3.5.2	Example 2: Sustainability 57
3.5.3	Example 3: Energy 58
3.5.4	Example 4: Acid 59
3.5.5	Example 5: Atomic Structure 60
3.5.6	Example 6: Chemical Equilibrium 61
3.5.7	Example 7: Ethylene 62
3.5.8	Example 8: Melamine 63
3.5.9	Example 9: Nano 64
3.6	Concluding Remarks and Discussion 65
3.7	Implications for Chemistry Education 68
	Acknowledgment 70
	References 70

VI

4	Changing Perspectives on the Undergraduate Chemistry Curriculum 73
	Martin J. Goedhart
4.1	The Traditional Undergraduate Curriculum 73
4.2	A Call for Innovation 74
4.2.1	Constructivism and Research on Student Learning 74
4.2.2	New Technologies 76
4.2.3	The Evolving Nature of Chemistry 77
4.2.4	Developments in Society and Universities 77
4.3	Implementation of New Teaching Methods 78
4.3.1	The Interactive Lecture 79
4.3.2	Problem- and Inquiry-Based Teaching 80
4.3.3	Research-Based Teaching 80
4.3.4	Competency-Based Teaching 81
4.4	A Competency-Based Undergraduate Curriculum 83
4.4 4.4.1	The Structure of the Curriculum 84
4.4.1	
4.4.3	Competency Area of Analysis 86 Competency Area of Synthesis 88
4.4.4	
4.4.4	. ,
	The Road to a Competency-Based Curriculum 90 Conclusions and Outlook 92
4.5	
	References 93
5	Empowering Chemistry Teachers' Learning: Practices and New
•	Challenges 99
	Jan H. van Driel and Onno de Jong
5.1	Introduction 99
5.2	Chemistry Teachers' Professional Knowledge Base 102
5.2.1	The Knowledge Base for Teaching 102
5.2.2	Chemistry Teachers' Professional Knowledge 103
5.2.3	Development of Chemistry Teachers' Professional Knowledge 105
5.3	Empowering Chemistry Teachers to Teach Challenging Issues 107
5.3.1	Empowering Chemistry Teachers for Context-Based Teaching 107
5.3.2	Empowering Chemistry Teachers to Teach about Models and
5.5.2	Modeling 109
5.3.3	Empowering Chemistry Teachers to Use Computer-Based
5.5.5	Technologies for Teaching 111
5.4	New Challenges and Opportunities to Empower Chemistry Teachers
3.4	Learning 113
5.4.1	8
5.4.2	Becoming a Lifelong Research-Oriented Chemistry Teacher 113
3.4.2	Learning Communities as a Tool to Empower Chemistry Teachers'
E E	Learning 114 Final Conclusions and Future Trends 116
5.5	Final Conclusions and Future Trends 116 References 118
	NEIGHERICAN 110

Contents	
6	Lifelong Learning: Approaches to Increasing the Understanding of
	Chemistry by Everybody 123
	John K. Gilbert and Ana Sofia Afonso
6.1	The Permanent Significance of Chemistry 123
6.2	Providing Opportunities for the Lifelong Learning of Chemistry 123
6.2.1	Improving School-Level Formal Chemistry Education 123
6.2.2	Formal Lifelong Chemical Education 125
6.2.3	Informal Chemical Education 126
6.2.4	Emphases in the Provision of Lifelong Chemical Education 12
6.3	The Content and Presentation of Ideas for Lifelong Chemical
	Education 129
6.3.1	The Content of Lifelong Chemical Education 129
6.3.2	The Presentation of Chemistry to Diverse Populations 130
6.4	Pedagogy to Support Lifelong Learning 131
6.5	Criteria for the Selection of Media for Lifelong Chemical Education 133
6.6	Science Museums and Science Centers 133
6.6.1	Museums 133
6.6.2	Science Centers 134
6.7	Print Media: Newspapers and Magazines 134
6.8	Print Media: Popular Books 135
6.9	Printed Media: Cartoons, Comics, and Graphic Novels 136
6.9.1	Three Allied Genre 136
6.9.2	The Graphic Novel 137
6.9.3	The Educational Use of Graphic Novels in Science Education
6.9.4	Case Study: A Graphic Novel Concerned with Cancer
	Chemotherapy 140
6.10	Radio and Television 140
6.11	Digital Environments 141
6.12	Citizen Science 143
6.13	An Overview: Bringing About Better Opportunities for Lifelon
	Chemical Education 144
	References 146
	Part II: Best Practices and Innovative Strategies 149
7	Using Chemistry Education Research to Inform Teaching Strategi
	and Design of Instructional Materials 151
	Renée Cole

7	Using Chemistry Education Research to Inform Teaching Strategies and Design of Instructional Materials 151 Renée Cole
7.1	Introduction 151
7.2	Research into Student Learning 153
7.3 .	Connecting Research to Practice 154
7.3.1	Misconceptions 154
7.3.2	Student Response Systems 157

7.3.3	Concept Inventories 158
7.3.4	Student Discourse and Argumentation 159
7.3.5	Problem Solving 161
7.3.6	Representations 161
7.3.7	Instruments 163
7.4	Research-Based Teaching Practice 165
7.4.1	Interactive Lecture Demonstrations 166
7.4.2	ANAPOGIL: Process-Oriented Guided Inquiry Learning in
7.4.2	Analytical Chemistry 167
7.4.3	CLUE: Chemistry, Life, the Universe, and Everything 169
7.5 7.6	Implementation 171
7.6	Continuing the Cycle 172 References 174
8	Research on Problem Solving in Chemistry 181
8.1	George M. Bodner
8.2	Why Do Research on Problem Solving? 181
0.2	Results of Early Research on Problem Solving in General Chemistry 184
8.3	What About Organic Chemistry 186
8.4	The "Problem-Solving Mindset" 192
8.5	An Anarchistic Model of Problem Solving 193
8.6	Conclusion 199
	References 200
9	Do Real Work, Not Homework 203
	Brian P Coppola
9.1	Thinking About Real Work 203
9.1.1	Defining Real Work: Authentic Learning Experiences 203
9.1.2	Doing Real Work: Situated Learning 206
9.2	Attributes of Real Work 209
9.2.1	Balance Convergent and Divergent Tasks 209
9.2.1.1	Convergent Assignments 212
9.2.1.2	Divergent Assignments 213
9.2.1.3	Balancing Convergent and Divergent Assignments 214
9.2.1.4	Convergent Assignments in Team Learning 215
9.2.1.5	Divergent Assignments in Team Learning 216
9.2.2	Peer Presentations, Review, and Critique 218
9.2.2.1	Calibrated Peer Review 221
9.2.2.2	Guided Peer Review and Revision 221
9.2.2.3	Argumentation and Evidence 222
9.2.3	Balance Teamwork and Individual Work 222
9.2.3.1	Team-Based Learning: Face-to-Face Teams 222
9.2.3.2	Team-Based Learning: Virtual Teams 223
9.2.3.3	Team-Based Learning: Laboratory Projects 223

x	Contents	
١	9.2.3.4	Team-Based Learning: Collaborative Identification 223
	9.2.3.5	Team-Based Learning: Experimental Optimization 224
	9.2.4	Students Use the Instructional Technologies 224
	9.2.4.1	Learning by Design 224
	9.2.4.2	Electronic Homework System: In the Classroom 225
	9.2.4.3	Student-Generated Videos 225
	9.2.4.4	Student-Generated Animations 225
	9.2.4.5	Student-Generated Video Blogs 226
	9.2.4.6	Wikipedia Editing 227
	9.2.4.7	Wiki Environment 227
	9.2.4.8	Student-Generated Metaphors 227
	9.2.5	Use Authentic Texts and Evidence 228
	9.2.5.1	Literature Summaries 228
	9.2.5.2	Literature Seminars 229
	9.2.5.3	Public Science Sources 230
	9.2.5.4	Generating Questions 230
	9.2.5.5	Course-Based Undergraduate Research Experiences
		(CURE) 230
	9.2.5.6	Interdisciplinary Research-Based Projects 231
	9.2.6	As Important to the Class as the Teacher's
		Work 232
	9.2.6.1	Student-Generated Instructional Materials 232
	9.2.6.2	Wiki Textbooks 232
	9.2.6.3	Print and Web-Based Textbooks 233
	9.2.6.4	Electronic Homework Systems 235
	9.2.6.5	Podcasts 236
	9.2.6.6	Classroom: Active-Learning Assignments 238
	9.2.6.7	Laboratory: Safety Teams 239
	9.3	Learning from Real Work 239
	9.3.1	Evidence of Creativity through the Production of Divergent
		Explanations 240
	9.3.2	Peer Review and Critique Reveal Conceptual
		Weaknesses 240
	9.3.3	Team Learning Produces Consistent Gains in Student
		Achievement 241
	9.3.4	Students Use Instructional Technologies 242
	9.3.5	Using Authentic Materials Result in Disciplinary Identification and
		Socialization 243
	9.3.6	Student-Generated Instructional Materials Promotes Metacognition

and Self-Regulation 244 Conclusions 245
